INTRODUCTION

This Bibliography has been prepared by the Petroleum Exploration Branch of the Bureau of Mineral Resources, with assistance from the Geological Survey of Western Australia.

It contains all known available information, current to 31 December 1969, and is divided into two sections, one for published information and the other for unpublished.

Each section is arranged in alphabetical order. Any information that becomes available under the Petroleum Search Subsidy Act is listed under the operating Company and not the author of the report.
