GENERAL REMARKS

1. "Title" is a general word used to cover all types of authorities, permits, licences and leases throughout the Commonwealth, regardless of the specific names given to them by the various States and Territories.
2. 'Date of Expiry' means the date of expiry of current tenure. There may be rights to renewal for further periods, in some cases over a reduced area.
3. Where two or more companies are listed, an asterisk following the name of a company means that the company is the operator in that particular title at 31.12.65.
4. The Petroleum Exploration & Development Titles Map and this Key are based on information supplied by the various State and Territory Departments of Mines, and additional details should be obtained directly from them.

ANALYSIS OF PETROLEUM TITLE DISTRIBUTION

The following list shows the distribution by States and Territories of the petroleum titles and applications for titles held by the exploration companies. It is a cross-reference to the "Key to Petroleum Exploration & Development Titles in Force at 31st December, 1965" which is based on information received from the Departments of Mines of the various States and Territories.

The titles held, applications pending or association with an operator in the relevant State or Territory are shown opposite the name of the company. Where there are joint holders the information is repeated opposite each partner. Where nothing appears opposite a name, the operator is represented in Australia but does not hold a title. Reference is also made to the various explanatory notes.
