STRATIGRAPHY: CAMBOON ANDESITE Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:TD Base Elevation: -2789# Thickness: >135
Geologic Description: INTBDD RHY-ANDES WELDED TUFF AND ANDESITE FLOWS
Reported Environment: TERRESTRIAL

Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED CRACOW FM IN REPORT; GAS SHOWS

STRATIGRAPHY: UNDIFF POST-TRIASSIC Age: POST-TRIASSIC Interpretation Code:Y201
Basal Information: Depth to Base:619 Base Elevation: -286 Thickness: 614
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: REWAN GP Age: TRIASSIC Interpretation Code:Y202
Basal Information: Depth to Base:634 Base Elevation: -301 Thickness: 15
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:1419 Base Elevation: -1086 Thickness: 785
Geologic Description:
Reported Environment: FLUVIAL LACUSTRINE OR PALUDAL (P.126)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y204
Basal Information: Depth to Base:2920 Base Elevation: -2587 Thickness: 1501
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BUFFEL FM Age: PERMIAN Interpretation Code:Y205
Basal Information: Depth to Base:2987 Base Elevation: -2654 Thickness: 67
Geologic Description:
Reported Environment: SHALLOW MARINE (P.37)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: TIVERTON SUB-GP Age: PERMIAN Interpretation Code:Y206
Basal Information: Depth to Base:2987 Base Elevation: -2654 Thickness: 67
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BUFFEL FM

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y207

Basal Information: Depth to Base:2987 Base Elevation: -2654 Thickness: 1568
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS UNDIFFERENTIATED BLENHEIM SUB-GROUP AND BUFFEL FM OF TIVERTON SUB-GROUP

STRATIGRAPHY: CAMBOON ANDESITE Age: PERMIAN Interpretation Code:Y208
Basal Information: Depth to Base:3042 Base Elevation: -2709 Thickness: 55
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF PRE-PERMIAN Age: PRE-PERMIAN Interpretation Code:Y209
Basal Information: Depth to Base:TD Base Elevation: -2789± Thickness:)80
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF POST-PERMIAN Age: TRIASSIC Interpretation Code:Y301
Basal Information: Depth to Base:854 Base Elevation: -521 Thickness: 848
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks BASE IS TRIASSIC

STRATIGRAPHY: "PRODUCTIVE MB" Age: PERMIAN Interpretation Code:Y302
Basal Information: Depth to Base:1185 Base Elevation: -852 Thickness: 331
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks "PRODUCTIVE MB" IS BARALABA CM ABOVE THE KALOOLA TUFF MEMBER. UNIT NOT DEFINED IN REFERENCE REPORT

STRATIGRAPHY: KALOOLA TUFF MB Age: PERMIAN Interpretation Code:Y303
Basal Information: Depth to Base:1276 Base Elevation: -943 Thickness: 91
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks BASE OF BARALABA CM

STRATIGRAPHY: BARALABA CM Age: PERMIAN Interpretation Code:Y304
Basal Information: Depth to Base:1276 Base Elevation: -943 Thickness: 422
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:

Remarks CONTAINS "PRODUCTIVE MB" AND KALOOLA TUFF MB

STRATIGRAPHY: GYRANDA FM Age: PERMIAN Interpretation Code:Y305
Basal Information: Depth to Base:1414 Base Elevation: -1081 Thickness: 138
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y306
Basal Information: Depth to Base:1414 Base Elevation: -1081 Thickness: 560
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BARALABA CM ("PRODUCTIVE MB" AND KALOOLA TUFF MB) AND GYRANDA FM

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y307
Basal Information: Depth to Base:2914 Base Elevation: -2581 Thickness: 1500
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks REFERENCE ASCRIBES TO OXTRACK AND FLAT TOP FMS BUT DOES NOT DEFINE THEIR BOUNDARIES.

STRATIGRAPHY: BUFFEL FM Age: PERMIAN Interpretation Code:Y308
Basal Information: Depth to Base:2982 Base Elevation: -2649 Thickness: 68
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: TIVERTON SUB-GP Age: PERMIAN Interpretation Code:Y309
Basal Information: Depth to Base:2982 Base Elevation: -2649 Thickness: 68
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BUFFEL FM

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y310
Basal Information: Depth to Base:2982 Base Elevation: -2649 Thickness: 1568
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BLENHEIM AND TIVERTON (BUFFEL FM) SUB-GROUP.

STRATIGRAPHY: CAMBOON ANDESITE Age: PERMIAN Interpretation Code:Y311
Basal Information: Depth to Base:TD Base Elevation: -2789* Thickness: >140
Geologic Description:
Reported Environment:

Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

SEDIMENTARY BASIN: BOWEN, SUB-SURAT

STRATIGRAPHY: UNDIFF CAINOZOIC Age: CAINOZOIC Interpretation Code:X1f1
Basal Information: Depth to Base:18 Base Elevation: +277 Thickness: 13
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: SURAT BASIN SEQUENCE Age: JURASSIC-CRET Interpretation Code:X102
Basal Information: Depth to Base:2329 Base Elevation: -2034 Thickness: 2311
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: CABAWIN FM Age: TRIASSIC Interpretation Code:X103
Basal Information: Depth to Base:2998 Base Elevation: -2703 Thickness: 669
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA FM Age: PERMIAN Interpretation Code:X104
Basal Information: Depth to Base:3135 Base Elevation: -2840 Thickness: 137
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:X105
Basal Information: Depth to Base:3135 Base Elevation: -2840 Thickness: 137
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BANDAHNA FM

STRATIGRAPHY: BLACK ALLEY SH Age: PERMIAN Interpretation Code:X106
Basal Information: Depth to Base:3158 Base Elevation: -2863 Thickness: 23
Geologic Description: CONTAINS FAUNA IV
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: TINOWON FM Age: PERMIAN Interpretation Code:X107
Basal Information: Depth to Base:3280 Base Elevation: -2985 Thickness: 122
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:X108
Basal Information: Depth to Base:3280 Base Elevation: -2985 Thickness: 145
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BLACK ALLEY SH & TINOWON FM

STRATIGRAPHY: UNDIFF BACK CREEK GP Age: PERMIAN Interpretation Code:X109
Basal Information: Depth to Base:3523 Base Elevation: -3228 Thickness: 243
Geologic Description: CONTAINS FAUNA II
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:X110
Basal Information: Depth to Base:3523 Base Elevation: -3228 Thickness: 388
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BLACK ALLEY SH, TINOWON FM & UNDIFF BACK CREEK GP

STRATIGRAPHY: BASEMENT Age: PRE-PERMIAN Interpretation Code:X111
Basal Information: Depth to Base:TD Base Elevation: -3373# Thickness: >145
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF CAINOZOIC Age: CAINOZOIC Interpretation Code:Y101
Basal Information: Depth to Base:18 Base Elevation: +277 Thickness: 13

Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ROLLING DOWNS GP Age: CRETACEOUS Interpretation Code:Y102
Basal Information: Depth to Base:873 Base Elevation: -578 Thickness: 855
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED ROMA FM IN W.C.R.

STRATIGRAPHY: BUNGIL-CUBBERAMUNDA Age JURASSIC-CRET Interpretation Code:Y103
Basal Information: Depth to Base:1280 [illegible] Elevation: -985 Thickness: 407
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED BLYTHESDALE FM IN W.C.R. REPRESENTS UNDIFFERENTIATED BUNGIL FM TO CUBBERAMUNDA SST

STRATIGRAPHY: INJUNE CREEK GP Age: JURASSIC Interpretation Code:Y104
Basal Information: Depth to Base:1659 Base Elevation: -1364 Thickness: 379
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED WALLOON FM IN W.C.R.

STRATIGRAPHY: HUTTON-PRECIPICE Age: JURASSIC Interpretation Code:Y105
Basal Information: Depth to Base:2329 Base Elevation: -2034 Thickness: 670
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED BUNDAMBA FM IN W.C.R. REPRESENTS UNDIFFERENTIATED HUTTON SST-PRECIPICE SST

STRATIGRAPHY: CABAWIN FM Age: TRIASSIC Interpretation Code:Y106
Basal Information: Depth to Base:2998 Base Elevation: -2703 Thickness: 669
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:3157 Base Elevation: -2862 Thickness: 159
Geologic Description: INTBDD MICAC CARB TUFF, COAL, LOCALLY QZOSE, GENERALLY VOLC LITHIC & SILICEOUS SST & MINOR CONGLOMERATE (ASH PEBBLES IN ASH MATRIX)
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
COAL SEAMS T'OUT
Tectonic Structure:

Remarks UPPER PERMIAN AGE FROM SPORES

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y16B
Basal Information: Depth to Base:3555 Base Elevation: -3260 Thickness: 398
Geologic Description: CALC SLTST INTBDD WITH CALC SH & SST (FOSSILIFEROUS); INTBDD COAL & SST; DK GY PY SILTY SH, TFAC SST & SLTST, TUFF
Reported Environment: SHALLOW WATER MARINE - ESTUARINE
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL INTERVAL	3269	-2974	53

Tectonic Structure:
Remarks PERMIAN AGE FROM MACROFOSSILS. FOSSILS INCLUDE BRACHIOPODS & CRINOIDS. COAL INTERVAL - TONGUE OF OVERLYING BLACKWATER G

STRATIGRAPHY: CRACOW FM Age: CARB-PERMIAN Interpretation Code:Y18D
Basal Information: Depth to Base:TD Base Elevation: -3373# Thickness: >113
Geologic Description: ANDESITIC-DACITIC VOLCANICS
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks

CONTROL POINT: COCKATOO CREEK 1

SEDIMENTARY BASIN: BOWEN, SUB-SURAT

STRATIGRAPHY: UNDIFF JURASSIC Age: JURASSIC Interpretation Code:X101
Basal Information: Depth to Base:220 Base Elevation: -15 Thickness: 215
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code:X102
Basal Information: Depth to Base:1009 Base Elevation: -804 Thickness: 789
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: "PRODUCTIVE MB" Age: PERMIAN Interpretation Code:X103
Basal Information: Depth to Base:1551 Base Elevation: -1346 Thickness: 542
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks: REPRESENTS BARALABA CM ABOVE THE KALOOLA MEMBER

STRATIGRAPHY: KALOOLA TUFF MB Age: PERMIAN Interpretation Code:X104
Basal Information: Depth to Base:1676 Base Elevation: -1471 Thickness: 125

Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks BELONGS TO BARALABA CM

STRATIGRAPHY: BARALABA CM Age: PERMIAN Interpretation Code:X105
Basal Information: Depth to Base:1676 Base Elevation: -1471 Thickness: 667
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS "PRODUCTIVE MB" AND KALOOLA MB

STRATIGRAPHY: GYRANDA FM Age: PERMIAN Interpretation Code:X106
Basal Information: Depth to Base:2382 Base Elevation: -2177 Thickness: 706
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:X107
Basal Information: Depth to Base:2382 Base Elevation: -2177 Thickness: 1373
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BARALABA CM ("PRODUCTIVE MB" + KALOOLA MB) AND GYRANDA FM

STRATIGRAPHY: FLAT TOP FM Age: PERMIAN Interpretation Code:X108
Basal Information: Depth to Base:2890 Base Elevation: -2685 Thickness: 508
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BARFIELD FM Age: PERMIAN Interpretation Code:X109
Basal Information: Depth to Base:3633 Base Elevation: -3428 Thickness: 743
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: OXTRACK FM Age: PERMIAN Interpretation Code:X110
Basal Information: Depth to Base:3669 Base Elevation: -3464 Thickness: 36
Geologic Description: SHALE, SLTST, WH-GY-GN TUFF. (NO LST TYPICAL OF OXTRACK FM).
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks PROBABLY EQUIVALENT TO "PINDARI FM" OF FLOOD, JELL & WATERHOUSE (1981).

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:X111
Basal Information: Depth to Base:3669 Base Elevation: -3464 Thickness: 1287
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS FLAT TOP, BARFIELD AND OXTRACK FMS.

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:X112
Basal Information: Depth to Base:3669 Base Elevation: -3464 Thickness: 1287
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks FLAT TOP, BARFIELD AND OXTRACK FMS OF BLENHEIM SUB-GP.

STRATIGRAPHY: CAMBOON ANDESITE Age: PERMIAN Interpretation Code:X113
Basal Information: Depth to Base:TD Base Elevation: -3478* Thickness: >14
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF JURASSIC Age: JURASSIC Interpretation Code:Y101
Basal Information: Depth to Base:201 Base Elevation: +4 Thickness: 196
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: REWAN GP Age: TRIASSIC Interpretation Code:Y102
Basal Information: Depth to Base:1009 Base Elevation: -804 Thickness: 808
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED "CABAWIN FM" IN COMPLETION REPORT

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:1701 Base Elevation: -1496 Thickness: 693
Geologic Description: INTBDD COAL, WH TFAC SST AND SLTST AND GY-WH TUFF AND SH
Reported Environment: NON-MARINE
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL INTERVAL	1065	-868	53
COAL INTERVAL	1210	-1005	94
COAL INTERVAL	1448	-1243	213
COAL INTERVAL	1548	-1343	30

Tectonic Structure:
Remarks CALLED "KIANGA FM" IN COMPLETION REPORT

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y104

Basal Information: Depth to Base:3633 Base Elevation: -3428 Thickness: 1931
Geologic Description: MONOTONOUS SEQ OF SILIC CARB SLTST, TFAC CARB SH, TUFF AND MINOR TFAC SST; MEGAFOSSILS EXTREMELY RARE
Reported Environment: SHALLOW WATER MARINE
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL	2752	-2547	82
COAL INTERVAL	2835	-2630	76
COAL INTERVAL	2929	-2724	43
COAL	3021	-2816	3

Tectonic Structure:
Remarks

STRATIGRAPHY: CAMBOON ANDESITE Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:TD Base Elevation: -3478* Thickness:)164
Geologic Description: WH-GN TUFF AND A REDDISH-BR, PINK, GN VOLC FLOW
Reported Environment: TERRESTRIAL
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED "CRACOW FM" IN COMPLETION REPORT

STRATIGRAPHY: UNDIFF JURASSIC-CRET Age: JURASSIC-CRET Interpretation Code:Y201
Basal Information: Depth to Base:221 Base Elevation: -16 Thickness: 216
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: REWAN GP Age: TRIASSIC Interpretation Code:Y202
Basal Information: Depth to Base:1010 Base Elevation: -805 Thickness: 789
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:1705 Base Elevation: -1500 Thickness: 695
Geologic Description:
Reported Environment: FLUVIAL, LACUSTRINE OR PALUDAL (P.126)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y204
Basal Information: Depth to Base:3450 Base Elevation: -3245 Thickness: 1745
Geologic Description:
Reported Environment: DEEP MARINE TO FRESHWATER (P.54)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BUFFEL FM Age: PERMIAN Interpretation Code:Y205
Basal Information: Depth to Base:3633 Base Elevation: -3428 Thickness: 183
Geologic Description:

Reported Environment: COLD SHALLOW MARINE (P.37)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: TIVERTON SUB-GP Age: PERMIAN Interpretation Code:Y206
Basal Information: Depth to Base:3633 Base Elevation: -3428 Thickness: 183
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks REPRESENTED BY BUFFEL FM

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y207
Basal Information: Depth to Base:3633 Base Elevation: -3428 Thickness: 1927
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS UNDIFFERENTIATED BLENHEIM SUB-GROUP AND BUFFEL FM OF TIVERTON SUB-GROUP

STRATIGRAPHY: CAMBOON ANDESITE Age: PERMIAN Interpretation Code:Y208
Basal Information: Depth to Base:TD Base Elevation: -3478* Thickness:)56
Geologic Description:
Reported Environment: TERRESTRIAL (P.36)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BARALABA CM Age: PERMIAN Interpretation Code:Y301
Basal Information: Depth to Base:1647 Base Elevation: -1442 Thickness: 1642
Geologic Description:
Reported Environment: FRESHWATER SWAMPS; PALUDAL, FLUVIAL (HOLLAN ET AL. 1972, P.14,29)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: GYRANDA FM Age: PERMIAN Interpretation Code:Y302
Basal Information: Depth to Base:2382 Base Elevation: -2177 Thickness: 735
Geologic Description:
Reported Environment: BRACKISH TO FRESH-WATER (P.659) FLUVIAL OR DELTAIC (HOLLAN ET AL. 1972, P.28)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y303
Basal Information: Depth to Base:2382 Base Elevation: -2177 Thickness: 2377
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BARALABA CM AND GYRANDA FM

STRATIGRAPHY: FLAT TOP FM Age: PERMIAN Interpretation Code:Y304
Basal Information: Depth to Base:2890 Base Elevation: -2685 Thickness: 508
Geologic Description:
Reported Environment: NEARSHORE MARINE (P.658)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BARFIELD FM Age: PERMIAN Interpretation Code:Y305
Basal Information: Depth to Base:3600 Base Elevation: -3395 Thickness: 710
Geologic Description:
Reported Environment: SHALLOW-WATER MARINE (P.657)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: OXTRACK FM Age: PERMIAN Interpretation Code:Y306
Basal Information: Depth to Base:3604 Base Elevation: -3399 Thickness: 4
Geologic Description:
Reported Environment: SHALLOW MARINE WITH FLUCTUATING ENERGY (P.656)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y307
Basal Information: Depth to Base:3604 Base Elevation: -3399 Thickness: 1957
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS FLAT TOP, BARFIELD, AND OXTRACK FMS

STRATIGRAPHY: BUFFEL FM Age: PERMIAN Interpretation Code:Y308
Basal Information: Depth to Base:3633 Base Elevation: -3428 Thickness: 29
Geologic Description:
Reported Environment: SHALLOW MARINE (MOLLAN ET AL. 1972, P.15)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: TIVERTON SUB-GP Age: PERMIAN Interpretation Code:Y309
Basal Information: Depth to Base:3633 Base Elevation: -3428 Thickness: 29
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BUFFEL FM

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y310
Basal Information: Depth to Base:3633 Base Elevation: -3428 Thickness: 1986
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness

Tectonic Structure:
Remarks FLAT TOP, BARFIELD, OXTRACK FM OF BLEMHEIM SUB-GR; BUFFEL FM OF TIVERTON SUB-GROUP

STRATIGRAPHY: CAMBOON ANDESITE Age: PERMIAN Interpretation Code:Y311
Basal Information: Depth to Base:TD Base Elevation: -3478' Thickness:)50
Geologic Description:
Reported Environment: TERRESTRIAL IN PART (P.653) SHALLOW MARINE (MOLLAN ET AL. 1972, P.15)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

Geologic Description: INTBDD DK GY CARB SLTST, LT GY-BR VF-VC POORLY SRTD FLD SUBLAB SST, DK GY-BLK CARB PY SH, COAL AND SILIC SID SED-PURE SID; GLOSSOPTERIS IN SLTST
Reported Environment: PALUDAL TO LACUSTRINE
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
COAL INT (1 M SEAMS) 1105 -564 30
Tectonic Structure:
Remarks PALYNOSTRATIGRAPHY - LOWER STAGE 4-UPPER STAGE 4A (L4-U4A) TO STAGE 3B-LOWER STAGE 4 (3B-L4) (MCKELLAR 1978 P.429)

STRATIGRAPHY: UNDIFF POST-PERMIAN Age: POST-PERMIAN Interpretation Code:Y201
Basal Information: Depth to Base:340 Base Elevation: +281 Thickness: 340
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA FM Age: PERMIAN Interpretation Code:Y202
Basal Information: Depth to Base:441 Base Elevation: +100 Thickness: 101
Geologic Description:
Reported Environment: DEPOSITION REPRESENTS WIDESPREAD PALUDAL AND LACUSTRINE CONDITIONS DURING A MAJOR REGRESSION IN LATE PERMIAN (P.125)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:441 Base Elevation: +100 Thickness: 101
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BANDANNA FM

STRATIGRAPHY: BLACK ALLEY SH Age: PERMIAN Interpretation Code:Y204
Basal Information: Depth to Base:597 Base Elevation: -56 Thickness: 156
Geologic Description:
Reported Environment: DEPOSITION REPRESENTS GRADATIONAL CHANGE FROM MARINE TO FRESHWATER CONDITIONS (P.125)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: PEAWADDY FM Age: PERMIAN Interpretation Code:Y205
Basal Information: Depth to Base:652 Base Elevation: -111 Thickness: 55
Geologic Description:
Reported Environment: SHALLOW MARINE
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness

Tectonic Structure:
Remarks

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y206
Basal Information: Depth to Base:652 Base Elevation: -111 Thickness: 211
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BLACK ALLEY SH AND PEAWADDY FM

STRATIGRAPHY: INGELARA FM Age: PERMIAN Interpretation Code:Y207
Basal Information: Depth to Base:831 Base Elevation: -290 Thickness: 179
Geologic Description:
Reported Environment: MODERATELY SHALLOW MARINE (P.123)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH AND THICKNESS UNCERTAIN; TIME CORR OF FREITAG FM MAY OCCUR AS NEARSHORE MARINE FACIES FROM 770-831 M

STRATIGRAPHY: ALDEBARAN SST Age: PERMIAN Interpretation Code:Y208
Basal Information: Depth to Base:924 Base Elevation: -383 Thickness: 93
Geologic Description:
Reported Environment: DEPOSITED DURING EXTENSIVE REGRESSION. LOWER BEDS MARINE IN PART
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH AND THICKNESS UNCERTAIN

STRATIGRAPHY: GEBBIE SUB-GP Age: PERMIAN Interpretation Code:Y209
Basal Information: Depth to Base:924 Base Elevation: -383 Thickness: 272
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH AND THICKNESS UNCERTAIN. CONTAINS INGELARA FM AND ALDEBARAN SST.

STRATIGRAPHY: CATTLE CREEK FM Age: PERMIAN Interpretation Code:Y210
Basal Information: Depth to Base:961 Base Elevation: -420 Thickness: 37
Geologic Description:
Reported Environment: MARINE
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks LOWER BOUNDARY IS A DISCONFORMITY (P.115);AREA ABOUT GSQ EDDYSTONE 1 MAYHAVE BEEN ELEVATED DURING PART OF EARLY PERMIAN

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y211
Basal Information: Depth to Base:961 Base Elevation: -420 Thickness: 37
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BLENHEIM, GEBBIE AND TIVERTON SUB-GROUPS AS ABOVE

STRATIGRAPHY: TIVERTON SUB-GP Age: PERMIAN Interpretation Code:Y212
Basal Information: Depth to Base:961 Base Elevation: -420 ± Thickness: 520
Geologic Description:

Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS CATTLE CREEK FM

STRATIGRAPHY: REIDS DOME BEDS Age: PERMIAN Interpretation Code:Y213
Basal Information: Depth to Base:TD Base Elevation: -679 S Thickness:)259
Geologic Description:
Reported Environment: DEPOSITED DURING INITIAL SUBSIDENCE OF DENISON TROUGH; UPPER REIDS DOME BEDS SEDS - DEPOSITION ON A DELTA PLAIN, UP-DIP FROM MARINE CATTLE CK FM
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks PALYNOLOGY SUGGESTS REIDS DOME BEDS IN THIS WELL DEPOSITED CONTEMP WITH LOWER CATTLE CK FM ELSEWHERE IN TROUGH (P.115)

Tectonic Structure:
Remarks PROJECT INTERPRETATION. VALUES USED FOR CONTOUR MAPPING.

STRATIGRAPHY: BANDANNA FM Age: PERMIAN Interpretation Code:X120
Basal Information: Depth to Base:586 Base Elevation: -123 Thickness: 73
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks PROJECT INTERPRETATION. VALUE USED FOR CONTOUR MAPPING.

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:X125
Basal Information: Depth to Base:586 Base Elevation: -123 Thickness: 73
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks PROJECT INTERPRETATION. VALUE USED FOR CONTOUR MAPPING.

STRATIGRAPHY: INGELARA FM Age: PERMIAN Interpretation Code:X130
Basal Information: Depth to Base:762 Base Elevation: -299 Thickness:
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks INTERVAL 762-810 M COULD BE ALDEBARAN SST EQUIVALENT.

STRATIGRAPHY: REIDS DOME BEDS Age: PERMIAN Interpretation Code:X140
Basal Information: Depth to Base:1221 Base Elevation: -758 Thickness: 459
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks PROJECT INTERPRETATION. VALUES USED FOR CONTOUR MAPPING.

STRATIGRAPHY: UNDIFF JURASSIC Age: JURASSIC Interpretation Code:Y101
Basal Information: Depth to Base:478 Base Elevation: -15 Thickness: 474
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code:Y102
Basal Information: Depth to Base:514 Base Elevation: -51 Thickness: 36
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA FM Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:586 Base Elevation: -123 Thickness: 72
Geologic Description: COAL, CLAYEY SST, MARLY SST, MDST; MINOR VOLCANIC ROCKS; PLANT FOSSILS
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
COAL INTERVAL 535 -72 21
Tectonic Structure:
Remarks CONSISTS OF UPPER PART OF "BANDANNA FM" OF COMPLETION REPORT

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:586 Base Elevation: -123 Thickness: 72
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BANDANNA FM

STRATIGRAPHY: BLACK ALLEY SH Age: PERMIAN Interpretation Code:Y105

Basal Information: Depth to Base:637 Base Elevation: -174 Thickness: 51
Geologic Description: SHALE, MINOR QZ SST, MUDSTONE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks INCLUDED IN "BANDANNA FM" IN COMPLETION REPORT

STRATIGRAPHY: PEAWADDY FM Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:761 Base Elevation: -298 Thickness: 124
Geologic Description: QZ SST, SHALE, MUDSTONE, LIMESTONE, PYRITIC SST
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF "DRY CREEK SHALE" AND "MANTUAN PRODUCTUS BED" OF COMPLETION REPORT

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:761 Base Elevation: -298 Thickness: 175
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLACK ALLEY SH AND PEAWADDY FM

STRATIGRAPHY: CATHERINE SST Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:810 Base Elevation: -347 Thickness: 49
Geologic Description: CONGLOMERATIC SST; MACROFOSSILS
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED "EARLY STORMS SST" IN COMPLETION REPORT

STRATIGRAPHY: GERBIE SUB-GP Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:810 Base Elevation: -347 Thickness: 49
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF CATHERINE SST

STRATIGRAPHY: CATTLE CREEK FM Age: PERMIAN Interpretation Code:Y110
Basal Information: Depth to Base:888 Base Elevation: -425 Thickness: 78
Geologic Description: COAL; CONGLOMERATIC SST, MUDSTONE, SHALE; PLANT FOSSILS, MACROFOSSILS
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL	814	-351	4
COAL	838	-375	3

Tectonic Structure:
Remarks CALLED "STAIRCASE SST" IN COMPLETION REPORT

STRATIGRAPHY: TIVERTON SUB-GP Age: PERMIAN Interpretation Code:Y111
Basal Information: Depth to Base:888 Base Elevation: -425 Thickness: 78
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF CATTLE CREEK FM

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y112
Basal Information: Depth to Base:888 Base Elevation: -425 Thickness: 302
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLENHEIM, GEBBIE AND TIVERTON SUB-GROUPS AS ABOVE

STRATIGRAPHY: REIDS DOME BEDS Age: PERMIAN Interpretation Code:Y113
Basal Information: Depth to Base:1220 Base Elevation: -757 Thickness: 332
Geologic Description: CONGLOMERATIC SST, QZ SST, SHALE, MUDSTONE, CONGLOMERATE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED "CONGLOMERATE 'A'" AND "CONGLOMERATE 'B'" IN COMPLETION REPORT

STRATIGRAPHY: TIMBURY HILLS FM Age: DEVONIAN Interpretation Code:Y114
Basal Information: Depth to Base:TD Base Elevation: -783 # Thickness: >26
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF POST-PERMIAN Age: POST-PERMIAN Interpretation Code:Y201
Basal Information: Depth to Base:513 Base Elevation: -50 Thickness: 509
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA FM Age: PERMIAN Interpretation Code:Y202
Basal Information: Depth to Base:549 Base Elevation: -86 Thickness: 36
Geologic Description:
Reported Environment: PALUDAL AND LACUSTRINE; MAJOR REGRESSION
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:549 Base Elevation: -86 Thickness: 36
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BANDANNA FM

STRATIGRAPHY: BLACK ALLEY SH Age: PERMIAN Interpretation Code:Y204
Basal Information: Depth to Base:638 Base Elevation: -175 Thickness: 89

Geologic Description:
Reported Environment: GRADATIONAL CHANGE FROM MARINE TO FRESHWATER CONDITIONS
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: PEAWADDY FM Age: PERMIAN Interpretation Code:Y205
Basal Information: Depth to Base:677 Base Elevation: -214 Thickness: 39
Geologic Description:
Reported Environment: SHALLOW MARINE WATER (P.123)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y206
Basal Information: Depth to Base:677 Base Elevation: -214 Thickness: 128
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLACK ALLEY SH AND PEAWADDY FM

STRATIGRAPHY: INGELARA FM Age: PERMIAN Interpretation Code:Y207
Basal Information: Depth to Base:761 Base Elevation: -298 Thickness: 84
Geologic Description:
Reported Environment: MODERATLEY SHALLOW MARINE (P.123)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN

STRATIGRAPHY: ALDEBARAN SST Age: PERMIAN Interpretation Code:Y208
Basal Information: Depth to Base:810 Base Elevation: -347 Thickness: 49
Geologic Description:
Reported Environment: DEPOSITED DURING EXTENSIVE REGRESSION; LOWER BEDS MARINE IN PART (P.115)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN

STRATIGRAPHY: GEBBIE SUB-GP Age: PERMIAN Interpretation Code:Y209
Basal Information: Depth to Base:810 Base Elevation: -347 Thickness: 133
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN. CONTAINS INGELARA FM AND ALDEBARAN SST

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y210
Basal Information: Depth to Base:810 Base Elevation: -347 Thickness: 261
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN. CONSISTS OF BLENHEIM AND GEBBIE SUB-GROUPS AS ABOVE

STRATIGRAPHY: REIDS DOME BEDS Age: PERMIAN Interpretation Code:Y211
Basal Information: Depth to Base:TD Base Elevation: -783 # Thickness: >436
Geologic Description:
Reported Environment: DEPOSITED DURING INTIAL SUBSIDENCE OF THE TROUGH (P.114)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONGLOMERATE MAY BE DUE TO THIS WELL'S PROXIMITY TO MERIVALE FAULT

STRATIGRAPHY: UNDIFF JURASSIC-CRET Age: JURASSIC-CRET Interpretation Code:Y361
Basal Information: Depth to Base:480 Base Elevation: -17 Thickness: 476
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: REWAN GP Age: TRIASSIC Interpretation Code:Y362
Basal Information: Depth to Base:514 Base Elevation: -51 Thickness: 34
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y303
Basal Information: Depth to Base:555 Base Elevation: -92 Thickness: 41
Geologic Description:
Reported Environment: FLUVIAL, LACUSTRINE OR PALUDAL (P.126)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: PEAWADDY FM Age: PERMIAN Interpretation Code:Y304
Basal Information: Depth to Base:811 Base Elevation: -348 Thickness: 256
Geologic Description:
Reported Environment: MARINE (P.123)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y305
Basal Information: Depth to Base:811 Base Elevation: -348 Thickness: 256
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF PEAWADDY FM

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y306
Basal Information: Depth to Base:811 Base Elevation: -348 Thickness: 256
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF PEAWADDY FM OF BLENHEIM SUB-GP

STRATIGRAPHY: REIDS DOKE BEDS Age: PERMIAN Interpretation Code:Y307
Basal Information: Depth to Base:1221 Base Elevation: -758 Thickness: 410
Geologic Description:
Reported Environment: DOMINANTLY NON-MARINE (P.32)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF PRE-PERMIAN Age: PRE-PERMIAN Interpretation Code:Y308
Basal Information: Depth to Base:TD Base Elevation: -783 ± Thickness:)25
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF JURASSIC Age: JURASSIC Interpretation Code:Y401
Basal Information: Depth to Base:491 Base Elevation: -28 Thickness: 407
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: MOOLAYEMBER FM Age: TRIASSIC Interpretation Code:Y402
Basal Information: Depth to Base:513 Base Elevation: -50 Thickness: 22
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA FM Age: PERMIAN Interpretation Code:Y403
Basal Information: Depth to Base:584 Base Elevation: -121 Thickness: 71
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks BANDANNA FM THINS BETWEEN THIS WELL AND AAO WOMBLEBANK 1

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y404
Basal Information: Depth to Base:584 Base Elevation: -121 Thickness: 71
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BANDANNA FM

STRATIGRAPHY: BLACK ALLEY SH Age: PERMIAN Interpretation Code:Y405
Basal Information: Depth to Base:635 Base Elevation: -172 Thickness: 51

Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: PEAWADDY FM Age: PERMIAN Interpretation Code:Y406
Basal Information: Depth to Base:697 Base Elevation: -234 Thickness: 62
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks PEAWADDY FM THINS BETWEEN THIS WELL AND AAO WOMBLEBANK 1 (P.157)

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y407
Basal Information: Depth to Base:697 Base Elevation: -234 Thickness: 113
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLACK ALLEY SH AND PEAWADDY FM

STRATIGRAPHY: INGELARA FM Age: PERMIAN Interpretation Code:Y408
Basal Information: Depth to Base:757 Base Elevation: -294 Thickness: 60
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks INGELARA FM THINS CONSIDERABLY BETWEEN AAO GLENTULLOCH 1 AND AAO WOMBLEBANK 1

STRATIGRAPHY: UNDIFF LOWER PERMIAN Age: PERMIAN Interpretation Code:Y409
Basal Information: Depth to Base:876 Base Elevation: -413 Thickness: 119
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks COAL SEAMS WITHIN THIS SEQUENCE (P.157).

STRATIGRAPHY: GEBBIE SUB-GP Age: PERMIAN Interpretation Code:Y410
Basal Information: Depth to Base:876 Base Elevation: -413 Thickness: 179
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF INGELARA FM AND UNDIFFERENTIATED EARLY PERMIAN

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y411
Basal Information: Depth to Base:876 Base Elevation: -413 Thickness: 292
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLENHEIM AND GEBBIE SUB-GROUPS AS ABOVE

STRATIGRAPHY: REIDS DOME BEDS Age: PERMIAN Interpretation Code:Y412
Basal Information: Depth to Base:1221 Base Elevation: -758 Thickness: 345
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: TIMBURY HILLS FM Age: DEVONIAN Interpretation Code:Y413
Basal Information: Depth to Base:TD Base Elevation: -783 ± Thickness:)26
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

Geologic Description:
Reported Environment: DEPOSITION REPRESENTS GRADATIONAL CHANGE FROM MARINE TO FRESHWATER CONDITIONS
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: PEAWADDY FM Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:1048 Base Elevation: -562 Thickness: 60
Geologic Description:
Reported Environment: MAINLY SHALLOW MARINE
Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:1048 Base Elevation: -562 Thickness: 149
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLACK ALLEY SH AND PEAWADDY FM

STRATIGRAPHY: INGELARA FM Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:1195 Base Elevation: -709 Thickness: 147
Geologic Description:
Reported Environment: MODERATELY SHALLOW MARINE
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN

STRATIGRAPHY: FREITAG FM Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:1237 Base Elevation: -751 Thickness: 42
Geologic Description:
Reported Environment: TRANSGRESSIVE; DEPOSITION REPRESENTS RETURN TO MARINE CONDITIONS
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN

STRATIGRAPHY: GEBBIE SUB-GP Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:1237 Base Elevation: -751 Thickness: 189
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN. CONSISTS OF INGELARA FM AND FREITAG FM

STRATIGRAPHY: CATTLE CREEK FM Age: PERMIAN Interpretation Code:Y110
Basal Information: Depth to Base:1305 Base Elevation: -819 Thickness: 68
Geologic Description:
Reported Environment: MAINLY MARINE; REPRESENTS MAJOR MARINE TRANSGRESSION
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: TIVERTON SUB-GP Age: PERMIAN Interpretation Code:Y111
Basal Information: Depth to Base:1305 Base Elevation: -819 Thickness: 68
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF CATTLE CREEK FM

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y112
Basal Information: Depth to Base:1305 Base Elevation: -819 Thickness: 406

Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLENHEIM, GEBBIE AND TIVERTON SUB-GROUPS AS ABOVE

STRATIGRAPHY: REIDS DOME BEDS Age: PERMIAN Interpretation Code:Y113
Basal Information: Depth to Base:TD Base Elevation: -11768 Thickness: 3351
Geologic Description:
Reported Environment: DEPOSITED DURING INITIAL SUBSIDENCE OF DENISON TROUGH
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: PEAWADDY FM Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:951 Base Elevation: -478 Thickness: 73
Geologic Description:
Reported Environment: SHALLOW MARINE WATER (P.123)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:951 Base Elevation: -478 Thickness: 186
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLACK ALLEY SH AND PEAWADDY FM

STRATIGRAPHY: INGELARA FM Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:1061 Base Elevation: -586 Thickness: 110
Geologic Description:
Reported Environment: MODERATELY SHALLOW MARINE (P.123)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN

STRATIGRAPHY: ALDEBARAN SST Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:1140 Base Elevation: -667 Thickness: 79
Geologic Description:
Reported Environment: DEPOSITED DURING REGRESSION; LOWER MARINE IN PART(P,115)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN

STRATIGRAPHY: GEBBIE SUB-GP Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:1140 Base Elevation: -667 Thickness: 189
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN. CONSISTS OF INGELARA FM AND ALDEBARAN SST

STRATIGRAPHY: CATTLE CREEK FM Age: PERMIAN Interpretation Code:Y110
Basal Information: Depth to Base:1163 Base Elevation: -690 Thickness: 23

Geologic Description:
Reported Environment: MAJOR MARINE TRANSGRESSION (P.115)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN

STRATIGRAPHY: TIVERTON SUB-GP Age: PERMIAN Interpretation Code:Y111
Basal Information: Depth to Base:1163 Base Elevation: -690 Thickness: 23
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN. CONSISTS OF CATTLE CREEK FM.

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y112
Basal Information: Depth to Base:1163 Base Elevation: -690 Thickness: 398
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLENHEIM, CEBBIE AND TIVERTON SUB-GROUPS AS ABOVE

STRATIGRAPHY: REIDS DOME BEDS Age: PERMIAN Interpretation Code:Y113
Basal Information: Depth to Base:TD Base Elevation: -917 * Thickness: 1227
Geologic Description:
Reported Environment: DEPOSITED DURING INITIAL SUBSIDENCE OF THE DENISON TROUGH (P.114)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks TOTAL DEPTH FROM SMITH ET AL. 1969

STRATIGRAPHY: UNDIFF JURASSIC Age: JURASSIC Interpretation Code:Y201

STRATIGRAPHY: HUTTON-PRECIPICE Age: JURASSIC Interpretation Code:Y104
Basal Information: Depth to Base:1736 Base Elevation: -1525 Thickness: 341
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED BUNDAMBA FM IN W.C.R. REPRESENTS UNDIFFERENTIATED HUTTON SST - PRECIPICE SST

STRATIGRAPHY: REWAN GP Age: TRIASSIC Interpretation Code:Y105
Basal Information: Depth to Base:1875 Base Elevation: -1664 Thickness: 139
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED CABAWIN FM IN W.C.R.

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:1909 Base Elevation: -1698 Thickness: 34
Geologic Description: BLK SHALY COAL, GN-WH SST WITH M-GRANULE QZ & TUFF GRAINS IN TFAC MATRIX, BR-GY CARBONACEOUS SHALE & THIN WH TUFF BEDS
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL	1882	-1671	3 CA
COAL	1907	-1696	4 CA

Tectonic Structure:
Remarks SPORES DATE THIS UNIT AS UPPER PERMIAN

STRATIGRAPHY: BACK (?)EK GP Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth, Base:2067 Base Elevation: -1856 Thickness: 159
Geologic Description: GY-BL , , BR FINELY CARB SL CALC & TFAC SH & SLTST, WH TUFF, LT GY-WH F-PBLY TFAC SST. SCATTERED SHELL FRAGS, CRINOID STEMS, PRODUCTID SPINES
Reported Environment: SHALLOW ..TER MARINE
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: KUTTUNG FM Age: CARB-PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:TD Base Elevation: -1966? Thickness: 110
Geologic Description: WEATHERED BRECCIATED AND FRACTURED BLUE GREY TO GREEN TUFF AND PURPLE TO GREEN ANDESITE FLOWS
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

Remarks

STRATIGRAPHY: EVERGREEN FM Age: JURASSIC Interpretation Code:Y105
Basal Information: Depth to Base:1645 Base Elevation: -1354 Thickness: 143
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: PRECIPICE SST Age: JURASSIC Interpretation Code:Y106
Basal Information: Depth to Base:1724 Base Elevation: -1433 Thickness: 79
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:1884 Base Elevation: -1593 Thickness: 160
Geologic Description: INTBDD WH TUFF, GY-BR TFAC CARB SH & SLTST, TAN-BLK CARB SH & SLTST, COAL SEAMS, & MINOR WH M-PEBBLY QZOSE TFAC SST
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL INTERVAL	1777	-1486	40 CA
COAL INTERVAL	1804	-1513	9 CA
1853		-1562	31 CA

Tectonic Structure:
Remarks DATED AS PERMIAN ON BASIS OF SPORES FROM 1792 M. GOOD HYDROCARBON SHOW.

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:2652 Base Elevation: -2361 Thickness: 768
Geologic Description: BR-GY CARB SH, GY TFAC SLTST, OCCAS FOS CALC SH & SLTST WITH INTBDD COAL SEAMS & THIN WH TUFF BEDS (UPPER PART) & MINOR CALC SST (LOWER PART)
Reported Environment: SHALLOW WATER MARINE
Interpreted Environment:

Geologic Features:	Feature	Depth	Elevation	Thickness
	COAL INTERVAL	2117	-1826	173

Tectonic Structure:
Remarks DATED AS PERMIAN ON BASIS OF MACROFOSSILS FROM 2446-2448 M

STRATIGRAPHY: KUTTUNG FM Age: CARB-PERMIAN Interpretation Code:Y189
Basal Information: Depth to Base:TD Base Elevation: -2406± Thickness: >45
Geologic Description: WEATHERED INTERBEDDED TUFFACEOUS SST, TUFF, RED-BROWN - PURPLISH PROPYLITIZED ANDESITE FLOWS & MINOR BLACK CARBONACEOUS SHALE
Reported Environment: CONTINENTAL; DERIVED FROM A VOLCANIC TERRANE
Interpreted Environment:

Geologic Features:	Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks SPORES FROM CARBONACEOUS MATERIAL IN CUTTINGS FROM 2673-2676 M WERE DATED AS LOWER PERMIAN

Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED BLYTHESDALE FM IN W.C.R. REPRESENTS UNDIFFERENTIATED BUNGIL FM TO GUBBERAMUNDA SST

STRATIGRAPHY: WALLOON GM Age: JURASSIC Interpretation Code:X104
Basal Information: Depth to Base:1324 Base Elevation: -1145 Thickness: 100
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: HUTTON SST Age: JURASSIC Interpretation Code:X105
Basal Information: Depth to Base:1436 Base Elevation: -1257 Thickness: 112
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness

Tectonic Structure:

Remarks

STRATIGRAPHY: EVERGREEN FM Age: JURASSIC Interpretation Code:X106

Basal Information: Depth to Base:1478 Base Elevation: -1299 Thickness: 42

Geologic Description:

Reported Environment:

Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness

Tectonic Structure:

Remarks

STRATIGRAPHY: WANGOAN FM Age: TRIASSIC Interpretation Code:X107

Basal Information: Depth to Base:1547 Base Elevation: -1368 Thickness: 69

Geologic Description:

Reported Environment:

Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness

Tectonic Structure:

Remarks CONSISTS OF WANGOAN, HOOLAYENBER AND CLEMATIS FORMATIONS OF W.C.R.

STRATIGRAPHY: KUTTUNG FM Age: CARB-PERMIAN Interpretation Code:X108

Basal Information: Depth to Base:TD Base Elevation: -1388? Thickness: 120

Geologic Description: LIGHT GREY TO GREENISH, BROWN, DENSE TUFF WITH WELL-FORMED CRYSTAL INCLUSIONS COMMON TO ABUNDANT

Reported Environment:

Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness

Tectonic Structure:

Remarks

STRATIGRAPHY: ROLLING DOWNS GP Age: CRETACEOUS Interpretation Code:Y101

Basal Information: Depth to Base:466 Base Elevation: -287 Thickness: 462

Geologic Description:

Reported Environment:

Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness

Tectonic Structure:

Remarks

STRATIGRAPHY: BUNGIL FM Age: CRETACEOUS Interpretation Code:Y102

Basal Information: Depth to Base:735 Base Elevation: -556 Thickness: 269

Geologic Description:

Reported Environment:

Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness

Tectonic Structure:

Remarks

STRATIGRAPHY: HOOGH SST Age: CRETACEOUS Interpretation Code:Y103

Basal Information: Depth to Base:783 Base Elevation: -604 Thickness: 48

Geologic Description:

Reported Environment:

Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness

Tectonic Structure:

Remarks

STRATIGRAPHY: ORALLO FM Age: JURASSIC Interpretation Code:Y104

Basal Information: Depth to Base:956 Base Elevation: -777 Thickness: 173

Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: GUBBERAMUNDA SST Age: JURASSIC Interpretation Code:Y105
Basal Information: Depth to Base:997 Base Elevation: -818 Thickness: 41
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: PILLIGA SANDSTONE Age: JURASSIC Interpretation Code:Y106
Basal Information: Depth to Base:1225 Base Elevation: -1046 Thickness: 228
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: WALLOON CM Age: JURASSIC Interpretation Code:Y107
Basal Information: Depth to Base:1320 Base Elevation: -1141 Thickness: 95
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: HUTTON SST Age: JURASSIC Interpretation Code:Y108

Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA FM Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:503 Base Elevation: +25 Thickness: 78
Geologic Description: INTBDD FINE SST, SILTSTONE AND MINOR COAL
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL	427	+101	2.5
COAL INTERVAL	457	+71	25
COAL	473	+55	3.8

Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN. CONSISTS OF UPPER PART OF 'BANDANNA FM' OF COMPLETION REPORT

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:503 Base Elevation: +25 Thickness: 78
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BANDANNA FM. DEPTH TO BASE UNCERTAIN

STRATIGRAPHY: BLACK ALLEY SH Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:594 Base Elevation: -66 Thickness: 91
Geologic Description: DK GREY-BLACK CARBONACEOUS SHALE WITH MINOR INTERBEDS OF V SOFT WHITE AND PINK ?TUFFACEOUS SH
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF LOWER PART OF "BANDANNA FM" OF COMPLETION REPORT

STRATIGRAPHY: PEAWADDY FM Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:778 Base Elevation: -250 Thickness: 184
Geologic Description: MUDSTONE, SHALE, LIMESTONE AND MINOR COAL AND SANDSTONE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks EQUIVALENT TO "MANTUAN PRODUCTUS BED" AND "DRY CREEK SH" OF COMPLETION REPORT

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:778 Base Elevation: -250 Thickness: 275
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLACK ALLEY SH AND PEAWADDY FM

STRATIGRAPHY: CATHERINE SST Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:799 Base Elevation: -271 Thickness: 21
Geologic Description: CONGLOMERATIC SST WITH PEBBLES OF QZ, QZITE, HARD SILTSTONE AND MUDSTONE AND SANDY ARGILLACEOUS PYRITIC SILTSTONE MATRIX
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED "EARLY STORMS SST" IN COMPLETION REPORT

STRATIGRAPHY: UNIT 5 Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:840 Base Elevation: -312 Thickness: 41
Geologic Description: GREY SANDY ARG SLTST WITH MINOR SST AND SHALE; MARINE MACROFOSSILS
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNIT 6 Age: PERMIAN Interpretation Code:Y110
Basal Information: Depth to Base:930 Base Elevation: -402 Thickness: 90
Geologic Description: WH M-C WELL SRTD MASSIVE QZOSE (WITH MINOR FELDSPAR AND A FEW LI AND CARB GRAINS) SST WITH WH ARG MATRIX; PROBABLY BEEN REWORKED
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNIT 7 Age: PERMIAN Interpretation Code:Y111
Basal Information: Depth to Base:1090 Base Elevation: -562 Thickness: 160
Geologic Description: SHALE, MUDSTONE AND SANDY MUDSTONE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNIT 8 Age: PERMIAN Interpretation Code:Y112
Basal Information: Depth to Base:TD Base Elevation: -3332# Thickness: >2770
Geologic Description: BR-GY M-C POORLY BDD OR MASSIVE QZOSE LI FLD MICAC SL CARB SST, BR-GY ARG MICAC CARB SLTST, COAL, DK GY-DK BR CARB SH; PY AT BASE; PLT FRAGS
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
COAL 1121 -593 31
Tectonic Structure:
Remarks COAL SEAMS THROUGHOUT

STRATIGRAPHY: UNDIFF POST-PERMIAN Age: POST-PERMIAN Interpretation Code:Y201
Basal Information: Depth to Base:425 Base Elevation: +103 Thickness: 421
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA FM Age: PERMIAN Interpretation Code:Y202

Basal Information: Depth to Base:472 Base Elevation: +56 Thickness: 47
Geologic Description:
Reported Environment: PALUDAL AND LACUSTRINE CONDITIONS DURING MAJOR REGRESSION (P.125)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:472 Base Elevation: +56 Thickness: 47
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BANDANNA FM

STRATIGRAPHY: BLACK ALLEY SH Age: PERMIAN Interpretation Code:Y204
Basal Information: Depth to Base:594 Base Elevation: -66 Thickness: 122
Geologic Description:
Reported Environment: GRADATIONAL CHANGE FROM MARINE TO FRESHWATER CONDITIONS (P.125)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: PEAWADDY FM Age: PERMIAN Interpretation Code:Y205
Basal Information: Depth to Base:656 Base Elevation: -128 Thickness: 62
Geologic Description:
Reported Environment: SHALLOW MARINE WATER (P.123)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y206
Basal Information: Depth to Base:656 Base Elevation: -128 Thickness: 184
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLACK ALLEY SH AND PEAWADDY FM

STRATIGRAPHY: INGELARA FM Age: PERMIAN Interpretation Code:Y207
Basal Information: Depth to Base:778 Base Elevation: -250 Thickness: 122
Geologic Description:
Reported Environment: MODERATELY SHALLOW MARINE (P.123)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN

STRATIGRAPHY: ALDEBARAN SST Age: PERMIAN Interpretation Code:Y208
Basal Information: Depth to Base:1020 Base Elevation: -492 Thickness: 242
Geologic Description:
Reported Environment: DEPOSITED DURING EXTENSIVE REGRESSION; LOWER BEDS MARINE IN PART (P.115)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:

Remarks DEPTH TO BASE UNCERTAIN

STRATIGRAPHY: GEBBIE SUB-GP Age: PERMIAN Interpretation Code:Y209
Basal Information: Depth to Base:1020 Base Elevation: -492 Thickness: 364
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN. CONSISTS OF INGELARA FM AND ALDEBARAN SST

STRATIGRAPHY: CATTLE CREEK FM Age: PERMIAN Interpretation Code:Y210
Basal Information: Depth to Base:1090 Base Elevation: -562 Thickness: 70
Geologic Description:
Reported Environment: MAJOR MARINE TRANSGRESSION (P.115)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN

STRATIGRAPHY: TIVERTON SUB-GP Age: PERMIAN Interpretation Code:Y211
Basal Information: Depth to Base:1090 Base Elevation: -562 Thickness: 70
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN. CONSISTS OF CATTLE CREEK FM

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y212
Basal Information: Depth to Base:1090 Base Elevation: -562 Thickness: 618
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN. CONSISTS OF BLENHEIM, GEBBIE AND TIVERTON SUB-GROUPS AS ABOVE

STRATIGRAPHY: REIDS DOME BEDS Age: PERMIAN Interpretation Code:Y213
Basal Information: Depth to Base:TD Base Elevation: -3332# Thickness: >2770
Geologic Description:
Reported Environment: DEPOSITED DURING INITIAL SUBSIDENCE OF THE DENISON TROUGH (P.114)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF POST-TRIASSIC Age: POST-TRIASSIC Interpretation Code:Y301
Basal Information: Depth to Base:232 Base Elevation: +296 Thickness: 228
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: REWAN GP Age: TRIASSIC Interpretation Code:Y302
Basal Information: Depth to Base:425 Base Elevation: +103 Thickness: 193
Geologic Description:
Reported Environment:

Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y303
Basal Information: Depth to Base:524 Base Elevation: +4 Thickness: 99
Geologic Description:
Reported Environment: FLUVIAL, LACUSTRINE OR PALUDAL (P.126)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACK ALLEY SH Age: PERMIAN Interpretation Code:Y304
Basal Information: Depth to Base:594 Base Elevation: -66 Thickness: 70
Geologic Description:
Reported Environment: TRANSITION FROM MARINE TO FRESHWATER CONDITIONS, PROBABLY DEPOSITED IN COLD STAGNAT BRACKISH WATER (P.55)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: PEAWADDY FM Age: PERMIAN Interpretation Code:Y305
Basal Information: Depth to Base:799 Base Elevation: -271 Thickness: 265
Geologic Description:
Reported Environment: MARINE (P.123)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y306
Basal Information: Depth to Base:799 Base Elevation: -271 Thickness: 275
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLACK ALLEY SH AND PEAWADDY FM

STRATIGRAPHY: ALDEBARAN SST Age: PERMIAN Interpretation Code:Y307
Basal Information: Depth to Base:1021 Base Elevation: -493 Thickness: 222
Geologic Description:
Reported Environment: MAINLY DELTAIC (P.119)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: DEBBIE SUB-GP Age: PERMIAN Interpretation Code:Y308
Basal Information: Depth to Base:1021 Base Elevation: -493 Thickness: 222
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF ALDEBARAN SST

STRATIGRAPHY: CATTLE CREEK FM Age: PERMIAN Interpretation Code:Y309

Basal Information: Depth to Base:1090 Base Elevation: -562 Thickness: 69
Geologic Description:
Reported Environment: MARINE (P.118)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: TIVERTON SUB-GP Age: PERMIAN Interpretation Code:Y310
Basal Information: Depth to Base:1090 Base Elevation: -562 Thickness: 69
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF CATTLE CREEK FM

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y311
Basal Information: Depth to Base:1090 Base Elevation: -562 Thickness: 566
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLENHEIM, GEBBIE AND TIVERTON SUB-GROUPS AS ABOVE

STRATIGRAPHY: REIDS DOME BEDS Age: PERMIAN Interpretation Code:Y312
Basal Information: Depth to Base:TD Base Elevation: -3332± Thickness: >2770
Geologic Description:
Reported Environment: DOMINANTLY NON-MARINE (P.32)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF JURASSIC Age: JURASSIC Interpretation Code:Y401
Basal Information: Depth to Base:232 Base Elevation: +296 Thickness: 228
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: REWAN GP Age: TRIASSIC Interpretation Code:Y402

Basal Information: Depth to Base:1079 Base Elevation: -555 Thickness: 16
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF POST-PERMIAN Age: POST-PERMIAN Interpretation Code:Y101
Basal Information: Depth to Base:1063 Base Elevation: -539 Thickness: 1058

Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACK ALLEY SH Age: PERMIAN Interpretation Code:Y102
Basal Information: Depth to Base:1125 Base Elevation: -601 Thickness: 62
Geologic Description:
Reported Environment: GRADATIONAL CHANGE FROM MARINE TO FRESHWATER (P.125)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: PEAWADDY FM Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:1155 Base Elevation: -631 Thickness: 30
Geologic Description:
Reported Environment: SHALLOW MARINE WATER (P.123)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:1155 Base Elevation: -631 Thickness: 92
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLACK ALLEY SH AND PEAWADDY FM

STRATIGRAPHY: INGELARA FM Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:1228 Base Elevation: -704 Thickness: 73
Geologic Description:
Reported Environment: MODERATELY SHALLOW MARINE (P.123)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DEPTH TO BASE UNCERTAIN

STRATIGRAPHY: ALDEBARAN SST Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:1265 Base Elevation: -741 Thickness: 37
Geologic Description:
Reported Environment: DEPOSITED DURING EXTENSIVE REGRESSION; LOWER BEDS MARINE IN PART (P.115)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: GEBBIE SUB-GP Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:1265 Base Elevation: -741 Thickness: 110
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF INGELARA FM AND ALDEBARAN SST

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:1265 Base Elevation: -741 Thickness: 292
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLENHEIM AND GEBBIE SUB-GROUPS AS ABOVE

STRATIGRAPHY: BASEMENT Age: PRE-PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:TD Base Elevation: -825 * Thickness: >84
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF JURASSIC Age: JURASSIC Interpretation Code:Y201
Basal Information: Depth to Base:708 Base Elevation: -184 Thickness: 703
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code:Y202
Basal Information: Depth to Base:1064 Base Elevation: -540 Thickness: 356
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA FM Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:1079 Base Elevation: -555 Thickness: 15
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks BANDANNA FM THICKENS BETWEEN THIS WELL AND AAO GLENTULLOCH 1 (P.157)

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y204
Basal Information: Depth to Base:1079 Base Elevation: -555 Thickness: 15
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BANDANNA FM

STRATIGRAPHY: BLACK ALLEY SH Age: PERMIAN Interpretation Code:Y205
Basal Information: Depth to Base:1128 Base Elevation: -604 Thickness: 49
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: PEAWADDY FM Age: PERMIAN Interpretation Code:Y206
Basal Information: Depth to Base:1156 Base Elevation: -632 Thickness: 28
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks PEAWADDY FM THICKENS BETWEEN THIS WELL AND AAO GLENTULLOCH 1 (P.157)

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y207
Basal Information: Depth to Base:1156 Base Elevation: -632 Thickness: 77
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLACK ALLEY SH AND PEAWADDY FM

STRATIGRAPHY: INGELARA FM Age: PERMIAN Interpretation Code:Y205
Basal Information: Depth to Base:1169 Base Elevation: -645 Thickness: 13
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks INGELARA FM THICKENS CONSIDERABLY BETWEEN AAO WONGLEBANK 1 AND AAO GLENTULLOCH 1 (P.157)

STRATIGRAPHY: UNDIFF LOWER PERMIAN Age: PERMIAN Interpretation Code:Y209
Basal Information: Depth to Base:1268 Base Elevation: -744 Thickness: 99
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: GEBBIE SUB-GP Age: PERMIAN Interpretation Code:Y210
Basal Information: Depth to Base:1268 Base Elevation: -744 Thickness: 112
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF INGELARA FM AND UNDIFFERENTIATED EARLY PERMIAN

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y211
Basal Information: Depth to Base:1268 Base Elevation: -744 Thickness: 189
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLENHEIM AND GEBBIE SUB-GROUPS AS ABOVE

STRATIGRAPHY: TIMBURY HILLS FM Age: DEVONIAN Interpretation Code:Y212
Basal Information: Depth to Base:TD Base Elevation: -825 ± Thickness: >81

Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: CLEMATIS GP Age: TRIASSIC Interpretation Code:Y301
Basal Information: Depth to Base:1061 Base Elevation: -537 Thickness: 1056
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks TR3 MICROFAUNA AT 716, 792, 867, 953, 985, 1015 M DEPTHS

STRATIGRAPHY: BLACK ALLEY SH Age: PERMIAN Interpretation Code:Y302
Basal Information: Depth to Base:1125 Base Elevation: -601 Thickness: 64
Geologic Description: UPPER 18 M OF SHALE AND SILTSTONE. LOWER PART TUFF-BEARING. LIMESTONE IN BOTTOM 6 M.
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks PD3 TO P4 MICROFAUNA AT 1067, 1082, AND 1113 M DEPTH

STRATIGRAPHY: MANTUAN PRODUCTUS BD Age: PERMIAN Interpretation Code:Y303
Basal Information: Depth to Base:1136 Base Elevation: -612 Thickness: 11
Geologic Description: 3 LIMESTONE BEDS BETWEEN 1119 AND 1137 M DEPTH. TUFFS IN LOWER 5 M.
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks P3C ASSEMBLAGE AT 1128 M DEPTH.

STRATIGRAPHY: PEAWADDY FM Age: PERMIAN Interpretation Code:Y304
Basal Information: Depth to Base:1136 Base Elevation: -612 Thickness: 11
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks INTERVAL ASCRIBED TO MANTUAN PRODUCTUS BED IN WELL REPORT

STRATIGRAPHY: UNDIFF BACK CREEK GP Age: PERMIAN Interpretation Code:Y305
Basal Information: Depth to Base:1169 Base Elevation: -645 Thickness: 33
Geologic Description: LIMESTONE AT TOP. INTERVAL 1119-1137 M CONTAINS TUFFS AND SANDSTONE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
TUFFS THROUGHOUT
Tectonic Structure:
Remarks P3B ASSEMBLAGE AT 1143 M DEPTH

STRATIGRAPHY: ALDERAAN SST Age: PERMIAN Interpretation Code:Y306
Basal Information: Depth to Base:1266 Base Elevation: -742 Thickness: 97
Geologic Description: SANDSTONE AND SHALE, MINOR LIMESTONE AND TUFF. BELOW LST AT TOP,SEQUENCEIS >50% SH
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
LIMESTONE 1176 -652 6

	TUFF INTERVAL	1177	-653	B
	INFERRED COAL (TOP)	1201	-677	
	MINOR TUFFS (TOP)	1219	-695	

Tectonic Structure:
Remarks P3B ASSEMBLAGES AT 1173 AND 1189 M DEPTH; P3A AT 1234, 1250, AND 1265 M.

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y387
Basal Information: Depth to Base:1266 Base Elevation: -742 Thickness: 205
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks INCLUDES BLACK ALLEY SH, MANTUAN PRODUCTUS BD (PEAWADDY), UNDIFFERENTIATED BACK CREEK, AND ALDEBARAN SS

STRATIGRAPHY: TIMBURY HILLS FM Age: DEVONIAN Interpretation Code:Y388
Basal Information: Depth to Base:TD Base Elevation: -825 # Thickness:)83

STRATIGRAPHY: WATERMARK FM Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:454 Base Elevation: -154 Thickness: 223 #
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
INTRUSION	373	-73	63

Tectonic Structure:
Remarks # INCLUDES 63 METRE INTRUSION WITH BASE AT 373 METRES

STRATIGRAPHY: PORCUPINE FM Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:515 Base Elevation: -215 Thickness: 61
Geologic Description: SILTY SANDSTONE WITH ABUNDANT DROPPED PEBBLES
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: MAULES CREEK FM Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:584 Base Elevation: -284 Thickness: 69
Geologic Description: CONGLOMERATE,SANDSTONE AND COAL
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL, UNNAMED SM (5)	517.3	-217.3	2.2
COAL, UNNAMED SM (6)	519.5	-219.5	1.6
COAL, UNNAMED SM (8)	581.1	-281.1	2.9

Tectonic Structure:
Remarks

STRATIGRAPHY: LEARD FM Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:594.5 Base Elevation: -294.5 Thickness: 10.5
Geologic Description: PELLETOIDAL CLAYSTONE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BOGGABRI VOLCANICS Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:TD Base Elevation: -300.2 Thickness: >5.7
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks * NOT PENETRATED T.DEPTH 600.2 METRES

Geologic Description: BASALT GRAVELS AND ALLUVIUM
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNNAMED Age: JURASSIC Interpretation Code: Y102
Basal Information: Depth to Base: 92.0 Base Elevation: 506.0 Thickness: 71.0
Geologic Description: ROOT PENETRATED CLAYSTONE, THIN SANDSTONE, THIN COAL
Reported Environment:
Interpreted Environment: LEVEE BACKSWAMP
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks: AGE UNCERTAIN. POSSIBLY EQUIVALENT TO DRALLO FM.

STRATIGRAPHY: PILLIGA SANDSTONE Age: JURASSIC Interpretation Code: Y103
Basal Information: Depth to Base: 291.0 Base Elevation: 307.0 Thickness: 119.0
Geologic Description: QUARTZOSE SANDSTONE, MINOR SILTSTONE AND MUDSTONE.
Reported Environment: FLUVIAL
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks: MAJOR AQUIFER. SURAT BASIN SEQUENCE.

STRATIGRAPHY: DIGILAH FM Age: JURASSIC Interpretation Code: Y104
Basal Information: Depth to Base: 311 Base Elevation: 287 Thickness: 20
Geologic Description: MUDSTONE, ROOT PENETRATED AND MINOR SANDSTONE
Reported Environment:
Interpreted Environment: LEVEE, BACKSWAMP
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks: THIS FORMATION AND UNDERLYING UKEBUNG FM EQUIVALENT TO PURLAWAUGH FM. SURAT BASIN UNIT

STRATIGRAPHY: UKEBUNG FM Age: JURASSIC Interpretation Code: Y105
Basal Information: Depth to Base: 351.0 Base Elevation: 247.0 Thickness: 40.0
Geologic Description: PELLETOIDAL CLAYSTONE, MINOR SANDSTONE AND COAL
Reported Environment:
Interpreted Environment: LOWER DELTAIC
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks: DIGILAH FM AND UKEBUNG FM EQUIVALENT TO PURLAWAUGH FM SURAT BASIN UNIT. STRATIGRAPHY UNCERTAIN

STRATIGRAPHY: WALLINGARAH FM Age: TRIASSIC Interpretation Code: Y106
Basal Information: Depth to Base: 384.4 Base Elevation: 214.0 Thickness: 33.7

Geologic Description: SILTSTONE, SILTSTONE-SANDSTONE LAMINITE AND SANDSTONE.
Reported Environment: SAYFILL TO TIDAL-INTERTIDAL MUDFLAT
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks EQUIVALENT TO DIGBY FM

STRATIGRAPHY: WOLLAR SST Age: PERMO-TRIASSICInterpretation Code:Y107
Basal Information: Depth to Base:557.0 Base Elevation: 41.0 Thickness: 172.6
Geologic Description: SANDSTONE MINOR SILTSTONE, PEBBLY. POLYMICTIC CONGLOMERATE IN BASAL UNIT
Reported Environment: FANGLOMERATE AND FLUVIAL CONGLOMERATE AND SANSTONE
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks EQUIVALENT TO DIGBY FM

STRATIGRAPHY: MIDDLE RIVER COAL MB Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:563.4 Base Elevation: 34.6 Thickness: 6.9
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks WITHIN ILLAWARRA CM

STRATIGRAPHY: THE GAP SST Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:568.8 Base Elevation: 29.2 Thickness: 5.4
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks WITHIN ILLAWARRA CM

STRATIGRAPHY: ANGUS PLACE SST Age: PERMIAN Interpretation Code:Y110
Basal Information: Depth to Base:608.5 Base Elevation: -10.5 Thickness: 1 6
Geologic Description:

STRATIGRAPHY: ALLUVIUM Age: RECENT Interpretation Code:Y101
Basal Information: Depth to Base:9.0 Base Elevation: 643.0 Thickness: 9.0
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: PILLIGA SANDSTONE Age: JURASSIC Interpretation Code:Y102
Basal Information: Depth to Base:65.7 Base Elevation: 586.3 Thickness: 56.0
Geologic Description: PEBBLY QUARTZOSE SANDSTONE AND CONGLOMERATE
Reported Environment: FLUVIAL
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks: MAJOR AQUIFER. SURAT BASIN UNIT.

STRATIGRAPHY: PURLAWAUGH FM Age: JURASSIC Interpretation Code:Y103
Basal Information: Depth to Base:133.8 Base Elevation: 518.2 Thickness: 68.1
Geologic Description: LITHIC SANDSTONE SILTSTONE CLAYSTONE MINOR CONGLOMERATE AND OIL SHALE
Reported Environment:
Interpreted Environment: LOWER DELTAIC TO LAGOONAL
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks: PROBABLY CORRELATES WITH WALLOON CM. SURAT BASIN UNIT

STRATIGRAPHY: WALLINGARAH FM Age: TRIASSIC Interpretation Code:Y104
Basal Information: Depth to Base:263.2 Base Elevation: 388.8 Thickness: 129.4
Geologic Description: QUARTZOSE SANDSTONE LAMINATED WITH SILTSTONES, CLAYSTONES. VERY BIOTURB.
Reported Environment: BAY TO INTERTIDAL MUDFLATS
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
MASSIVE BIOTURBATION	169.7	482.3	2.3

Tectonic Structure:
Remarks: EQUIVALENT TO NAPPERBY FM

STRATIGRAPHY: NARRABEEN GP Age: PERMO-TRIASSIC Interpretation Code:Y105
Basal Information: Depth to Base:387.2 Base Elevation: 264.8 Thickness: 124.0
Geologic Description: SANDSTONE, POLYMICTIC PEBBLY CONGLOMERATE, MINOR PELLETOIDAL CLAYSTONE
Reported Environment: FANGLOMERATES AND FLUVIAL CONGLOMERATES OVERLAIN BY FLUVIAL SANDSTONE
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
DIGBY CGL FACIES	387.2	264.8	24.4

Tectonic Structure:
Remarks

STRATIGRAPHY: MIDDLE RIVER COAL MB Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:403.3 Base Elevation: 249.0 Thickness: 12.7
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks WITHIN ILLAWARRA CM.

STRATIGRAPHY: BAAL BONE FM Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:427.6 Base Elevation: 224.4 Thickness: 1.8
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks WITHIN ILLAWARRA CM.

STRATIGRAPHY: LITHGOW COAL Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:468.4 Base Elevation: 183.6 Thickness: 2.7
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks WITHIN ILLAWARRA CM.

STRATIGRAPHY: MARRANGAROO CGL Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:473.5 Base Elevation: 178.5 Thickness: 5.1
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks WITHIN ILLAWARRA CM.

STRATIGRAPHY: NILE SUB-GP Age: PERMIAN Interpretation Code:Y110
Basal Information: Depth to Base:478.0 Base Elevation: 174.0 Thickness: 4.5
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks WITHIN ILLAWARRA CM.

STRATIGRAPHY: ILLAWARRA CM Age: PERMIAN Interpretation Code:Y111
Basal Information: Depth to Base:478.0 Base Elevation: 174.0 Thickness: 90.8
Geologic Description:
Reported Environment: DELTA PLAIN
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks EQUIVALENT TO BLACK JACK FM. CONTAINS MIDDLE RIVER MB, BAAL BONE FM, LITL, MARRANGAROO CGL, NILE SUB-GP

STRATIGRAPHY: ARKARULA SST Age: PERMIAN Interpretation Code:Y112
Basal Information: Depth to Base:483.5 Base Elevation: 168.5 Thickness: 5.45
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness

Tectonic Structure:
Remarks STRATIGRAPHY UNCERTAIN

STRATIGRAPHY: BERRY FM Age: PERMIAN Interpretation Code:Y113
Basal Information: Depth to Base:TD Base Elevation: 149.3ft Thickness:)19.2
Geologic Description: SILTSTONE, CLAYSTONE, MINOR SANDSTONE
Reported Environment: MARINE
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks INTERSECTED BUT NOT FULLY PENETRATED. EQUIVALENT TO WATERMARK FM.

STRATIGRAPHY: WITTINGHAM CM Age: PERMIAN Interpretation Code:Y101
Basal Information: Depth to Base:382 Base Elevation: -267 Thickness: 382
Geologic Description: CYCLIC SEDIMENTATION OF GREYWACKE SS AND COAL WITH LESSER SLTST, CLST, AND SH. LOWER 23 M (BAYSWATER BD) TRANSITIONAL WITH MULBRING SLTST.
Reported Environment: UPPER PART TERRESTRIAL, LOWER PART (BAYSWATER) BRACKISH.
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL	30	+85	3
COAL	53	+62	6
COAL, ARTIES SM	253	-138	7
COAL, U. LIDDEL SM	268	-153	1

Tectonic Structure:
Remarks EQUIVALENT TO TOMAGO CM AND BAYSWATER BED IN REFERENCE REPORT. L. LIDDEL SM 4M THICK 289M BASE; BARRETT SM 1M, 302M.

STRATIGRAPHY: SINGLETON SUPER-GP Age: PERMIAN Interpretation Code:Y102
Basal Information: Depth to Base:382 Base Elevation: -267 Thickness: 382
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks CONTAINS WITTINGHAM CM (TOMAGO CM AND BAYSWATER BED OF REFERENCE REPORT)

STRATIGRAPHY: MULBRING SLTST Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:TD Base Elevation: -342 # Thickness: >75
Geologic Description: BLACK CLAYSTONE GRADING UPWARDS INTO BLACK SHALE AND GREY-BLACK CLAYSTONE. PYRITIC, SILICEOUS, MARINE MICROFOSSILS. TRAC IN BOTTOM
Reported Environment: MARINE
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks

STRATIGRAPHY: MAITLAND GP Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:TD Base Elevation: -342 # Thickness: >75
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks CONTAINS MULBRING SLTST

STRATIGRAPHY: BRANXTON FM Age: PERMIAN Interpretation Code:Y101
Basal Information: Depth to Base:435 Base Elevation: -359 Thickness: 432
Geologic Description: INTBDD LT-M GREY SLTST, GL-LI SS, AND SH; CGL; MINOR COAL. SCATTERED PBLS, RARE PYRITIZED LIGNITE FRAG, THIN COAL BANDS, MARINE FOSSILS
Reported Environment: MARINE WITH TERRESTRIAL TONGUES
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL	404	-328	1
COAL	426	-350	1

Tectonic Structure:
Remarks ELDERSLIE FM IN COMPLETION REPORT

STRATIGRAPHY: MAITLAND GP Age: PERMIAN Interpretation Code:Y102
Basal Information: Depth to Base:435 Base Elevation: -359 Thickness: 432
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks CONTAINS BRANXTON FM.

STRATIGRAPHY: GRETA CM Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:490 Base Elevation: -414 Thickness: 55
Geologic Description: POORLY SORTED LT GY SS GRADING FROM F SAND TO CGL. LITHIC GRAINS AND CHERT PBLS COMMON. CARB AND NON-CARB SH, COAL SMS
Reported Environment: TERRESTRIAL PARALIC FACIES
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL	438	-362	3.4
COAL	446	-370	3
COAL	461	-385	2
COAL	467	-391	2

Tectonic Structure:
Remarks

STRATIGRAPHY: FARLEY FM Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:686 Base Elevation: -610 Thickness: 196
Geologic Description: GREY, MOSTLY M GRAINED QZ-LI SS BECOMING CGL IN PARTS AND ASSOCIATED GY-BLK SLTS AND SH. ARGIL MATRIX, VARIABLY CARB, MICAC, FORMS PRESENT.
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks

STRATIGRAPHY: FARLEY FM Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:688 Base Elevation: -610 Thickness: 180
Geologic Description: VF GRAINED VOLC-LITHIC-FLED GWKE, LAM AND LENSES OF SIDERITIC-PY SLTST AND SANDY-PURE SID ROCK. CARB, FINE PY, FORAMS, PLANT FRAG(IN SID LENSES)
Reported Environment: INTERMITTENTLY QUIET TO AGITATED MARINE WATERS
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks EQUIVALENT TO BMR UNIT B5

STRATIGRAPHY: RUTHERFORD FM Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:1135 Base Elevation: -1059 Thickness: 449
Geologic Description: LT GREY SS, SLTST, AND SH. SS IS QZ TO QZ-LI, F GRAINED AND WELL SORTED TO POORLY SORT AND PBLY. SLTST AND SH MORE CARB DOWNWARD. FORAMS PRESENT
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ALLANDALE FM Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:TD Base Elevation: ~1099* Thickness: >40
Geologic Description: VOLCANICS. ANDESITIC BRECCIA AND LAVA, LT GREY TO GREY-GREEN, FINELY GARNETIFERROUS TOWARDS THE BASE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: DALWOOD GP Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:TD Base Elevation: ~1099* Thickness: >685
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS FARLEY, RUTHERFORD, AND ALLANDALE FORMATIONS.

STRATIGRAPHY: BRANXTON FM Age: PERMIAN Interpretation Code:Y201
Basal Information: Depth to Base:393 Base Elevation: -317 Thickness: 391
Geologic Description: PALE GY TO BR QZ AND LI GREYWACKE WITH SCATTERED PBLS. SOME LAM AND BURROWS. SIDERITIC, CARB, CHLORITIC, LOCALIZED BRYOZOA HORIZON
Reported Environment: AGITATED TO QUIET MARINE. SOME CURRENT ACTION
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
MARINE FOSS(BRYOZOA) 94 -18 6
COAL, LIGNITE 314 -238
Tectonic Structure:
Remarks EQUIVALENT TO BMR UNIT B1 AND ELDERSLIE FM.

STRATIGRAPHY: MAITLAND GP Age: PERMIAN Interpretation Code:Y202
Basal Information: Depth to Base:393 Base Elevation: -317 Thickness: 391
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BRANXTON FM

STRATIGRAPHY: GRETA CM Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:506 Base Elevation: -430 Thickness: 113
Geologic Description: INTBDD LITHIC-FELD GWKE WITH ABUNDANT CHERT PBLS, CARB SLTST, COAL, LAM BDG, PY, SID. COAL IN MIDDLE IS CLEANER THAN ELSEWHERE(UNIT B3 435-459M)

Reported Environment: DELTAIC SWAMPS IN WHICH SUBSIDENCE IS NOT KEEPING PACE WITH SEDIMENTATION. BOTTOM TRANSITIONAL BETWEEN MARINE DALWOOD GP AND TERRESTRIAL GRETA.
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL, SILTY	427	-351	2
COAL, VITREOUS	437	-361	3
COAL, VITREOUS	446	-370	4
COAL, SILTY	456	-390	2

Tectonic Structure:
Remarks: EQUIVALENT TO BMR UNITS B2-B4. FORMATION PICKS USED FOR STRUCTURE AND ISOPACH MAPS.

STRATIGRAPHY: RUTHERFORD FM Age: PERMIAN Interpretation Code:Y205
Basal Information: Depth to Base:1135 Base Elevation: -1059 Thickness: 449
Geologic Description: DK GY, MICAC, VOLC-LITHIC GWKE WITH THIN SLTST BDS AND LAM, LENSES OF PURE TO SANDY SID, MINOR COAL BNDS AND QZ AND CHERT PBL HORIZONS. CARB, PY
Reported Environment: MARGINAL MARINE SUBJECT TO SHARP CHANGES IN ENERGY
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks: EQUIVALENT TO BMR UNIT B6. BOUNDARY BETWEEN B5-B6 LARGELY ON FELD CONTENT. RUTHERFORD HAS RARE FORAMS AND PLANT FRAG.

STRATIGRAPHY: ALLANDALE FM Age: PERMIAN Interpretation Code:Y206
Basal Information: Depth to Base:TD Base Elevation: -1099+ Thickness:)40
Geologic Description: HIGHLY ALTERED PORPHYRITIC VOLCANIC ROCK, POSSIBLY OF INTERMEDIATE COMPOSITION. SOME FLOW STRUCTURES. GREENISH-GREY
Reported Environment: NOT ABLE TO DETERMINE WHETHER A FLOW OR INTRUSION. EQUIVALENT UNITS IN LODER # 1 MAY BE LAVA FLOWS AND TUFFS
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks: EQUIVALENT TO BMR UNIT B7.

STRATIGRAPHY: DALWOOD GP Age: PERMIAN Interpretation Code:Y207
Basal Information: Depth to Base:TD Base Elevation: -1099+ Thickness:)669
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks: CONTAINS FARLEY, RUTHERFORD, AND ALLANDALE FORMATIONS.

STRATIGRAPHY: RUTHERFORD FM Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:1824 Base Elevation: -1732 Thickness: 502
Geologic Description: GY-DK GY PARTLY SANDY OR PBLY, FINELY CARB SLTST, THIN GY-WH VF-F LI CARB SST INTBS, DK GY-BLK FINELY MICAC PARTLY SILTY SL CARB SHALE
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL INTERVAL	1807	-1715	3

Tectonic Structure:
Remarks

STRATIGRAPHY: ALLANDALE-LOCHINVAR Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:TD Base Elevation: -1815? Thickness:)83
Geologic Description: LIGHT GREEN CRYSTALLINE TUFF + ANDESITIC LAVAS
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks: THIS UNIT IS PROBABLE EQUIVALENT OF ALLANDALE + LOCHINVAR FORMATIONS

STRATIGRAPHY: DALWOOD GP Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:TD Base Elevation: -1815? Thickness:)721
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks: CONTAINS FARLEY + RUTHERFORD FMS, + UNDIFF ALLANDALE-LOCHINVAR FMS

STRATIGRAPHY: MULBRING SLTST Age: PERMIAN Interpretation Code:Y201
Basal Information: Depth to Base:239 Base Elevation: -147 Thickness: 235
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BRANXTON FM Age: PERMIAN Interpretation Code:Y202
Basal Information: Depth to Base:658 Base Elevation: -566 Thickness: 419
Geologic Description:

Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: MAITLAND GP Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:658 Base Elevation: -566 Thickness: 654
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS MULBRING SILTSTONE + BRANXTON FORMATION

STRATIGRAPHY: GRETA CM Age: PERMIAN Interpretation Code:Y204
Basal Information: Depth to Base:1186 Base Elevation: -1094 Thickness: 528
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks THESE FORMATION PICKS USED FOR STRUCTURE AND ISOPACH MAPS.

STRATIGRAPHY: FARLEY FM Age: PERMIAN Interpretation Code:Y205
Basal Information: Depth to Base:1322 Base Elevation: -1230 Thickness: 136
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: RUTHERFORD FM Age: PERMIAN Interpretation Code:Y206
Basal Information: Depth to Base:1824 Base Elevation: -1732 Thickness: 502
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ALLANDALE-LOCHINVAR Age: PERMIAN Interpretation Code:Y207
Basal Information: Depth to Base:TD Base Elevation: -1815* Thickness: >83
[illegible]ic Description:
[illegible]ted Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks REPRESENTS UNDIFFERENTIATED ALLANDALE + LOCHINVAR FORMATIONS

STRATIGRAPHY: DALWOOD GP Age: PERMIAN Interpretation Code:Y208
Basal Information: Depth to Base:TD Base Elevation: -1815* Thickness: >721
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS FARLEY + RUTHERFORD FMS, + UNDIFF. ALLANDALE-LOCHINVAR FMS

SEDIMENTARY BASIN: SYDNEY, NORTH

STRATIGRAPHY: WATTS SST Age: PERMIAN Interpretation Code:Y101
Basal Information: Depth to Base:107 Base Elevation: -1 Thickness: 20
Geologic Description: MEDIUM SANDSTONE, LT GREY, CARB PARTINGS, FISSILE IN UPPER PART, MASSIVE IN LOWER PART.
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks BASE OF WOLLOMBI CM

STRATIGRAPHY: WOLLOMBI CM Age: PERMIAN Interpretation Code:Y102
Basal Information: Depth to Base:107 Base Elevation: -1 Thickness: 107
Geologic Description: INTBDD-LAMD F-M SST, MDST, CLST, SLTST, COAL. CARB, TFAC. COAL GENERALLY INFERIOR.
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL, SM 1	63	43	4
COAL, SM 2	72	34	2
COAL, SM 3	78	28	2

Tectonic Structure:
Remarks WATTS SST AT BASE

STRATIGRAPHY: DENMAN FM Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:154 Base Elevation: -48 Thickness: 47
Geologic Description: F-M SANDSTONE WITH MDST INTBDS-LAM AND CLST-SLTST LAMINITE. BIOTURBATED, SIDERITE REPLACEMENT.
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks TOP OF WITTINGHAM CM

STRATIGRAPHY: ARCHERFIELD SST Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:555 Base Elevation: -449 Thickness: 9
Geologic Description: F-M SST, SLTST, COAL, MDST. INTBDD, LAMD, MICRO XBDD. BURROWS, SAND-FILLED CRACKS, SMALL DIAPIRIC STRUCTURES, CARB, ROOT AND PLANT REMAINS.
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL, SM 20	554	-448	0.6

Tectonic Structure:
Remarks FINING UP SEQ OF M-C SST, F-M SST & SLTST, MDST NOTICED ABOVE COAL SM(S.R.). FM IN WITTINGHAM CM

STRATIGRAPHY: BULGA FM Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:569 Base Elevation: -463 Thickness: 14
Geologic Description: F SST, SLTST, MDST, CLST, COAL, IGNEOUS ROCK. INTBDD-LAMD, CHURNED, BREDCIATED (BASAL MDST). CARB PART, ROOT AND PLANT REM, SID REPLACEMENT.
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL, SM 21	558	-452	1.5

	IGNEOUS ROCK	565	-459	1.8

Tectonic Structure:
Remarks: WITTINGHAM CM. IGNEOUS ROCK IS PORPHYRITIC.

STRATIGRAPHY: WITTINGHAM CM Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:TD Base Elevation: -466% Thickness: >465
Geologic Description: F-M SST, SLTST, MDS., COAL, SOME CLST, IGNEOUS ROCK, LAMINITE. INTBDD-LAMD, CHURNED, MICRO XBDD, BRECCIATED. CARB, TFAC(TOP), SID, PLANTS, ROOTS
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth T'OUT	Elevation	Thickness
IGNEOUS ROCK	446	-340	1
COAL, BAYSWATER SM	545	-439	5.7
IGNEOUS ROCK	565	-459	1.8

Tectonic Structure:
Remarks: BAYSWATER SM INTRUDED BY IGNEOUS ROCK. CONTAINS DENMAN FM, ARCHERFIELD SST AND BULGA FM.

STRATIGRAPHY: SINGLETON SUPER-GP Age: PERMIAN Interpretation Code:Y187
Basal Information: Depth to Base:TD Base Elevation: -466% Thickness: >571
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks: CONTAINS WOLLOMBI AND WITTINGHAM CM

Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS GREIGS CREEK COAL, REDMANVALE CREEK FM,DIGHTS CREEK COAL (WOLLOMBI CM)

STRATIGRAPHY: NARRABEEN GP Age: TRIASSIC Interpretation Code:Y101
Basal Information: Depth to Base:67 Base Elevation: +13 Thickness: 65
Geologic Description: M-VC SANDSTONE AND CONGLOMERATE. WITH FINER SANDSTONE, SILTSTONE, MUDSTONE INTBDS. THICK (8M) BASAL CGL. PBLS OF RED AND GN CHERTS, WHITE CLST.
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks SURFACE ELEVATION OF CONTROL POINT IS APPROXIMATE.

STRATIGRAPHY: GREIGS CREEK COAL Age: PERMIAN Interpretation Code:Y102
Basal Information: Depth to Base:68 Base Elevation: +12 Thickness: 1
Geologic Description: DULL TO BRIGHT COAL WITH INTBDS OF DK GREY OR BROWN CARBONACEOUS CLAYSTONE WITH COALY LAMINAE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks WOLLOMBI CM

STRATIGRAPHY: REDMANVALE CREEK FM Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:90 Base Elevation: -10 Thickness: 22
Geologic Description: M-C SANDSTONE AND CONGLOMERATE WITH MINOR MUDSTONE AND COAL INTBDS-LAM. SST IS QZ-LITHIC; CGL HAS DOMINANTLY GY SLTST PBLS IN SST MATRIX
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks WOLLOMBI CM

STRATIGRAPHY: DIGHTS CREEK COAL Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:121 Base Elevation: -41 Thickness: 31
Geologic Description: 3 MAJOR SMS OF DULL AND DULL-BRIGHT COAL SEPARATED BY MASC SS AND INTBDD-LAM SS, TUFFITE, SLTST, AND MDST. TFITE IS WH AND INTBDD WITH CYST-MDST
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL, SM 2, DULL	93	-13	3
COAL, SM 3, DULL-BRT	101	-21	3
TUFFITES	105	-25	3
COAL, SM 4, DULL-BRT	121	-41	6

Tectonic Structure:

Remarks WOLLOMBI CM

STRATIGRAPHY: WATERFALL GULLY FM Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:135 Base Elevation: -55 Thickness: 14
Geologic Description: INTBDD-LAM F-VF SANDSTONE, SILTSTONE, MUDSTONE, COAL, TUFF. PLANT FRAGMENTS, ROOT REMAINS, CARBONACEOUS
Reported Environment:
Interpreted Environment:

Geologic Features:	Feature	Depth	Elevation	Thickness
	TUFF	135	-55	7

Tectonic Structure:
Remarks WOLLOMBI CM

STRATIGRAPHY: PINE GROVE FM Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:180 Base Elevation: -100 Thickness: 45
Geologic Description: M-C MASS SS (TOP), INTBDD-LAM FINE SS SLTST MDST TUFF, 3 MAJOR COAL SMS. SEDIMENTS ARE LI-BZ, CARB, CONTAIN PLANT FRAG SID BANDS-NOD. COAL D-BRT
Reported Environment:
Interpreted Environment:

Geologic Features:	Feature	Depth	Elevation	Thickness
	TUFF, GRADES SS TOP	158	-78	8
	COAL, SM 5	160	-80	1
	COAL, SM 6	162	-82	<1
	COAL, SM 7	163	-83	<1

Tectonic Structure:
Remarks WOLLOMBI CM

STRATIGRAPHY: DOYLES CREEK SUB-GP Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:180 Base Elevation: -100 Thickness: 59
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features:	Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks CONTAINS WATERFALL GULLY AND PINE GROVE FM. (WOLLOMBI CM)

STRATIGRAPHY: LUCERNIA COAL Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:198 Base Elevation: -118 Thickness: 18
Geologic Description: COAL AND INTBDD-LAM FINE SS, SLTST, MDST, CLST, AND TUFF. SEDIMENT ARE CARB AND CONTAIN PLANT FRAGMENTS. COAL GEN DULL AND INFERIOR, SID, CALC.
Reported Environment:
Interpreted Environment:

Geologic Features:	Feature	Depth	Elevation	Thickness
	COAL, SM 8 DULL-BRT	183	-103	1
	COAL, SM 9 DULL-BRT	189	-109	<1
	COAL, SM 10 INFERIOR	194	-114	3
	COAL, SM 11 BRT-DULL	198	-118	2

Tectonic Structure:
Remarks WOLLOMBI CM

STRATIGRAPHY: STRATHMORE FM Age: PERMIAN Interpretation Code:Y110
Basal Information: Depth to Base:219 Base Elevation: -139 Thickness: 21
Geologic Description: INTBDD-LAM CLAYSTONE, MUDSTONE, COAL, AND SANDSTONE. LT GREY (SS) TO DK GY AND BLK. CARB, TFAC, SOME SIDERITE REPLACEMENT AND MICRO FUALTS.
Reported Environment:
Interpreted Environment:

Geologic Features:	Feature	Depth	Elevation	Thickness
	TUFF (BURROWED)	212	-132	1

Tectonic Structure:
Remarks WOLLOMBI CM

STRATIGRAPHY: ALCHERINGA COAL Age: PERMIAN Interpretation Code:Y111
Basal Information: Depth to Base:233 Base Elevation: -153 Thickness: 14
Geologic Description: COAL AND INTBDD-LAM CLAYSTONE, SILTSTONE, SANDSTONE, AND TUFF. TFAC, CARB, SIDERITE, PLANT FRAG. COAL GENERALLY DULL, DIRTY. SOME BRT IN SM 14.

Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL, SM 12	219	-139	<1
TUFF	221	-141	<1
COAL, SM 13	225	-145	5
COAL, SM 14	233	-153	5

Tectonic Structure:
Remarks: WOLLOMBI CM

STRATIGRAPHY: CLIFFORD FM Age: PERMIAN Interpretation Code:Y112
Basal Information: Depth to Base:291 Base Elevation: -211 Thickness: 58
Geologic Description: COAL WITH INTBDD-LAM F-M SS CLST SLTST AND MDST; M-C MASS SS AND CLG OCCURS BETWEEN SMS 16-17 AND 18-19. COAL GEN DULL-BRT. SEDS CARB TFAC SID.
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL, SM 15	247	-167	3
COAL, SM 16	256	-176	4
COAL, SM 17	282	-202	6
COAL, SM 18	291	-211	2

Tectonic Structure:
Remarks: WOLLOMBI CM

STRATIGRAPHY: HORSESHOE CK SUB-GP Age: PERMIAN Interpretation Code:Y113
Basal Information: Depth to Base:291 Base Elevation: -211 Thickness: 111
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks: CONTAINS LUCERNIA COAL, STRATHMORE FM, ALCHERINGA COAL, CLIFFORD FM (WOLLOMBI CM)

STRATIGRAPHY: CHARLTON FM Age: PERMIAN Interpretation Code:Y114
Basal Information: Depth to Base:309 Base Elevation: -229 Thickness: 18
Geologic Description: INTBDD-LAM F-M SANDSTONE AND MUDSTONE. CARB, PLANT REMAINS, SIDERITE REPLACEMENT, IN PART BIOTURBATED AND TUFFACEOUS
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks: WOLLOMBI COAL MEASURES

STRATIGRAPHY: ABBEY GREEN COAL Age: PERMIAN Interpretation Code:Y115
Basal Information: Depth to Base:317 Base Elevation: -237 Thickness: 8
Geologic Description: COAL AND INTBDD-LAM F SANDSTONE, SILTSTONE, AND CLAYSTONE. COAL DULL TO BRIGHT, CALCITE IN CLEAT. SEDS CARB, TFAC, PLANT FRAG.
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL, SM 19	311	-231	2

Tectonic Structure:
Remarks: WOLLOMBI CM

STRATIGRAPHY: APPLE TREE FLAT S-GP Age: PERMIAN Interpretation Code:Y116
Basal Information: Depth to Base:317 Base Elevation: -237 Thickness: 26
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks: CONTAINS CHARLTON FM AND ABBEY GREEN COAL (WOLLOMBI CM)

STRATIGRAPHY: WATTS SST Age: PERMIAN Interpretation Code:Y117
Basal Information: Depth to Base:343 Base Elevation: -263 Thickness: 26
Geologic Description: F-M, LT GREY TO BROWNISH SANDSTONE. COALY LAMINAE, TUFFACEOUS.
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks WOLLOMBI CM

STRATIGRAPHY: WOLLOMBI CM Age: PERMIAN Interpretation Code:Y118
Basal Information: Depth to Base:343 Base Elevation: -263 Thickness: 276

Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: DENMAN FM Age: PERMIAN Interpretation Code:Y119
Basal Information: Depth to Base:366 Base Elevation: -286 Thickness: 23
Geologic Description: LAMINITE OF F LT GREY SS AND LT-DK GREY-BLK SLTST AND MDST. SMALL SCALE EROSIONAL FEATURES, X-BDG IN SS, BURROWS, CONTORTED BDG, SIDERITE ZONES
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks WITTINGHAM CM

STRATIGRAPHY: MALABAR FM Age: PERMIAN Interpretation Code:Y120
Basal Information: Depth to Base:604 Base Elevation: -524 Thickness: 238
Geologic Description: SANDSTONE AND COAL, SST IS M-C TO CGL, MASS WITH CARB PARTINGS AND EROSIONAL BASE OR F-M AND INTBDD-LAM WITH CLST SLTST MDST. SID,TF,PLANT FRAG
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
WYBROW COAL MB	441	-361	69
REDBANK COAL MB	483	-403	39
WAMBO COAL MB	543	-463	15
WHYNOT COAL MB	580	-500	25

Tectonic Structure:
Remarks SMS 20,21,22 IN WYBROW COAL MB; SMS 23,24 IN REDBANK; SMS 25,26 IN WAMBO; SMS 27, 28 IN WHYNOT

STRATIGRAPHY: MT OGILVIE FM Age: PERMIAN Interpretation Code:Y121
Basal Information: Depth to Base:707 Base Elevation: -627 Thickness: 103
Geologic Description: THIN INTBDD-LAM F-M SS, SLTST, CLST, AND COAL; LESSER M-C SS, MASS BDG, CARB PART, ROOT AND PLANT REMAINS, DISTURBED BDG, WORM BURROWS, SIDERITE
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
BLAKEFIELD COAL MB	608	-528	4
GLEN MUNRO COAL MB	658	-578	4
WOODLANDS HILL COAL	707	6273	49

Tectonic Structure:
Remarks NUM CLST INTBDS IN BLAKEFIELD (SM 29) AND GLEN MUNRO (SM 30). THICKER COAL IN WOODLANDS HILL (SMS 31, 32)

STRATIGRAPHY: BURNHAMWOOD FM Age: PERMIAN Interpretation Code:Y122
Basal Information: Depth to Base:1064 Base Elevation: -984 Thickness: 356
Geologic Description: INTBDD-LAM F-M SS SLTS CLST AND COAL, SOME M-C MASS SS. CARB PART AND FRAG, PLANT AND ROOT REMAINS, DISTRUBED BDG, WORM BURROWS, SID, MICROBREC.
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
MT ARTHUR COAL MB	770	-690	26
PIERCEFIELD COAL MB	885	-805	79

	BROONIE COAL MB	1033	-953	45
	BRAYSWATER SM (46)	1664	-984	9

Tectonic Structure:
Remarks MT ARTHUR COAL SMS 33 34 35, PIECEFIELD SMS 36 37 38, VAUX SMS (NOT ABOVE) 39 40, BROONIE SMS 42 43 44 45.

STRATIGRAPHY: ARCHERFIELD SST Age: PERMIAN Interpretation Code:Y123
Basal Information: Depth to Base:1078 Base Elevation: -998 Thickness: 14
Geologic Description: SANDSTONE, GENERALLY COARSE AND FINING TOWARD BASE. COALY PARTINGS COMMON IN TOP, SPORADIC T'OUT. WORM BURROWS/
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:

STRATIGRAPHY: BRANXTON FM Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:1396 Base Elevation: -1397 Thickness: 628
Geologic Description: F + V POORLY SRTD QZ GWKES, GWKE + SANDY SLTST. MARINE FOSSILS. CARB WITH PLT FRAGS, ?ROOTLETS, CHURNED BDG, XLAMN + VARIABLY MUDDY MTRX AT BASE
Reported Environment: SHALLOW MARINE ENVIRONMENT, POSSIBLY ESTUARINE NEAR BASE (JENSEN & BRYAN, 1969).
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks GEOLOGIC DESCRIPTION FROM JENSEN & BRYAN, 1969.

STRATIGRAPHY: MAITLAND GP Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:1396 Base Elevation: -1387 Thickness: 1338
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS MULBRING SILTSTONE, MUREE SANDSTONE & BRANXTON FORMATION.

STRATIGRAPHY: GRETA CM Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:1462 Base Elevation: -1453 Thickness: 66
Geologic Description: V POORLY SRTD PETROMICTIC PBL CGL-PBLY LI GWKE WITH QZ, FLD, XL TUFF, CHERT + SLTST CLASTS, & F CARB LI GWKE WITH SED + VOLC LITHICS. COAL SEAM.
Reported Environment: MARINE AND/OR TRANSITIONAL ENVIRONMENT LAST STAGES OF MAJOR REGRESSION (JENSEN & BRYAN, 1969).
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
COAL 1420 -1411 5
Tectonic Structure:
Remarks GEOLOGIC DESCRIPTION FROM JENSEN & BRYAN, 1969.

STRATIGRAPHY: FARLEY-RUTHERFORD Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:1887 Base Elevation: -1878 Thickness: 425
Geologic Description: F LI GWKE + SANDY SLTST, V CARB TOWARDS BASE. SID & PY COMMON. QZ + SOME VOLC LI CLASTS. CARB FRAGS COMMON. BRACHIOPOD FRAGS. VESICULAR BASALT.
Reported Environment: LOW ENERGY COASTAL ENVIRON SUCH AS LARGE ESTUARY WHERE SED BEING CONTINUALLY DEPOSITED & REWORKED & WHERE SURROUNDING SWAMPS SUPPLY CARB MATTER.
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
BASALT 1744 -1735 4.3
Tectonic Structure:
Remarks GEOLOGIC DESCRIPTION + REPORTED ENVIRONMENT FROM JENSEN & BRYAN, 1969. REPRESENTS UNDIFF FARLEY & RUTHERFORD FMS.

STRATIGRAPHY: ALLANDALE-LOCHINVAR Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:TD Base Elevation: -3040± Thickness: >1162
Geologic Description: BASIC & INTERMED PYROCLASTICS, PETROMICTIC VOLC PBL CGL, SILTY MDST, GWKE, SANDY SLTST, F SLTST & SILTY SST INTBDD. SOME CARB PY. CARBONATE CMT.
Reported Environment: PROBABLY MARINE (JENSEN & BRYAN, 1969).
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks GEOLOGIC DESCRIPTION FROM JENSEN & BRYAN, 1969. REPRESENTS UNDIFFERENTIATED ALLANDALE & LOCHINVAR FORMATIONS.

STRATIGRAPHY: DALWOOD GP Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:TD Base Elevation: -3040± Thickness: >1587
Geologic Description:

Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS UNDIFF FARLEY-RUTHERFORD FMS & UNDIFF ALLANDALE-LOCHINVAR FMS.

STRATIGRAPHY: TOMAGO CM Age: PERMIAN Interpretation Code:Y201
Basal Information: Depth to Base:58 Base Elevation: -49 Thickness: 54
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: MAITLAND GP Age: PERMIAN Interpretation Code:Y202
Basal Information: Depth to Base:1417 Base Elevation: -1408 Thickness: 1359
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: GRETA CM Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:1461 Base Elevation: -1452 Thickness: 44
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

SEDIMENTARY BASIN: SYDNEY, NORTH

STRATIGRAPHY: WITTINGHAM CM Age: PERMIAN Interpretation Code: X110
Basal Information: Depth to Base: 172 Base Elevation: -49 Thickness: >168
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: SINGLETON SUPER-GP Age: PERMIAN Interpretation Code: X115
Basal Information: Depth to Base: 172 Base Elevation: -49 Thickness: >168
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: GRETA CM Age: PERMIAN Interpretation Code: X120
Basal Information: Depth to Base: 1001 Base Elevation: -878 Thickness: 361
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks GRETA CM TOP AT -517 M.

STRATIGRAPHY: WITTINGHAM CM Age: PERMIAN Interpretation Code: Y101
Basal Information: Depth to Base: 162 Base Elevation: -39 Thickness: 158
Geologic Description: INTBDD SH, COAL AND MINOR SLTST AND SS. COAL BRIGHT-DULL; SH IS LT-M GREY, SILTY-SANDY, IN PART CARB; SS IS POOR SORT QZ-LI WACKE, GLAUC, CALC.
Reported Environment: NON-MARINE
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL	21	+132	3
COAL	67	+56	6

	COAL	88	+35	6
	COAL	143	-28	6

Tectonic Structure:
Remarks REFERRED TO AS TOMAGO CM IN REFERENCE REPORT. COAL ALSO AT 158 M (BASE),3 M THICK

STRATIGRAPHY: SINGLETON SUPER-GP Age: PERMIAN Interpretation Code:Y102
Basal Information: Depth to Base:162 Base Elevation: -39 Thickness: 158
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks CONTAINS WITTINGHAM CM (TOMAGO IN REFERENCE REPORT)

STRATIGRAPHY: MULBRING SLTST Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:391 Base Elevation: -258 Thickness: 219
Geologic Description: SH GRADING TO ARGIL SLTST WITH MINOR SS INTBDS AND TUFFS. M-DK GREY, SLIGHTLY CARB SILTY SH; MARINE FOSS AND PY IN SLTST; LT-M GY QZ-LI WACKE SS
Reported Environment: . MARINE
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
TUFF	292	-169	
TUFF	308	-185	
TUFF	366	-243	

Tectonic Structure:
Remarks INTERVAL 162-640 M DEPTH ASCRIBED TO MULBRING-BELFORD FMS IN WELL REPORT. BASE OF MULBRING AT ARGIL-AREN CHANGE ON LOG.

STRATIGRAPHY: BRANXTON FM Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:777 Base Elevation: -654 Thickness: 396
Geologic Description: SH AND SLTST AT TOP (BELFORD) GRADES TO PREDOM SS AND CGL BELOW (ELDERSLIE). BURROWS, LOAD CASTS, MARINE FOSS(TOP), X-BDG F UP GRADED BIC (BOT)
Reported Environment: MARINE AT TOP, NON-MARINE BELOW
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
TUFF, WH-YEL	495	-372	
COAL	704	-581	3
COAL	710	-587	3

Tectonic Structure:
Remarks INCLUDES LOWER 259 M OF MULBRING-BELFORD FMS (BELFORD FM) AND ALL OF ELDERSLIE FM OF WELL COMPLETION REPORT

STRATIGRAPHY: MAITLAND GP Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:777 Base Elevation: -654 Thickness: 615
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks CONTAINS MULBRING AND BRANXTON FMS.

STRATIGRAPHY: GRETA CM Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:1001 Base Elevation: -878 Thickness: 224
Geologic Description: INTBDD COAL SS AND LESSER ARGIL SLTST, CARB SH, VOLC. SS IS LT GY-BUFF, QZ-LI WACKE, IN PART CGL, CARB, PY. VOLC IS DK GY-GY BLK, VESICULAR
Reported Environment: NON-MARINE TO MARGINAL MARINE
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL	870	-747	6
COAL	957	-834	8
VOLCANICS	983	-860	15
COAL	989	-866	5

Tectonic Structure:
Remarks OTHER THINNNER COALS THROUGHOUT

STRATIGRAPHY: FARLEY FM Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:1104 Base Elevation: -981 Thickness: 163
Geologic Description: GREY QZ-LI WACKE GRADING T ARGIL SANDY SLTST AT BASE. TOP SS SHOWS MASSIVE, CYCLIC GRADED,AND X-BDG; BOTTOM IS HIGHLY BURROWED WITH MARINE FOSS.
Reported Environment: SHALLOW MARINE
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL-COALY SEDIMENTS	1024	-901	2
COAL-COALY SEDIMENTS	1079	-956	3

Tectonic Structure:
Remarks

STRATIGRAPHY: RUTHERFORD FM Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:1537 Base Elevation: -1414 Thickness: 433
Geologic Description: PREDOM DK GY-GY BLK SH AND LESSER INTBDD SLTST. SH IS VARIABLY SILTY, CARB, PY, FOSSILIFERROUS. INTVAL OF MICRO-XLLINE DOLOMITE AND "CLAY-SLATE"
Reported Environment: MARINE
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
DOLOMITE-CLAY SLATE	1487	-1364	18

Tectonic Structure:
Remarks

STRATIGRAPHY: ALLANDALE FM Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:TD Base Elevation: -1472± Thickness: >58
Geologic Description: VOLCANICS. GREEN-GY GREEN, GEN APHANITIC, WITH DK GREEN PHENOCYRSTS IN A CLAYEY FELD GROUNDMASS. MINOR FELD LATHS. BECOMES RED-RUST RED DOWNWARD
Reported Environment: ALTERED INTERMEDIATE LAVA, PROBABLY ANDESITE
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: DALWOOD GP Age: PERMIAN Interpretation Code:Y110
Basal Information: Depth to Base:TD Base Elevation: -1472± Thickness: >594
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS FARLEY, RUTHERFORD, AND ALL ANDALE FM

STRATIGRAPHY: SINGLETON SUPER-GP Age: PERMIAN Interpretation Code:Y201
Basal Information: Depth to Base:189 Base Elevation: -66 Thickness: 185
Geologic Description: SH, LT GY-GY, INTBDD WITH MOSTLY FINE, POORLY SORTED SS, AND COAL. SS IS VARIABLY LITHIC, FELD, QZOSE, CARB, ARGIL
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: MULBRING SLTST Age: PERMIAN Interpretation Code:Y202
Basal Information: Depth to Base:351 Base Elevation: -228 Thickness: 162
Geologic Description: SHALE, M-DK GREY, SLIGHTLY CARB, GRADING TO ARGIL SLTST, MINOR SS INTBDS. SLTST FOSSILIFEROUS IN PLACES, PYRITIC
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BRANXTON FM Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:640 Base Elevation: -517 Thickness: 29$
Geologic Description: INTBDD SS, SLTST, SH WHICH IS SANDIER IN UPPER HALF. SS IS POORLY SORTED, F-M GRAINED, CGL IN PLACES. BRACHS AND RARE BURROWS

Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: MAITLAND GP Age: PERMIAN Interpretation Code:Y204
Basal Information: Depth to Base:640 Base Elevation: -517 Thickness: 451
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS MULBRING SILTSTONE AND BRAMXTON FM

STRATIGRAPHY: GRETA CM Age: PERMIAN Interpretation Code:Y205
Basal Information: Depth to Base:1081 Base Elevation: -878 Thickness: 361
Geologic Description: SS, VF GRAINED TO CGL, CARB, ARGIL, WITH INTBDD SANDY SLTST AND MINOR SH. SS, F-CGL, ARGIL, CARB, PY, INTBDD COAL. MINOR SLTST, CARB SH INTBDS.
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: FARLEY FM Age: PERMIAN Interpretation Code:Y206
Basal Information: Depth to Base:1184 Base Elevation: -981 Thickness: 103
Geologic Description: SS, F-C GRAINED, CGL IN PART, UNCONSOLIDATED, SLIGHTLY CALC, GRADING TO SANDY SLTST. BURROWS, FORAM, BRYOZOA TRACES. MASS GRADATIONAL BDS (TOP)
Reported Environment: POSSIBLY NON-MARINE IN TOP
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: RUTHERFORD FM Age: PERMIAN Interpretation Code:Y207
Basal Information: Depth to Base:1537 Base Elevation: -1414 Thickness: 433
Geologic Description: SLTST, M-DK GY, CARB, ARGIL, GRADES TO SILTY SH. SH, DK GY-BLK, PY, OCCAS FOSS, MINOR SLTST INTBDS. DOLOMITE INTBDD WITH SH. SH, DK GY, CARB.
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ALLANDALE FM Age: PERMIAN Interpretation Code:Y208
Basal Information: Depth to Base:TD Base Elevation: -1472± Thickness:)58
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: DALWOOD GP Age: PERMIAN Interpretation Code:Y209
Basal Information: Depth to Base:TD Base Elevation: -1472± Thickness:)594
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS FARLEY, RUTHERFORD, AND ALLANDALE FORMATIONS

Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks SEE TOMAGO CM

STRATIGRAPHY: LOWER TOMAGO CM Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:1446 Base Elevation: -1119 Thickness: 141
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:

Remarks SEE TOMAGO CM

STRATIGRAPHY: TOMAGO CM Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:1446 Base Elevation: -1119 Thickness: 464
Geologic Description: CALC SUBGWKE, SANDY, CARB, PY, CALC SLTST, ARKOSE, VOLCANIC CLAYSTONE: COAL SEAMS + LENSES, BASALT SILL. KULMURA MT - FORAMS, OSTRACOD FRAGMENTS
Reported Environment: BACKSWAMP, INTERSTITIAL ENVIRONMENT WITH REDUCING CONDITIONS. VOLCANIC ACTIVITY DURING DEPOSITION. KULNURA MARINE TONGUE - LAGOONAL
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL INTERVAL	1100	-773	54
BASALT SILL	1268	-941	9
KULNURA MARINE TNG	1305	-978	154
COAL INTERVAL	1405	-1078	32

Tectonic Structure:
Remarks

STRATIGRAPHY: MULBRING SLTST Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:1904 Base Elevation: -1577 Thickness: 458
Geologic Description: SANDY CARBONACEOUS SILTSTONE, THIN BEDS CLAYSTONE, COAL LAMINAE. SANDIER + MORE PYRITIC TOWARDS BASE. FORAMS T'OUT OSTRACODS IN TOP HALF
Reported Environment: LOW ENERGY MARINE. TOP HALF LAGOONAL, BOTTOM HALF A MIXTURE OF BACK-SWAMP + LAGOON
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks

STRATIGRAPHY: MUREE SANDSTONE Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:1930 Base Elevation: -1603 Thickness: 26
Geologic Description: PEBBLY SUBGREYWACKE WITH CALCITE CEMENT. ABUNDANT FORAM TESTS, BRACHIOPOD SPINES + SKELETONS OF BRYOZOA
Reported Environment: HIGH ENERGY MARINE ENVIRONMENT. GRANITIC AND MINOR SEDIMENTARY PROVENANCES
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks

STRATIGRAPHY: BRANXTON FM Age: PERMIAN Interpretation Code:Y110
Basal Information: Depth to Base:TD Base Elevation: -2146± Thickness:)543
Geologic Description: PEBBLY GREYWACKE, POORLY SORTED PEBBLEY SURGREYWACKE, RICHLY FOSSILIFEROUS SILTSTONE, SANDY SILTSTONE. FORAMS, BRACHIOPODS, BRYOZOA
Reported Environment: LOW ENERGY NEAR-SHORE ENVIRONMENT AT TOP. MODERATE ENERGY MARINE IN MIDDLE. FLUVIATILE AT BASE
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Basal Information: Depth to Base:688 Base Elevation: -580 Thickness: 683
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BRANXTON FM

STRATIGRAPHY: GRETA CM Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:786 Base Elevation: -678 Thickness: 98
Geologic Description: 5 THIN COAL SEAMS ASSOCIATED WITH CHERTY LITHIC SS AND CGL. SIDERITE CEMENT, PYRITE, CARBONACEOUS. SOME STEEP X-BDG IN CGL
Reported Environment: HIGH ENERGY FLUVIAL. COAL ALLOCHTHONOUS, LACKING UNDERCLAYS WITH PLANT STEMS OR ROOT REMAINS
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL	707	-599	6
COAL, 2 SMS	756	-648	6

Tectonic Structure:
Remarks DESCRIPTION AND ENVIRONMENT FROM NICHOLAS, 1968. NEARLY EQUIVALENT TO EMR UNIT L4 (688-744M).

STRATIGRAPHY: FARLEY FM Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:932 Base Elevation: -824 Thickness: 146
Geologic Description: BOTTOM 30M(L6) VF-F FELD-LI SS INTBDD WITH SLTST; TOP IS LITH SS. CARB FRAG, SPARSE MARINE FOSS, BURROWS, BIOTURB. SID, SILICA, DOLO., DAWSONITE
Reported Environment: SHALLOW QUIET WATER, MOSTLY BRACKISH, PARTLY MARINE AT BOTTOM. DECREASING CURRENT ACTION UPWARDS
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:

Remarks DESCRIPTION AND ENVIRONMENT FROM NICHOLAS, 1968. EQUIVALENT TO BMR UNITS L5-6.

STRATIGRAPHY: RUTHERFORD FM Age: PERMIAN Interpretation Code:Y185
Basal Information: Depth to Base:1183 Base Elevation: -1075 Thickness: 251
Geologic Description: POORLY BDD, PY, CARB SLTST COARSENING UPWARD TO FINE SS WITH SLTS PARTINGS. SHELL FRAG, BURROWS, BIOTURBATION. CALCITE AND SIDERITE CEMENT
Reported Environment: NEAR SHORE, POSSIBLY TIDAL FLAT
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks DESCRIPTION AND ENVIRONMENT FROM NICHOLAS, 1968. EQUIVALENT TO BMR UNIT L7.

STRATIGRAPHY: ALLANDALE FM Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:TD Base Elevation: -1955* Thickness:)680
Geologic Description: INTERMEDIATE TO BASIC PYROCLASTICS AND FLOWS AND AN INTERVAL OF ALTERNATING PINK AND GREEN CONGLOMERATE
Reported Environment: ACTIVE VOLCANISM, OR PERIOD OF FLUVIAL DEPOSITION
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
TUFF	T'OUT		
VOLCANICS	T'OUT		
CONGLOMERATE	1445	-1337	46

Tectonic Structure:
Remarks DESCRIPTION AND ENVIRONMENT FROM NICHOLAS, 1968. EQUIVALENT TO BMR UNITS L8-18.

Geologic Description: LT GY F-M VOLC SUBGWKE, INTBDD SILTY CARB PY CLST, CALCITIC CARB F SUBGWKE, SHALE WITH PYRITIC COAL LAMINAE, + OLIVE-BLK BASIC VOLCANICS
Reported Environment: QUIET SHALLOW WATER, MARGINAL, PROBABLY FRESH WATER REDUCING CONDITIONS. (NICHOLAS, 1969)
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
VOLCANICS	101	+99	58

Tectonic Structure:
Remarks CALLED "NEWCASTLE COAL MEASURES" IN COMPLETION REPORT. GEOLOGIC DESCRIPTION - NICHOLAS, 1969. EQUIV TO BMR UNITS M1-3

STRATIGRAPHY: WITTINGHAM CM Age: PERMIAN Interpretation Code:Y102
Basal Information: Depth to Base:648 Base Elevation: -448 Thickness: 532
Geologic Description: COAL SMS, LT GY F-M + M-C VOLC SUBGWKE, CARB PY SLTST, CARB SH, SID CARB SLTST + CLST, WH CLST, PROTOQZITE, VOLC LI GWKE, INTERMED-BASIC VOLCS
Reported Environment: SHALLOW, MARGINAL, PROBABLY FRESH WATER, MAINLY REDUCING CONDITIONS (NICHOLAS, 1969)
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL INTERVAL	276	-76	121
COAL INTERVAL	447	-247	129
VOLCANIC	520	-320	15
COAL INTERVAL	631	-431	101

Tectonic Structure:
Remarks GEOLOGIC DESCRIPTION FROM NICHOLAS, 1969. APPROX EQUIVALENT TO BMR UNITS M4-9. CALLED "TOMAGO CM" IN COMPLETION REPORT.

STRATIGRAPHY: SINGLETON SUPER-GP Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:648 Base Elevation: -448 Thickness: 646
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks CONTAINS WOLLOMBI AND WITTINGHAM COAL MEASURES

STRATIGRAPHY: MULBRING SLTST Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:831 Base Elevation: -631 Thickness: 183
Geologic Description: VF GR F PROTOQZITE GRADING TO SLTST + CONTAINING CARB MATERIAL, AND INTBDD CARBONACEOUS, SIDERITIC, PYRITIC SILTSTONE + CLAYSTONE. BRYOZOANS
Reported Environment: SHALLOW WATER, MARGINAL, MARINE ENVIRONMENT UNDER SOMEWHAT REDUCING CONDITIONS (NICHOLAS, 1969)
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks PROTOQZITE-SLTST CONTAINS SID + DAWSONITE CMTS. GEOL DESCRIPTION - NICHOLAS, 1969. APPROX EQUIV TO BMR UNITS M10-13

STRATIGRAPHY: BRANXTON FM Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:1044 Base Elevation: -844 Thickness: 213
Geologic Description: SUBGWKE + PROTOQZITE GRADING IN PARTS TO SLTST + CLST. CARB MATERIAL + COAL FRAGS DECREASE UPWARDS, BASE PBLY, SCATTERED PBLS T'OUT. SHELL FRAGS
Reported Environment: SHALLOW WATER, MARGINAL MARINE CONDITIONS PROBABLY WITH SOME GENTLE CURRENT ACTION (NICHOLAS, 1969)
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks APPROX EQUIVALENT TO BMR UNIT M14

STRATIGRAPHY: MAITLAND GP Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:1044 Base Elevation: -844 Thickness: 396
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks

STRATIGRAPHY: GRETA CM Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:1150 Base Elevation: -950 Thickness: 186
Geologic Description: SANDY PETROMICT CGL, THIN COAL SEAMS, SANDY CARB SLTST, M-VF SUBGWKE WITH SILTY CARB LAM, HARD PY BLK SH, + F PROTOQZITE WITH RARE BRYOZOA
Reported Environment: SHALLOW MARGINAL FRESH WATER ENVIRONMENT, WITH CURRENT ACTION AT BEGINNING + QUIET CONDITIONS AT END OF DEPOSITION (NICHOLAS, 1969)
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL	1046	-846	1.5 CA
COAL INTERVAL	1095	-895	2S

Tertonic Structure:
Remarks: CALLED "MUSWELLBROOK CM" IN COMPLETION REPORT. GEOLOGIC DESCRIPTION - NICHOLAS, 1969. APPROX EQUIV TO BMR UNITS M15-17

STRATIGRAPHY: ALLANDALE FM Age: PERMIAN Interpretation Code:Y188
Basal Information: Depth to Base:TD Base Elevation: -981 * Thickness:)31
Geologic Description: ALTERED INTERMEDIATE TO BASIC VOLCANIC WITH BANDS OF GREYISH-RED CLAY (NICHOLAS, 1969)
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks: APPROXIMATELY EQUIVALENT TO BMR UNIT M16

STRATIGRAPHY: DALWOOD GP Age: PERMIAN Interpretation Code:Y189

Cross Reference: NIXON, W.H., 1970, UNPUBLISHED STRATIGRAPHIC LOG OF CENTRAL COAST OIL TERRIGAL N 0.1

SEDIMENTARY BASIN: SYDNEY, NORTH

STRATIGRAPHY: NARRABEEN GP Age: TRIASSIC Interpretation Code:Y101
Basal Information: Depth to Base:582 Base Elevation: -577 Thickness: 502
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: NEWCASTLE CM Age: PERMIAN Interpretation Code:Y102
Basal Information: Depth to Base:866 Base Elevation: -861 Thickness: 284
Geologic Description: M GR-CGL LT GY QZ LI SST (S'TIMES, CLAY + COAL PARTINGS), LT-M GY F GRAVEL CARB SST, PBL CGL, M-DK GY + BLK SILTY CLST, CARB SLTST, COAL SEAMS
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL	583	-578	0.8
COAL	609	-604	4.4
COAL	625	-620	2.6
COAL	685	-680	2.4

Tectonic Structure:
Remarks LITHOLOGIC DESCRIPTION FROM NIXON, 1970

STRATIGRAPHY: UPPER TOMAGO CM Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:1256 Base Elevation: -1251 Thickness: 390
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks SEE TOMAGO CM

STRATIGRAPHY: KULNURA MARINE TNG Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:1424 Base Elevation: -1419 Thickness: 168
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks SEE TOMAGO CM

STRATIGRAPHY: LOWER TOMAGO CM Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:1798 Base Elevation: -1793 Thickness: 374
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness

Tectonic Structure:
Remarks SEE TOMAGO CM

STRATIGRAPHY: TOMAGO CM Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:1798 Base Elevation: -1793 Thickness: 932
Geologic Description: DK GY CARB MICAC CLST, LT GY F GRAVEL SST WITH SH LAM, COAL SEAMS, M GR-F GRAVEL LI SST, DK GY MICAC SANDY SLTST, MINOR TUFF. SHELL FRAGMENTS
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL INTERVAL	1228	-1223	75
KULMURA MARINE TNG	1424	-1419	168
COAL INTERVAL	1601	-1596	15

Tectonic Structure:
Remarks COAL SEAMS ARE THIN (0.4-1.0 M). LITHOLOGIC DESCRIPTION & COAL INFORMAT

STRATIGRAPHY: MULBRING SLTST Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:TD Base Elevation: -1881* Thickness:)88
Geologic Description: DARK GREY, GREY, AND GREEN-GREY SILTSTONE AND CLAYSTONE. CARBONACEOUS IN PART, SANDY IN PART
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks LITHOLOGIC DESCRIPTION FROM NIXON,1970

STRATIGRAPHY: MAITLAND GP Age: PERMIAN Interpretation Code:Y100
Basal Information: Depth to Base:TD Base Elevation: -1881* Thickness:)88
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF MULBRING SLTST

STRATIGRAPHY: TOMAGO CM Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:1614 Base Elevation: -1416 Thickness: 629
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: MULBRING SLTST Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:2415 Base Elevation: -2217 Thickness: 801
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BRANXTON FM Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:3050 Base Elevation: -2852 Thickness: 635
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: MAITLAND GP Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:3050 Base Elevation: -2852 Thickness: 1436
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF MULBRING SILTSTONE AND BRANXTON FORMATION

STRATIGRAPHY: BASEMENT Age: ? Interpretation Code:Y108
Basal Information: Depth to Base:TD Base Elevation: -2861± Thickness:)9
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks ECONOMIC BASEMENT

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code:Y201
Basal Information: Depth to Base:832 Base Elevation: -634 Thickness: 828
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF WIANAMATTA GP (0-37 M), HAWKESBURY SST (37-241 M), AND NARRABEEN GP (241-832 M). EQUIV TO BMR UNITS D1-7

STRATIGRAPHY: ILLAWARRA CM Age: PERMIAN Interpretation Code:Y202
Basal Information: Depth to Base:1713 Base Elevation: -1515 Thickness: 881
Geologic Description: COAL SEAMS, F-C SUBGWKE, AT TIMES THICKLY BDD SANDY SLTST, RARE CLST. SCOUR + FILL STRUCTURES, BURROWS, LAMNS, SMALL SCALE XBDG.
Reported Environment: TIDAL FLAT, SHALLOW MARINE WITH RESTRICTED WATER CIRCULATION, AND SHALLOW DELTAIC ENVIRONMENTS (HAWKINS AND OZIMIC, 1967)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks GEOLOGIC DESCRIPTION - HAWKINS + OZIMIC, 1967. EQUIV TO BMR UNITS D8-14

STRATIGRAPHY: PERRY SILTSTONE Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:2152 Base Elevation: -1954 Thickness: 439

Geologic Description: SANDY SLTST WITH CHL CLAY + CARB MATTER AND MINOR F SUBGWKE, AND MASS QZ-RICH SANDY PY CARB SLTST WITH CLAY INTBDS + RARE QZ CGWE.
Reported Environment: QUIET SHALLOW MARINE ENVIRONMENT WITH SOME RESTRICTED WATER CIRCULATION. (HAWKINS + OZIMIC, 1967)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks GEOLOGIC DESCRIPTION - HAWKINS + OZIMIC, 1967. SED STRUCTURES - CLAY LAMINATION, BURROWS + SMALL SCALE XRDG. =BMR D15-16

STRATIGRAPHY: NOWRA SANDSTONE Age: PERMIAN Interpretation Code:Y204
Basal Information: Depth to Base:2181 Base Elevation: -1983 Thickness: 29
Geologic Description: MASSIVE, M GRAINED, POORLY SORTED PROTOQUARTZITE CONTAINING PEBBLES (HAWKINS + OZIMIC, 1967)
Reported Environment: DEPOSITION IN AGITATED WATER (HAWKINS + OZIMIC, 1967)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks EQUIVALENT TO BMR UNIT D17

STRATIGRAPHY: WANDRAWANDIAN SLTST Age: PERMIAN Interpretation Code:Y205
Basal Information: Depth to Base:2353 Base Elevation: -2155 Thickness: 172
Geologic Description: SANDY, QUARTZ (50-65%) SILTSTONE WITH A POORLY SORTED QUARTZ GREYWACKE AT THE BASE. SOLITARY CORALS + RARE BRACHIOPODS (HAWKINS + OZIMIC, 1967)
Reported Environment: QUIET SHALLOW MARINE ENVIRONMENT. GREYWACKE - RAPID DEPOSITION UNDER LOW ENERGY CONDITIONS (HAWKINS + OZIMIC, 1967)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks EQUIVALENT TO BMR UNIT D18

STRATIGRAPHY: SNAPPER POINT FM Age: PERMIAN Interpretation Code:Y206
Basal Information: Depth to Base:2757 Base Elevation: -2559 Thickness: 404
Geologic Description: PREDOM SST SEQ. M GR PROTOQUZITE, POORLY SRTD, QZ-RICH (80%) SUBARKOSE, + SLTST WITH CHL + ILL CLAY + DISSEM PY, WITH INTBDD QZ-RICH SST. FORAMS
Reported Environment: SHALLOW MARINE NEAR-SHORE ENVIRONMENT (HAWKINS + OZIMIC, 1967)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks GEOLOGIC DESCRIPTION - HAWKINS + OZIMIC, 1967. EQUIV TO BMR UNITS D19-21

STRATIGRAPHY: PEBBLEY BEACH FM Age: PERMIAN Interpretation Code:Y207
Basal Information: Depth to Base:3045 Base Elevation: -2847 Thickness: 288
Geologic Description: ERYOZOAL MUDSTONE, QZOSE (60%) SLTST, SANDY LIMESTONE, M GR PROTOQUARTZITE, + MUDSTONE CONTAINING 65% ILLITIC CLAY (HAWKINS + OZIMIC, 1967)
Reported Environment: SHALLOW MARINE ENVIRONMENT WHERE OPEN SEA CONDITIONS EXISTED (HAWKINS + OZIMIC, 1967)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks EQUIVALENT TO BMR UNITS D22-24

STRATIGRAPHY: CONJOLA SUB-GP Age: PERMIAN Interpretation Code:Y208
Basal Information: Depth to Base:3045 Base Elevation: -2847 Thickness: 692
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS SNAPPER POINT + PEBBLEY BEACH FORMATIONS

STRATIGRAPHY: SHOALHAVEN GP Age: PERMIAN Interpretation Code:Y209
Basal Information: Depth to Base:3045 Base Elevation: -2847 Thickness: 1332
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS BERRY SLTST, NOWRA SST, WANDRAWANDIAN SLTST, + CONJOLA SUB-GROUP

STRATIGRAPHY: DALWOOD GP Age: PERMIAN Interpretation Code: Y210

Basal Information: Depth to Base: TD Base Elevation: -2861' Thickness:)14

Geologic Description: WEATHERED TUFF WITH REDDISH-BROWN SIDERITIC CRYSTALS. (HAWKINS + OZIMIC, 1967)

Reported Environment: DEPOSITION MAY HAVE TAKEN PLACE IN WATER OUTSIDE THE SPHERE OF TERRIGENOUS INFLUENCE. FROM ACID-INTERMEDIATE VOLCANO (HAWKINS + OZIMIC, 1967)

Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness

Tectonic Structure:

Remarks EQUIVALENT TO BMK UNIT D25

STRATIGRAPHY: BLACKMANS FLAT CGL Age: PERMIAN Interpretation Code:Y112
Basal Information: Depth to Base:88 Base Elevation: +922 Thickness: 1
Geologic Description: UPWARDS-FINING QUARTZ PEBBLE CONGLOMERATES, LITHIC-QUARTZ SANDSTONES, AND MINOR SILTSTONES. HIGH-ANGLE CROSS-BEDDING
Reported Environment:

Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: LITHGOW COAL Age: PERMIAN Interpretation Code:Y113
Basal Information: Depth to Base:91 Base Elevation: +919 Thickness: 3
Geologic Description: COAL, CARBONACEOUS SHALE AND SILTSTONE, + MORE RARELY, OIL SHALE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: MARRANGAROO CGL Age: PERMIAN Interpretation Code:Y114
Basal Information: Depth to Base:96 Base Elevation: +914 Thickness: 5
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: CULLEN BULLEN SUB-GP Age: PERMIAN Interpretation Code:Y115
Basal Information: Depth to Base:96 Base Elevation: +914 Thickness: 12
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS LIDSDALE COAL, BLACKMANS FLAT CGL, LITHGOW COAL + MARRANGAROO CGL

STRATIGRAPHY: NILE SUB-GP Age: PERMIAN Interpretation Code:Y116
Basal Information: Depth to Base:TD Base Elevation: +904 Thickness: 10
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks UNDERLAIN BY BERRY SILTSTONE OF SHOALHAVEN GROUP (PERMIAN)

STRATIGRAPHY: ILLAWARRA CM Age: PERMIAN Interpretation Code:Y117
Basal Information: Depth to Base:TD Base Elevation: +904 Thickness: 106
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS WALLERAWANG, CHARBON, CULLEN BULLEN, AND NILE SUB-GROUPS

CONTROL POINT: BURRAGORANG 1.01

Tectonic Structure:
Remarks

STRATIGRAPHY: NOWRA SANDSTONE Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:1676 Base Elevation: -1103 Thickness: 9
Geologic Description: M-C CARBONATE CEMENTED SUB-GREYWACKE (PITT, 1968)
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BERRY SILTSTONE Age: PERMIAN Interpretation Code:Y204
Basal Information: Depth to Base:1667 Base Elevation: -1094 Thickness: 276
Geologic Description: INTLAMD + INTBDD MICAC CARB SLTST, MUDDY VF QZOSE SUBGWKE, MDST-SANDY SLTST + M-C CARBONATE CMTD QZOSE SUBGWKE. LAMD + MASS BDG, MICRO-XBDG.
Reported Environment: RESTRICTED MARINE, POSSIBLY DEEP LAGOONAL OR GULF, WITH GENTLE, STEADY BOTTOM CURRENTS. SLIGHTLY NEARER TO SHORE + WAVE BASE NEAR BASE OF UNIT.
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks ALSO, ?BIOTURB, PLT FRAGS, WORM TUBES, FORAMS, ?BRACH + ?CRINOID FRAGMENTS. LITHOLOGIES + ENVIRON - PITT, 1968

STRATIGRAPHY: WANDRAWANDIAN SLTST Age: PERMIAN Interpretation Code:Y205
Basal Information: Depth to Base:1890 Base Elevation: -1317 Thickness: 214
Geologic Description: THINLY INTBDD F+C MUDDY QZOSE SUBGWKE, INTLAMD VF QZOSE SUBGWKE + SLTST, + MUDDY VF SUBGWKE. CARB, MICAC. LITHOL MIXING, MICROXBDG (PITT, 1968)
Reported Environment: BELOW WAVE BASE IN A REDUCING MARINE ENVIRONMENT WITH BOTTOM CURRENTS OF VARYING VELOCITY. EVIDENCE OF ICE-RAFTING + GLACIATION (PITT, 1968)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks ALSO, SCALLOP STRUCTURES, BRACHIOPOD FRAGMENTS, AND HORIZONTAL + LARGE VERTICAL WORM TUBES (PITT, 1968)

STRATIGRAPHY: SNAPPER POINT FM Age: PERMIAN Interpretation Code:Y206
Basal Information: Depth to Base:2129 Base Elevation: -1556 Thickness: 239
Geologic Description: INTBDD F+C MUDDY PROTOQZITE-QZOSE SUBGWKE, F QZOSE SUBGWKE, CARB MICAC ARG SED, C CARBONATE CMTD PROTOQZITE. PBLY. MASSIVE + LAMD, MICRO XBDG.
Reported Environment: REDUCING MARINE ENVIRONMENT, WITH VARIABLE ENERGY CONDITIONS. PROTOQZITES MAY REPRESENT OFFSHORE BAR DEVELOPMENTS (PITT, 1968)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks ALSO, BRACH FRAGMENTS, WORM TUBES + CARBONIZED PLANT FRAGMENTS. GEOLOGIC DESCRIPTION FROM PITT, 1968.

STRATIGRAPHY: PEBBLEY BEACH FM Age: PERMIAN Interpretation Code:Y207
Basal Information: Depth to Base:2364 Base Elevation: -1791 Thickness: 235
Geologic Description: INTLAMD ARG SED + F QZOSE SUBGWKE, F+C QZOSE SUBGWKE, INTBDD C SLTST + VF QZOSE SUBGWKE-PROTOQZITE, SL SANDY V CARB PY MDST. PBLY. MASS, SL LAMD
Reported Environment: REDUCING MARINE ENVIRONMENT, WITH VARIABLE ENERGY CONDITIONS. RESTRICTED, VERY LOW ENERGY LAGOONAL ENVIRONMENT AT BASE. GLACIATION? (PITT,1968)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks ALSO, SLIGHTLY MIXED + CONTAINS BRACH FRAGS, WORM TUBES, PY CARB PLT FRAGS + GLENDONITES. LITHOLOGIES FROM PITT, 1968

STRATIGRAPHY: WASP HEAD FORMATION Age: PERMIAN Interpretation Code:Y208
Basal Information: Depth to Base:2399 Base Elevation: -1826 Thickness: 35
Geologic Description: M GR CARBONATE CEMENTED QZOSE SUBGWKE-QZOSE ARKOSE, CARB, PY MDST-SLTST, + ONE V THIN COAL SEAM. THICK FAINTLY LAMD BDG, PLT FRAGS (PITT, 1968)
Reported Environment: REDUCING CONDITIONS IN ALTERNATELY QUIET + AGITATED WATER. PERHAPS TRANSITIONAL BETWEEN LACUSTRINE + LAGOONAL CONDITIONS (PITT, 1968)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness

Tectonic Structure:
Remarks

Feature	Depth	Elevation	Thickness
BALGOWNIE COAL MB	568	-471	2.4
COAL	592	-494	1
WORONORA COAL MEMBER	615	-517	9
NOVICE SST MEMBER	636	-538	21

Tectonic Structure:
Remarks

STRATIGRAPHY: WONGAWILLI COAL Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:643 Base Elevation: -545 Thickness: 7
Geologic Description:
Reported Environment: FLUVIAL
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness

Tectonic Structure:
Remarks COMPOSITE ANALYSIS: A - 38.1% ASH; A EXCL. ASH >40% - 28.9%; A EXCL. ASH >30% - 25.2% ASH

STRATIGRAPHY: KEMBLA SST Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:655 Base Elevation: -557 Thickness: 12
Geologic Description:
Reported Environment: FLUVIAL SYSTEM FLOWING ACROSS AREA IN A NORTHEASTERLY DIRECTION
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL	647	-549	1

Tectonic Structure:
Remarks

STRATIGRAPHY: ALLANS CREEK FM Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:696 Base Elevation: -598 Thickness: 41
Geologic Description:
Reported Environment: THIS FORMATION REPRESENTS THE FINER FLOOD-BASIN FLUVIAL SEDIMENTS
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks

STRATIGRAPHY: DARKES FOREST SST Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:706 Base Elevation: -608 Thickness: 10
Geologic Description:
Reported Environment: FLUVIAL DEPOSITION FROM A CONTRIBUTIVE STREAM SYSTEM FLOWING IN A GENERAL NORTHEASTERLY DIRECTION ACROSS THE AREA
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks

STRATIGRAPHY: BARGO CLST Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:745 Base Elevation: -647 Thickness: 39
Geologic Description:
Reported Environment: AS FOR ALLANS CREEK FM
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks

STRATIGRAPHY: TONGARRA COAL Age: PERMIAN Interpretation Code:Y110
Basal Information: Depth to Base:749 Base Elevation: -651 Thickness: 4
Geologic Description:
Reported Environment: FLUVIAL
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks

STRATIGRAPHY: WILTON FM Age: PERMIAN Interpretation Code:Y111
Basal Information: Depth to Base:852 Base Elevation: -754 Thickness: 103
Geologic Description:
Reported Environment: FLUVIAL FLOOD-BASIN (POINT-BAR - OVERBANK). WOONONA COAL MEMBER - FLUVIAL TO DELTAIC
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
WOONONA COAL MEMBER	852	-754	18

Tectonic Structure:
Remarks

STRATIGRAPHY: SYDNEY SUB-GP Age: PERMIAN Interpretation Code:Y112

Basal Information: Depth to Base:852 Base Elevation: -754 Thickness: 317
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF ALL FORMATIONS FROM BASE OF TRIASSIC TO THIS DEPTH

STRATIGRAPHY: ERINS VALE FM Age: PERMIAN Interpretation Code:Y113
Basal Information: Depth to Base:TD Base Elevation: -820 * Thickness:)66
Geologic Description: KULNURA MARINE TONGUE CONTAINS TERRAKEA SP. AND STROPHALOSIA OVALIS
Reported Environment: FLUVIAL TO DELTAIC. KULNURA MARINE TONGUE - MARINE
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
KULNURA MARINE TONG. TD)43
Tectonic Structure:
Remarks

STRATIGRAPHY: KULNURA MARINE TNG Age: PERMIAN Interpretation Code:Y114
Basal Information: Depth to Base:TD Base Elevation: -820* Thickness:)43
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks SEE ERINS VALE FM

STRATIGRAPHY: CUMBERLAND SUB-GP Age: PERMIAN Interpretation Code:Y115
Basal Information: Depth to Base:TD Base Elevation: -820* Thickness:)66
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF ERINS VALE FM; KULNURA MARINE TNG AT BASE

STRATIGRAPHY: ILLAWARRA CM Age: PERMIAN Interpretation Code:Y116
Basal Information: Depth to Base:TD Base Elevation: -820* Thickness:)394
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF SYDNEY AND CUMBERLAND SUB-GP

SEDIMENTARY BASIN: SYDNEY, SOUTH

STRATIGRAPHY: UNDIFF CAINOZOIC Age: CAINOZOIC Interpretation Code:Y101
Basal Information: Depth to Base:18 Base Elevation: +1 Thickness: 14
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BERRY SILTSTONE Age: PERMIAN Interpretation Code:Y102
Basal Information: Depth to Base:134 Base Elevation: -115 Thickness: 116
Geologic Description: MEDIUM HARD, DARK GREY MICACEOUS CARBONACEOUS SILTSTONE WITH SCATTERED SAND GRAINS. SOME IRREGULAR LAMINATION
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: NOWRA SANDSTONE Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:271 Base Elevation: -252 Thickness: 137
Geologic Description: WHITE, CREAM, PALE GREY, FINE-COARSE GRAINED QUARTZ SST WITH SCATTERED PEBBLES. CEMENTED BY SILICA. MINOR PYRITE, GLAUCONITE. TWO BASALTIC MBS
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
BASALT-BASALTIC TUFF	149	-130	15
BASALT-BASALTIC TUFF	238	-219	26

Tectonic Structure:
Remarks

STRATIGRAPHY: WANDRAWANDIAN SLTST Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:337 Base Elevation: -318 Thickness: 66
Geologic Description: MEDIUM HARD, DK GY, MICACEOUS, CARBONACEOUS SANDY SILTSTONE WITH SCATTERED PEBBLES OF QZITE, QZ AND IGNEOUS ROCK; PYRITE, GLAUCONITE; BRACHS
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: SNAPPER POINT FM Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:437 Base Elevation: -418 Thickness: 100
Geologic Description: PBLY SST, LT GY M-C POORLY SRTD QZ SST-QZWACKE WITH PY + GLAUC, DK GY MICAC CARB SANDY + PBLY SLTST WITH PY + GLAUC, AND PEBBLE CONGLOMERATE

Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED CONJOLA FM BY CONDON

STRATIGRAPHY: PEBBLEY BEACH FM Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:511 Base Elevation: -492 Thickness: 74
Geologic Description: DK GY, MICAC CARB SLTST WITH PY, GLAUC + SAND GRS, AND MINOR M GR, POORLY SRTD QUARTZWACKE AND FISSILE BLK CARB SH; BRACHIOPODS COMMON IN SLTST
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED PIGEON HOUSE CREEK SILTSTONE BY CONDON

STRATIGRAPHY: CONJOLA SUB-GP Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:511 Base Elevation: -492 Thickness: 174
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF SNAPPER POINT AND PEBBLEY BEACH FORMATIONS

STRATIGRAPHY: SHOALHAVEN GP Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:511 Base Elevation: -492 Thickness: 493
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BERRY SILTSTONE, NOWRA SANDSTONE, WANDRAWANDIAN SILTSTONE, AND CONJOLA SUB-GROUP

STRATIGRAPHY: CLYDE COAL MEASURES Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:579 Base Elevation: -560 Thickness: 68
Geologic Description: DK GY-DK BR CARB SHALE, M GR QZ SST WITH SILIC AND CALC CEMENT, DK GY MICAC CARB SILTSTONE, AND HARD, BLACK ?BITUMINOUS COAL BEDS, SOME SHALY
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL INTERVAL	531	-512	14
COAL	545	-526	3
COAL INTERVAL	576	-557	5

Tectonic Structure:
Remarks

STRATIGRAPHY: CONGLOMERATE Age: PERMIAN Interpretation Code:Y110
Basal Information: Depth to Base:718 Base Elevation: -699 Thickness: 139
Geologic Description: DK GY-GN PEBBLE CONGLOMERATE, WITH ROUNDED-SUBANGULAR PEBBLES OF QZ, QZITE, SILICIFIED SST, PHYLLITE AND IGNEOUS RX IN F-C GR SILIC GWKE MATRIX
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BASEMENT Age: E. PALAEOZOIC Interpretation Code:Y111
Basal Information: Depth to Base:TD Base Elevation: -778 ± Thickness: 779
Geologic Description: GRANITE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness

Tectonic Structure:
Remarks

STRATIGRAPHY: WANDRAWANDIAN SLTST Age: PERMIAN Interpretation Code:Y201
Basal Information: Depth to Base:134 Base Elevation: -115 Thickness: 130
Geologic Description:
Reported Environment: MODERATELY DEEP SHELF. STRONG CURRENTS PERIODICALLY ACTIVE. PEBBLES, PEBBLE CLUSTERS + MEGACLASTS MAY REPRESENT "DROPPED PEBBLES" FROM ICE RAFTS
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: SNAPPER POINT FM Age: PERMIAN Interpretation Code:Y202
Basal Information: Depth to Base:272 Base Elevation: -253 Thickness: 138
Geologic Description:
Reported Environment: SHALLOW MARINE, HIGH ENERGY ENVIRONMENT ABOVE WAVE BASE. SOME DEPOSITION IN SUB-TIDAL + SHELTERED ENVIRONMENT AND SOME DEPOSITION FROM ICE-FLOES
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
CURRAMBENE DOLERITE 149 -131 15
PORPHYRITIC DOLERITE 238 -219 22
Tectonic Structure:
Remarks CURRAMBENE DOLERITE:- K-AR DATING ESTABLISHED AN AGE OF 234 +/- 6 M.Y. (LATE PERMIAN)

STRATIGRAPHY: PEBBLEY BEACH FM Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:512 Base Elevation: -493 Thickness: 240
Geologic Description: PEBBLY QUARTZOSE SST, MODERATELY TO POORLY SORTED WITH 90% OF GRAINS QUARTZ, 10% ROCK FRAGMENTS. SOME CARBONATE, POSSIBLY SIDERITE
Reported Environment: LOWER 2/3 - SHALLOW SHELF WITH FLOATING ICE DAMPENING WAVES + REDUCING EFFECTIVE WAVE BASE; ICE-RAFTING. UPPER 1/3 - SUBTIDAL + TIDAL FLATS
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: CONJOLA SUB-GP Age: PERMIAN Interpretation Code:Y204
Basal Information: Depth to Base:512 Base Elevation: -493 Thickness: 378
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF SNAPPER POINT FM AND PEBBLEY BEACH FM

STRATIGRAPHY: SHOALHAVEN GP Age: PERMIAN Interpretation Code:Y205
Basal Information: Depth to Base:512 Base Elevation: -493 Thickness: 508
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF WANDRAWANDIAN SILTSTONE AND CONJOLA SUB-GROUP

STRATIGRAPHY: YARRUNGA FM Age: PERMIAN Interpretation Code:Y206
Basal Information: Depth to Base:577 Base Elevation: -558 Thickness: 65
Geologic Description:
Reported Environment: TERRESTRIAL, FLUVIAL (MEANDERING), CHANNEL, AND OVERBANK (FLOODPLAIN) DEPOSITIONAL ENVIRONMENTS
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks THESE FORMATION PICKS USED FOR STRUCTURE AND ISOPACH MAPS.

STRATIGRAPHY: TALLONG CGL Age: CARBONIFEROUS Interpretation Code:Y207

Basal Information: Depth to Base:717 Base Elevation: -698 Thickness: 140
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BASEMENT Age: E. PALAEOZOIC Interpretation Code:Y200

SEDIMENTARY BASIN: SYDNEY, SOUTH

STRATIGRAPHY: WANDRAWANDIAN SLTST Age: PERMIAN Interpretation Code:Y101
Basal Information: Depth to Base:60 Base Elevation: -45 Thickness: 60
Geologic Description: DK GY SL PBLY + SILTY F SSTS. SLTSTS DOM NEAR TOP. ERRATICS ABND TOWARDS BASE. PROLIFIC MARINE FAUNA IN SLTSTS. CARBONATE CONCRETIONS, GLBND, PY
Reported Environment: QUIET MARINE CONDITIONS WITH ICE-RAFTING (DICKINS ET AL., 1969)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure: LOW ANGLE THRUSTS, VERT IG DYKES, SLUMPS
Remarks MARINE FAUNA - PRODUCTIDS, FENESTELLIDS, CRINOIDS. CALLED "ULLADULLA MBST" IN REFS. GEOL.DESCRIPT - DICKINS ET AL., 1969

STRATIGRAPHY: SNAPPER POINT FM Age: PERMIAN Interpretation Code:Y102
Basal Information: Depth to Base:230 Base Elevation: -215 Thickness: 170
Geologic Description: WELL-BDD, QZ-RICH, F SSTS WITH THIN LAYERS C PBLY SST + PBL CGLS. MARINE FOSS + SILTY WORM BURROWS T'OUT. CALCITE, PY, SID CONCRETIONS
Reported Environment: OPEN-MARINE, LITTORAL TO SHALLOW NERITIC CONDITIONS, WITH ONLY A FEW PERIODS OF SHELTERED MARINE SEDIMENTATION (DICKINS ET AL., 1969)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure: DIPS 3-4 (BUT UP TO 11 + 18) DGS EAST
Remarks GEOLOGIC DESCRIPTION - DICKINS ET AL., 1969. THICKNESSES OF SNAPPER POINT, PEBBLEY BEACH & WASP HEAD FMS APPROXIMATE.

STRATIGRAPHY: PEBBLEY BEACH FM Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:390 Base Elevation: -375 Thickness: 160
Geologic Description: DK GY SLTST + VF SST WITH THIN BDS PBLS, DIAMICTITE (PBLY SILTY M SST) + ERRATICS. U-SHAPED SCOUR CHANNELS: SLTST, VF SST, COALY STRINGERS
Reported Environment: LOWER PART - RELATIVELY SHALLOW MARINE. UPPER THIRD - SUB-TIDAL AND TIDAL FLAT CONDITIONS (GOSTIN, 1969)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure: DIPS 2-3 DEGREES EAST
Remarks ALSO CONTAINS CARBONATE CONCRETIONS; DISSEM PY, MARINE + PLT FOSS, ORG BURROWS. GEOL. DESCRIPT. - DICKINS ET AL., 1969

STRATIGRAPHY: WASP HEAD FORMATION Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:TD Base Elevation: -475 Thickness: 100
Geologic Description: SED BRECCIA UNITS INTBDD WITH + OVERLAIN BY XBDD LI SST WITH THIN BDS CHERT PBL CGL + SILTY F SST WITH THIN PBL CGL BDS; MAR FOSS, WORM BURROWS
Reported Environment: OPEN-MARINE CONDITIONS (I.E. DIRECTLY AFFECTED BY MARINE SWELL). CLOSE TO THE SHORELINE (GEOL. DESCRIPT. + REP. ENVIRON. - DICKINS ET AL., 1969)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure: DIPS 6 DEGREES ENE
Remarks ALSO CONTAINS NUMEROUS LARGE BOULDERS + PLANT FRAGMENTS. UNCONFORMABLY UNDERLAIN BY LOWER PALAEOZOIC WAGONGA BEDS

STRATIGRAPHY: CONJOLA SUB-GP Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:TD Base Elevation: -475 Thickness: 430
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness

STRATIGRAPHY: NOWRA SANDSTONE Age: PERMIAN Interpretation Code:Y101
Basal Information: Depth to Base:79 Base Elevation: +640 Thickness: 79
Geologic Description: MEDIUM-COARSE QUARTZ SANDSTONE CONTAINING NUMEROUS GRANULES + PEBBLES OF QUARTZ. SOME SILTY BANDS THROUGHOUT
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: WANDRAWANDIAN SLTST Age: PERMIAN Interpretation Code:Y102
Basal Information: Depth to Base:201 Base Elevation: +518 Thickness: 122
Geologic Description: M-C, PEBBLY QZ SST, FINE SST, QZ SLTST, AND GY, MICAC SLTST WITH MUD SWIRLS AND SCATTERED QZ + QZITE PEBBLES; ABUNDANT PELECYPOD + SPIRIFER FOSS
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: CONJOLA SUB-GP Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:282 Base Elevation: +437 Thickness: 81
Geologic Description: FINE, LT GREY, MICAC QUARTZ SANDSTONE WITH MUD SWIRLS, COARSE, QUARTZ-FELDSPATHIC, PEBBLY SANDSTONE, AND WHITE SHALY SANDSTONE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: SHOALHAVEN GP Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:282 Base Elevation: +437 Thickness: 282
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF NOWRA SANDSTONE, WANDRAWANDIAN SILTSTONE AND CONJOLA SUB-GROUP

STRATIGRAPHY: YADDORO CONGLOMERATE Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:329 Base Elevation: +390 Thickness: 47
Geologic Description: CONGLOMERATE, WITH SMALL LENSES OF GREY SHALE AND SANDY BANDS
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: CLYDE COAL MEASURES Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:TD Base Elevation: +386 Thickness: 4

Geologic Description: DK GREY CARBONACEOUS SHALE, COALY IN PART, AND LIGHT GREY, MEDIUM-COARSE GRAINED, CARBONACEOUS, MASSIVE, QUARTZ-FELDSPATHIC SANDSTONE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks TD REPRESENTS BASE OF CLYDE COAL MEASURES. IMMEDIATELY, UNCONFORMABLY UNDERLAIN BY OLDER PALAEOZOIC

CONTROL POINT: POINTER GAP

REFERENCE # S122

STRATIGRAPHY: NOWRA SANDSTONE Age: PERMIAN Interpretation Code:Yi01
Basal Information: Depth to Base:47 Base Elevation: +433 Thickness: 47
Geologic Description:
Reported Environment: DEPOSITED AS TABULAR BODY OF SST DURING A TRANSGRESSION IN ENVIRONMENT OF HIGH TURBULENCE + SOME STRONG CURRENTS. SOME ICE-FLOES (COSTIN, 1968)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks BASAL PART OF NOWRA SANDSTONE YIELDS AN ABUNDANT WELL-PRESERVED FAUNA (NEAR TOP OF POINTER GAP ROAD)

STRATIGRAPHY: WANDRAWANDIAN SLTST Age: PERMIAN Interpretation Code:Yi02
Basal Information: Depth to Base:182 Base Elevation: +298 Thickness: 135
Geologic Description:
Reported Environment: DEPOSITION PROBABLY OCCURRED ON A SHALLOW MARINE SHELF BENEATH A COVER OF ICE-FLOES (COSTIN, 1968, 28)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks UPPERMOST PART OF WANDRAWANDIAN SILTSTONE YIELDS AN ABUNDANT WELL-PRESERVED FAUNA (NEAR TOP OF POINTER GAP ROAD)

STRATIGRAPHY: CONJOLA SUB-GP Age: PERMIAN Interpretation Code:Yi03
Basal Information: Depth to Base:TD Base Elevation: +40 ± Thickness: 258
Geologic Description: CONJOLA CREEK - SLIGHTLY PEBBLY, COARSE GRAINED SANDSTONE CONTAINING NUMEROUS MARINE FOSSILS
Reported Environment: SHALLOW-MODERATE DEPTH MARINE TO SUB-TIDAL (COSTIN, 1968, FIG. 2-6)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks AT CONJOLA CK ON PRINCES HIGHWAY, CONJOLA SUB-GROUP UNCONFORMABLY OVERLIES ORDOVICIAN ARGILLITES INTRUDED BY A GRANITE

GEOLOGY OF THE SYDNEY BASIN - A REVIEW
BUREAU OF MINERAL RESOURCES BULLETIN 149
Page
Publn Year: 1974
Cross Reference:

SEDIMENTARY BASIN: SYDNEY, SOUTH

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code:X101
Basal Information: Depth to Base:521 Base Elevation: -164 Thickness: 518
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: DARKES FOREST SST Age: PERMIAN Interpretation Code:X102
Basal Information: Depth to Base:687 Base Elevation: -330 Thickness:
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: SYDNEY SUB-GP Age: PERMIAN Interpretation Code:X103
Basal Information: Depth to Base:753 Base Elevation: -396 Thickness: 232
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks: INCLUDES DARKES FOREST SST

STRATIGRAPHY: CUMBERLAND SUB-GP Age: PERMIAN Interpretation Code:X104
Basal Information: Depth to Base:1141 Base Elevation: -784 Thickness: 388
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ILLAWARRA CM Age: PERMIAN Interpretation Code:X105
Basal Information: Depth to Base:1141 Base Elevation: -784 Thickness: 620
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks BASE OF ILLAWARRA CM IS UNCERTAIN, AS THE MARINE TO TERRESTRIAL SEQUENCE IS TRANSITIONAL

STRATIGRAPHY: SHOALHAVEN GP Age: PERMIAN Interpretation Code:X106
Basal Information: Depth to Base:2278 Base Elevation: -1921 Thickness: 1137
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BASEMENT Age: ? Interpretation Code:X107
Basal Information: Depth to Base:TD Base Elevation: -1956* Thickness: >35
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code:Y101
Basal Information: Depth to Base:521 Base Elevation: -164 Thickness: 518
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF HAWKESBURY SST AND NARRABEEN GP. THE FOLLOWING STRATIGRAPHIC INTERPRETATION IS THAT OF THE COMPANY, A.O.G.

STRATIGRAPHY: SYDNEY SUB-GP Age: PERMIAN Interpretation Code:Y102
Basal Information: Depth to Base:671 Base Elevation: -314 Thickness: 150
Geologic Description: COAL (BLK, VITR OR DULL, SILTY), CARB SH, CARB SLTST, AND MINOR LITHIC SST, CHERT-RICH PROTOQZITE + ANDESITIC VOLCS; SOME LAMN; PLANT REMAINS
Reported Environment: SWAMP CONDITIONS TO QUIET WATER IN CONTINENTAL ENVIRONMENT, E.G. LAKE FED BY SLUGGISH STREAMS
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL INTERVAL	530	-173	8
COAL	611	-254	1
COAL	661	-314	2

Tectonic Structure:
Remarks CALLED ILLAWARRA CM BY ALCOCK. APPROX EQUIV TO BMR UNITS W15-17

STRATIGRAPHY: CUMBERLAND SUB-GP Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:1042 Base Elevation: -685 Thickness: 371
Geologic Description: COAL, QZ-RICH SST, LITHIC GWKE, VOLC SUBGWKE, SHALE, CARB SHALE, MUDSTONE, SLTST, AND F GR CHERT-RICH PROTOQZITE; SOME SLTST LAMD; PLANT REMAINS
Reported Environment: QUIET WATER (LAGOON, LAKE OR FLOODPLAIN) ENVIRONMENT. AT BASE, PARTLY SWAMPY, PARTLY FLUVIAL ENVIRONMENT
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL	722	-365	2
COAL INTERVAL	864	-507	11
COAL INTERVAL	1042	-685	159

Tectonic Structure:
Remarks CALLED CUMBERLAND CM BY ALCOCK. EQUIVALENT TO BMR UNITS W17-21. NUMEROUS THIN SEAMS IN LOWEST COAL INTERVAL.

STRATIGRAPHY: ILLAWARRA CM Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:1042 Base Elevation: -685 Thickness: 521
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF SYDNEY AND CUMBERLAND SUB-GROUPS

STRATIGRAPHY: BUDGONG SANDSTONE Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:1210 Base Elevation: -853 Thickness: 168
Geologic Description: DOLOMITIC VOLC-RICH SUBGWKE, DOLOMITIC PROTOQZITE, AND MINOR CARB SH, SLTST AND COAL; BURROWING, BIOTURB, SOME XBDG, SHELL REMAINS AT BASE
Reported Environment: RESTRICTED MARINE AT BASE, AT TOP, COASTAL PLAIN-ESTUARINE (FLUVIAL, TIDAL AND SWAMPY CONDITIONS)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks APPROX EQUIVALENT TO BMR UNITS W22-23

STRATIGRAPHY: BERRY SILTSTONE Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:1731 Base Elevation: -1374 Thickness: 521
Geologic Description: SANDY, MICAC SLTST, SLTST, F GR PROTOQZITE, SHALE, F GR SUBGWKE, F LITHIC GWKE, QZ-RICH SST, AND MUDSTONE; SOME LAMN, XLAMN, RIPPLE MARKS, FOSS
Reported Environment: IN GENERAL, QUIET, LOW ENERGY MARINE. KEDUMBA CREEK SST MB - HIGHER ENERGY MARINE
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
KEDUMBA CK SST MB 1603 -1246 47
Tectonic Structure:
Remarks APPROX EQUIVALENT TO BMR UNITS W24-31. KEDUMBA CK SST MB EQUIV TO BMR UNITS W29-30

STRATIGRAPHY: NOWRA SANDSTONE Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:1885 Base Elevation: -1528 Thickness: 154
Geologic Description: INTBDD ORTHOQUARTZITE-PROTOQUARTZITE + FELDSPATHIC SST, F LITHIC SST, SANDY SLTST + VOLCANIC SUBGREYWACKE; LOW ANGLE CROSS-BEDDING
Reported Environment: NEARSHORE OR CONTINENTAL (AGITATED FLOWING WATER) AT BASE AND LOW ENERGY CONDITIONS AT TOP
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks EQUIVALENT TO BMR UNITS W32-33

STRATIGRAPHY: WANDRAWANDIAN SLTST Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:2230 Base Elevation: -1873 Thickness: 345
Geologic Description: INTBDD PROTOQZITE, F SUBGWKE, GREY SANDY SLTST, FELDSPATHIC SST, QZ GWKE, QZ-RICH SST; CARB FRAGMENTS (SOME COAL), BIOTURB, MARINE FOSSILS
Reported Environment: GENERALLY LOW ENERGY MARINE, AT TIMES HIGHER ENERGY
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks EQUIVALENT TO BMR UNITS W34-39

STRATIGRAPHY: SNAPPER POINT FM Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:2278 Base Elevation: -1921 Thickness: 48
Geologic Description: PROTOQUARTZITE + FELDSPATHIC SST. SOME PEBBLY HORIZONS + SILTSTONE BEDS, RARE SPINES AND (?)FORAMINIFERA
Reported Environment: MARINE
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks EQUIVALENT TO BMR UNIT W40

STRATIGRAPHY: CONJOLA SUB-GP Age: PERMIAN Interpretation Code:Y110
Basal Information: Depth to Base:2278 Base Elevation: -1921 Thickness: 48
Geologic Description:
Reported Environment:

Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF SNAPPER PT. FM

STRATIGRAPHY: SHOALHAVEN GP Age: PERMIAN Interpretation Code:Y111
Basal Information: Depth to Base:2278 Base Elevation: -1921 Thickness: 1236
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BUDGONG SST - CONJOLA SUB-GROUP

STRATIGRAPHY: BASEMENT Age: CARBONIFEROUS?Interpretation Code:Y112
Basal Information: Depth to Base:TD Base Elevation: -1956* Thickness: >35
Geologic Description: GRANITE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code:Y201
Basal Information: Depth to Base:512 Base Elevation: -155 Thickness: 509
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ILLAWARRA CM Age: PERMIAN Interpretation Code:Y202
Basal Information: Depth to Base:1190 Base Elevation: -833 Thickness: 678
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: SHOALHAVEN GP Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:2280 Base Elevation: -1923 Thickness: 1090
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BASEMENT Age: CARBONIFEROUS?Interpretation Code:Y204
Basal Information: Depth to Base:TD Base Elevation: -1956* Thickness: >33
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

CONTROL POINT: YARRUNGA CREEK

SEDIMENTARY BASIN: SYDNEY, SOUTH

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code:X101
Basal Information: Depth to Base:269 Base Elevation: +247 Thickness: 269
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BULLI COAL Age: PERMIAN Interpretation Code:X102
Basal Information: Depth to Base:270 Base Elevation: +246 Thickness: 1
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ECKERSLEY FM Age: PERMIAN Interpretation Code:X103
Basal Information: Depth to Base:281 Base Elevation: +235 Thickness: 11
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: WONGAWILLI COAL Age: PERMIAN Interpretation Code:X104
Basal Information: Depth to Base:287 Base Elevation: +229 Thickness: 6
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: KEMBLA SST Age: PERMIAN Interpretation Code:X105
Basal Information: Depth to Base:294 Base Elevation: +222 Thickness: 7
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ALLANS CREEK FM Age: PERMIAN Interpretation Code:X106
Basal Information: Depth to Base:308 Base Elevation: +208 Thickness: 14
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: DARKES FOREST SST Age: PERMIAN Interpretation Code:X107
Basal Information: Depth to Base:317 Base Elevation: +199 Thickness: 9
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BARGO CLST Age: PERMIAN Interpretation Code:X108
Basal Information: Depth to Base:319 Base Elevation: +197 Thickness: 2
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: TONGARRA COAL Age: PERMIAN Interpretation Code:X109
Basal Information: Depth to Base:320 Base Elevation: +196 Thickness: 1
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: WILTON FM Age: PERMIAN Interpretation Code:X110
Basal Information: Depth to Base:338 Base Elevation: +178 Thickness: 18
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: SYDNEY SUB-GP Age: PERMIAN Interpretation Code:X111
Basal Information: Depth to Base:338 Base Elevation: +178 Thickness: 69
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks: CONTAINS ALL UNITS BETWEEN 269-338 M

STRATIGRAPHY: CUMBERLAND SUB-GP Age: PERMIAN Interpretation Code:X112
Basal Information: Depth to Base:362 Base Elevation: +154 Thickness: 24

Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ILLAWARRA CM Age: PERMIAN Interpretation Code:X113
Basal Information: Depth to Base:362 Base Elevation: +154 Thickness: 93
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS SYDNEY & CUMBERLAND SUB-GROUPS

STRATIGRAPHY: SHOALHAVEN GP Age: PERMIAN Interpretation Code:X114
Basal Information: Depth to Base:TD Base Elevation: -166 * Thickness:)320
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code:Y101
Basal Information: Depth to Base:269 Base Elevation: +247 Thickness: 269
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ILLAWARRA CM Age: PERMIAN Interpretation Code:Y102
Basal Information: Depth to Base:362 Base Elevation: +154 Thickness: 93
Geologic Description: COAL, STONY COAL, GREY-DK GREY SHALE, CARBONACEOUS SHALE, SANDSTONE, SHALY SANDSTONE AND CHERT
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL-BULLI SEAM	270	+246	1
COAL-WONGAWILLI SEAM	287	+229	6
COAL-TONGARRA SEAM	320	+196	1

Tectonic Structure:
Remarks

STRATIGRAPHY: BERRY SILTSTONE Age: PERMIAN Interpretation Code:Y103
Basal Information: Depth to Base:TD Base Elevation: -166 * Thickness:)321
Geologic Description: SANDSTONE, OCCASIONALLY PEBBLY FINE SANDSTONE, CHERT. MARINE FOSSILS (SHELLS)
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED CAPERTEE GROUP IN REFERENCE

STRATIGRAPHY: SHOALHAVEN GP Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:TD Base Elevation: -166 * Thickness:)321
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BERRY SILTSTONE

SEDIMENTARY BASIN: COO. ER

STRATIGRAPHY: EROMANGA BASIN SEQ. Age: JURASSIC-CRET Interpretation Code:X100
Basal Information: Depth to Base:1769 Base Elevation: -1696 Thickness: 1769
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: NAPPAMERRI FM Age: TRIASSIC Interpretation Code:X101
Basal Information: Depth to Base:1864 Base Elevation: -1791 Thickness: 95
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks FORMATION PICK FROM WILTSHIRE, 1975

STRATIGRAPHY: TOOLACHEE FM Age: PERMIAN Interpretation Code:X102
Basal Information: Depth to Base:1996 Base Elevation: -1923 Thickness: 132
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: DARALINGIE BEDS Age: PERMIAN Interpretation Code:X103
Basal Information: Depth to Base:2030 Base Elevation: -1957 Thickness: 34
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks THICKNESS FROM CROSS-SECTION F-F (THORNTON, 1979)

STRATIGRAPHY: ROSENEATH SH Age: PERMIAN Interpretation Code:X104
Basal Information: Depth to Base:2095 Base Elevation: -2022 Thickness: 65
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks THICKNESS FROM CROSS-SECTION F-F (THORNTON, 1979)

STRATIGRAPHY: EPSILON FM Age: PERMIAN Interpretation Code:X105

Basal Information: Depth to Base:2164 Base Elevation: -2091 Thickness: 69
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: MURTEREE SH Age: PERMIAN Interpretation Code:X106
Basal Information: Depth to Base:2227 Base Elevation: -2154 Thickness: 63
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: PATCHAWARRA FM Age: PERMIAN Interpretation Code:X107
Basal Information: Depth to Base:2346 Base Elevation: -2273 Thickness: 119
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks THICKNESS FROM CROSS-SECTION F-F (THORNTON, 1979)

STRATIGRAPHY: GIDGEALPA GP Age: PERMIAN Interpretation Code:X108
Basal Information: Depth to Base:2346 Base Elevation: -2273 Thickness: 481
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS TOOLACHEE FM, DARALINGIE BEDS, ROSENEATH SH, EPSILON FM, MURTEREE SH & PATCHAWARRA FM

STRATIGRAPHY: BASEMENT Age: PRE-PERMIAN Interpretation Code:X109
Basal Information: Depth to Base:TD Base Elevation: -2281# Thickness:)8

Basal Information: Depth to Base:TD Base Elevation: -2425 Thickness: >419
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ROLLING DOWNS GP Age: CRETACEOUS Interpretation Code:Y101
Basal Information: Depth to Base:692 Base Elevation: -372 Thickness: 688
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS TAMBO & ROMA FMS OF COMPLETION REPORT

STRATIGRAPHY: UNDIFF JURASSIC-CRET Age: JURASSIC-CRET Interpretation Code:Y102
Basal Information: Depth to Base:965 Base Elevation: -645 Thickness: 273
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED BLYTHESDALE FM IN COMPLETION REPORT

STRATIGRAPHY: BIRKHEAD FM Age: JURASSIC Interpretation Code:Y103
Basal Information: Depth to Base:1084 Base Elevation: -764 Thickness: 119
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED WALLOON FM IN COMPLETION REPORT

STRATIGRAPHY: HUTTON SST Age: JURASSIC Interpretation Code:Y104
Basal Information: Depth to Base:1319 Base Elevation: -999 Thickness: 235
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code:Y105
Basal Information: Depth to Base:1422 Base Elevation: -1102 Thickness: 183
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF UPPER PERMIAN Age: LATE PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:1506 Base Elevation: -1186 Thickness: 84
Geologic Description: CORE 1: MH-GY, M-VC (PREDOM C), SUBANGULAR-ROUNDED, POORLY-MODERATELY SORTED SANDSTONE. POSSIBLE GRADED BEDDING
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
CORE 1	1471	-1151	5
COAL	1480	-1140	(1

Tectonic Structure:
Remarks PALYNOSTRATIGRAPHY PROBABLY UPPER STAGE 5 (AT 1476 M) (NORVICK, 1974)

STRATIGRAPHY: UNDIFF LOWER PERMIAN Age: EARLY PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:1757 Base Elevation: -1387 Thickness: 201
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks UNCONFORMITY AT BASE. PALYNOSTRATIGRAPHY ?STAGE 1 (AT 1605 M) (NORVICK, 1974)

STRATIGRAPHY: BUCKABIE FM Age: DEVONIAN-CARB Interpretation Code:Y108
Basal Information: Depth to Base:1826 Base Elevation: -1506 Thickness: 119
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ETONVALE FM Age: DEVONIAN Interpretation Code:Y109
Basal Information: Depth to Base:2326 Base Elevation: -2006 Thickness: 508
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BURY LST Age: DEVONIAN Interpretation Code:Y110
Basal Information: Depth to Base:TD Base Elevation: -2425m Thickness:)419

SEDIMENTARY BASIN: GALILEE

STRATIGRAPHY: WALLOON CM EQUIV Age: JURASSIC Interpretation Code:X101
Basal Information: Depth to Base:815 Base Elevation: -588 Thickness: 63
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: EROMANGA BASIN SEQ. Age: JURASSIC-CRET Interpretation Code:X102
Basal Information: Depth to Base:910 Base Elevation: -683 Thickness: 907
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks INCLUDES WALLOON CM EQUIV

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code:X103
Basal Information: Depth to Base:1041 Base Elevation: -814 Thickness: 131
Geologic Description:
Reported Environment:
Interpreted Environment:POINT BAR SANDS & DISTRIBUTARY CHANNEL FILL IN LOWER PART
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA FM EQUIV Age: PERMIAN Interpretation Code:X104
Basal Information: Depth to Base:1177 Base Elevation: -950 Thickness: 136
Geologic Description:
Reported Environment:
Interpreted Environment:UPPER DELTA PLAIN FLUVIAL DEPOSITION
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks UNCONFORMITY AT BASE. TOP OF FM AT UPPERMOST COAL SEAM

STRATIGRAPHY: ARAMAC CM Age: PERMIAN Interpretation Code:X105
Basal Information: Depth to Base:1342 Base Elevation: -1015 Thickness: 65
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks BASE OF FM AT LOWERMOST COAL SEAM (DISTINGUISHABLE ON SP & R LOGS)

STRATIGRAPHY: UNDIFF JOE JOE GP Age: CARB-PERMIAN Interpretation Code:X106
Basal Information: Depth to Base:1462 Base Elevation: -1235 Thickness: 220
Geologic Description:
Reported Environment:
Interpreted Environment:FLUVIAL - UPPER DELTA PLAIN
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: JOE JOE GP Age: CARB-PERMIAN Interpretation Code:X107
Basal Information: Depth to Base:1462 Base Elevation: -1235 Thickness: 285
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS ARAMAC CM & UNDIFF JOE JOE GROUP

STRATIGRAPHY: BASEMENT Age: ? Interpretation Code:X108
Basal Information: Depth to Base:TD Base Elevation: -1238* Thickness:)3
Geologic Description: PORPHYRITIC ADAMELLITE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ROLLING DOWNS GP Age: CRETACEOUS Interpretation Code:Y101
Basal Information: Depth to Base:636 Base Elevation: -409 Thickness: 633
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF JURASSIC-CRET Age: JURASSIC-CRET Interpretation Code:Y102

Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: HUTTON SST Age: JURASSIC Interpretation Code:Y104
Basal Information: Depth to Base:911 Base Elevation: -684 Thickness: 96
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code:Y105
Basal Information: Depth to Base:1042 Base Elevation: -815 Thickness: 131
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED BROOKWOOD BEDS IN COMPLETION REPORT

STRATIGRAPHY: BETTS CREEK BEDS Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:1264 Base Elevation: -1037 Thickness: 222
Geologic Description: INTBDD COAL & M-VC PDORLY SRTD PARTLY ARKOSIC LITHIC MICAC CARB SST WITH CLAY CEMENT, & MINOR m-DK GY & BR CARB PARTLY SANDY SHALE & SILTSTONE
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL INTERVAL: 2 SMS	1052	-825	11 CA
COAL INTERVAL	1149	-922	64 CA
COAL INTERVAL	1204	-977	32 CA
COAL INTERVAL	1243	-1016	20 CA

Tectonic Structure:
Remarks 1 M COAL SEAM AT 1059 M DEPTH. PALYNOLOGICAL ASSEMBLAGE INDICATES AN UPPER PERMIAN AGE (UPPER STAGE 5 - NORVICK, 1974)

STRATIGRAPHY: JOE JOE GP Age: CARB-PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:1462 Base Elevation: -1235 Thickness: 198
Geologic Description: SST, SH, SLTST SEQ SIMILAR TO ABOVE BUT WITH ONLY MINOR COAL. SST MORE ARKOSIC + MICAC WITH DEPTH. LOWER 17 M: M-C V ARK MICAC LI SST - PBL CGL
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL INTERVAL	1339	-1112	26 CA
PLAYNOLOGICAL SAMPLE	1352	-1125	
PALYNOLOGICAL SAMPLE	1446	-1219	

Tectonic Structure:
Remarks 1314-1338: SUGGESTIVE OF WEATHERED ZONE; MAY INDICATE DEPOSITIONAL BREAK PALYNOSTRATIGRAPHY - STAGE 2 (NORVICK, 1974)

STRATIGRAPHY: BASEMENT Age: ? Interpretation Code:Y108
Basal Information: Depth to Base:TD Base Elevation: -1238# Thickness:)3
Geologic Description: PORPHYRITIC ADAMELLITE
Reported Environment:

SEDIMENTARY BASIN: GALILEE

STRATIGRAPHY: UNDIFF JURASSIC Age: JURASSIC Interpretation Code:X101
Basal Information: Depth to Base:367 Base Elevation: +184 Thickness: 363
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code:X102
Basal Information: Depth to Base:744 Base Elevation: -193 Thickness: 377
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA FM Age: PERMIAN Interpretation Code:X103
Basal Information: Depth to Base:800 Base Elevation: -249 Thickness: 56
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:X104
Basal Information: Depth to Base:800 Base Elevation: -249 Thickness: 56
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BANDANNA FM

STRATIGRAPHY: PEAWADDY FM Age: PERMIAN Interpretation Code:X105
Basal Information: Depth to Base:833 Base Elevation: -282 Thickness: 33
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: COLINLEA SST Age: PERMIAN Interpretation Code:X106
Basal Information: Depth to Base:848 Base Elevation: -297 Thickness: 15
Geologic Description:
Reported Environment: FLUVIAL (DICKINS AND MALONE 1973, 119)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks PROVISIONAL INTERPRETATION

STRATIGRAPHY: GEBBIE SUB-GP Age: PERMIAN Interpretation Code:X107
Basal Information: Depth to Base:848 Base Elevation: -297 Thickness: 15
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF COLINLEA SST

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:X108
Basal Information: Depth to Base:848 Base Elevation: -297 Thickness: 48
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF BLENHEIM SUB-GP (UNDIFF.) AND COLINLEA SST OF GEBBIE SUB-GP

STRATIGRAPHY: VOLCANICS Age: DEVONIAN? Interpretation Code:X109
Basal Information: Depth to Base:TD Base Elevation: -311* Thickness: >14
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF CAINOZOIC Age: CAINOZOIC Interpretation Code:Y101
Basal Information: Depth to Base:6 Base Elevation: +545 Thickness: 2
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF JURASSIC Age: JURASSIC Interpretation Code:Y102
Basal Information: Depth to Base:367 Base Elevation: +184 Thickness: 361
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code:Y103
Basal Information: Depth to Base:744 Base Elevation: -193 Thickness: 377
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA-BLACK ALLEY Age: PERMIAN Interpretation Code:Y104
Basal Information: Depth to Base:800 Base Elevation: -249 Thickness: 56
Geologic Description: INTBDD BLK-LT GY CARB FISSILE SH, SILTY SH, SLTST, LT GY-YEL VOLC ASH-TYPE CLST, RARE LT GY F-M TFAC SHALY SST; SH LAMD, WAVY BDG
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks REPRESENTS UNDIFFERENTIATED BANDANNA FM + BLACK ALLEY SH. PALYNOSTRATIGRAPHY: UPPER STAGE 5 (NORVICK, 1974)

STRATIGRAPHY: BANDANNA FM Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:* Base Elevation: * Thickness: *
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks * BANDANNA FM NOT DIFFERENTIATED IN THIS INTERP. SEE "BANDANNA-BLACK ALLEY" ENTRY

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:* Base Elevation: * Thickness: *
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks * BLACKWATER GP NOT DIFFERENTIATED IN THIS INTERP. SEE "BANDANNA-BLACK ALLEY" ENTRY

STRATIGRAPHY: BLACK ALLEY SH Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:* Base Elevation: * Thickness: *
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks * BLACK ALLEY SHALE NOT DIFFERENTIATED IN THIS INTERP. SEE "BANDANNA-BLACK ALLEY" ENTRY

STRATIGRAPHY: PEAWADDY FM Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:833 Base Elevation: -282 Thickness: 33
Geologic Description: INTBDD LT GY M-VC QZOSE SST WITH CALC CLAY MATRIX AND LT GY-GY CALC SL PY AND MICAC SH, AND QZOSE WELL SRTD CALC OR MARLY SST; BRACH FRAGS
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks PALYNOSTRATIGRAPHY: UPPER STAGE 5 (NORVICK, 1974)

STRATIGRAPHY: BASAL SST MB Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:848 Base Elevation: -297 Thickness: 15

Geologic Description: WH-LT GY M-VC GRAINED SL CALC VERY PYRITIC VERY POORLY SORTED QZOSE CONGLOMERATIC SST
Reported Environment: REPRESENTS TRANSGRESSION OVER POSITIVE BASEMENT FEATURE
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks POSSIBLY THE LOWERHOST REPRESENTATIVE OF THE PEAWADDY FM

STRATIGRAPHY: BACK CREEK GP Age: PERMIAN Interpretation Code:Y110
Basal Information: Depth to Base:848 Base Elevation: -297 Thickness: 48
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONSISTS OF PEAWADDY FM AND BASAL SST MB (AND POSSIBLY UNDIFF BLACK ALLEY SH)

STRATIGRAPHY: BASEMENT Age: DEVONIAN? Interpretation Code:Y111
Basal Information: Depth to Base:TD Base Elevation: -311# Thickness: >14
Geologic Description: VOLCANICS
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF JURASSIC-CRET Age: JURASSIC-CRET Interpretation Code:Y201
Basal Information: Depth to Base:367 Base Elevation: +184 Thickness: 363
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code:Y202
Basal Information: Depth to Base:744 Base Elevation: -193 Thickness: 377
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLACKWATER GP Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:800 Base Elevation: -249 Thickness: 56
Geologic Description:
Reported Environment: FLUVIAL, LACUSTRINE OR PALUDAL (P.126)
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BLENHEIM SUB-GP Age: PERMIAN Interpretation Code:Y204

REVIEW OF SUBSURFACE STRATIGRAPHIC DATA, NORTHERN GALILEE BASIN
GEOLOGICAL SURVEY OF QUEENSLAND RECORD 1981/3
Page Publn Year: 1981
Cross Reference:

SEDIMENTARY BASIN: GALILEE

STRATIGRAPHY: ROLLING DOWNS GP Age: CRETACEOUS Interpretation Code: X101
Basal Information: Depth to Base: 617 Base Elevation: -381 Thickness: 613
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: HOORAY SST Age: JURASSIC-CRET Interpretation Code: X102
Basal Information: Depth to Base: 720 Base Elevation: -484 Thickness: 103
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: WESTBOURNE FM Age: JURASSIC Interpretation Code: X103
Basal Information: Depth to Base: 756 Base Elevation: -520 Thickness: 36
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ADORI SST Age: JURASSIC Interpretation Code: X104
Basal Information: Depth to Base: 767 Base Elevation: -531 Thickness: 11
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BIRKHEAD FM Age: JURASSIC Interpretation Code:X105
Basal Information: Depth to Base:852 Base Elevation: -616 Thickness: 85
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: HUTTON SST Age: JURASSIC Interpretation Code:X106
Basal Information: Depth to Base:942 Base Elevation: -706 Thickness: 90
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA FM EQUIV Age: PERMIAN Interpretation Code:X107
Basal Information: Depth to Base:1122 Base Elevation: -886 Thickness: 180
Geologic Description:
Reported Environment:
Interpreted Environment:FINING UPWARDS SEQUENCES INDICATED ON LITHOLOGIC & GAMMA-RAY LOGS
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ARAMAC CM Age: PERMIAN Interpretation Code:X108
Basal Information: Depth to Base:1204 Base Elevation: -968 Thickness: 82
Geologic Description:
Reported Environment:
Interpreted Environment:FINING UPWARDS SEQUENCES INDICATED ON LITHOLOGIC & GAMMA-RAY LOGS
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF JOE JOE GP Age: CARB-PERMIAN Interpretation Code:X109
Basal Information: Depth to Base:TD Base Elevation: -1750* Thickness: >782
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: JOE JOE GP Age: CARB-PERMIAN Interpretation Code:X110
Basal Information: Depth to Base:TD Base Elevation: -1750* Thickness: >864
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS ARAMAC CM & UNDIFF JOE JOE GP

STRATIGRAPHY: ROLLING DOWNS GP Age: CRETACEOUS Interpretation Code:Y101
Basal Information: Depth to Base:617 Base Elevation: -381 Thickness: 613
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: HOORAY-ADORI Age: JURASSIC-CRET Interpretation Code:Y102
Basal Information: Depth to Base:765 Base Elevation: -529 Thickness: 148
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks REPRESENTS UNDIFFERENTIATED HOORAY SST TO ADORI SST. CALLED BLYTHESDALE FM IN W.C.R.

STRATIGRAPHY: RIRKHEAD FM Age: JURASSIC Interpretation Code:Y103
Basal Information: Depth to Base:849 Base Elevation: -613 Thickness: 84
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED WALLOON FM IN W.C.R.

STRATIGRAPHY: HUTTON SST Age: JURASSIC Interpretation Code:Y104
Basal Information: Depth to Base:942 Base Elevation: -706 Thickness: 93
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA FM Age: PERMIAN Interpretation Code:Y105
Basal Information: Depth to Base:1122 Base Elevation: -886 Thickness: 180
Geologic Description: WH F-M ANG-SUBRND QZ CARB & MICAC SST WITH INTERBEDS DK GY CARB SLTSTS & BLK VITREOUS COAL
Reported Environment: NON-MARINE, MAINLY FLUVIAL & ALLUVIAL PLAIN CONDITIONS. SWAMP & MARSH ENVIRONMENTS PREVALENT GIVING RISE TO NUMEROUS COAL BEDS
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL	1013	-777	16
COAL	1044	-808	2
COAL INTERVAL	1113	-877	54
COAL	1122	-886	3

Tectonic Structure:
Remarks

STRATIGRAPHY: ARAMAC CM Age: PERMIAN Interpretation Code:Y106
Basal Information: Depth to Base:1265 Base Elevation: -1029 Thickness: 143
Geologic Description: DK GY-BR CARB & MICAC SHALES INTBDD WITH SST SIMILAR TO BANDANNA FM & BLK VITREOUS COAL
Reported Environment: SIMILAR TO BANDANNA FM EXCEPT FOR REDUCTION IN FLUVIAL ACTIVITY RESULTING IN LESS SST DEPOSITION
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL INTERVAL	1147	-911	19
COAL	1168	-932	3
COAL	1179	-943	1.5 CA
COAL	1192	-956	1 CA

Tectonic Structure:
Remarks CALLED "REIDS DOME BEDS" IN W.C.R.

STRATIGRAPHY: JOE JOE GP Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:1861 Base Elevation: -1625 Thickness: 596
Geologic Description: INTBDD LT GY F-M & CGL ANG-SUBRND SSTS & DK GY-BR CARB & MICAC SHALES AND MINOR BLK COAL

Reported Environment: NON-MARINE AND PROBABLY QUITE RAPID DEPOSITION WITH CLAYEY & CONGLOMERATIC SANDS DEVELOPING AS ALLUVIAL FANS
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL	1305	-1069	1.5 CA
COAL	1335	-1099	1 CA

Tectonic Structure:
Remarks CALLED JOE JOE FM IN W.C.R. ALLUVIAL FANS PROBABLY FILL LOW AREAS PRODUCED BY DOWNWARPING OF MONOCLINE

STRATIGRAPHY: UNDIFF CARBONIFEROUS Age: CARBONIFEROUS Interpretation Code:Y108
Basal Information: Depth to Base:TD Base Elevation: -1750* Thickness: >125
Geologic Description: SANDSTONE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: EROMANGA BASIN SEQ. Age: JURASSIC-CRET Interpretation Code:Y201
Basal Information: Depth to Base:942 Base Elevation: -706 Thickness: 938
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA-COLINLEA Age: PERMIAN Interpretation Code:Y202
Basal Information: Depth to Base:1122 Base Elevation: -886 Thickness: 180
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks REPRESENTS UNDIFFERENTIATED BANDANNA FM EQUIV & COLINLEA SST EQUIV

STRATIGRAPHY: BANDANNA FM EQUIV Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:* Base Elevation: * Thickness: *
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks * BANDANNA FM EQUIV NOT DIFFERENTIATED IN THIS INTERP. SEE "BANDANNA-COLINLEA" ENTRY

STRATIGRAPHY: COLINLEA SST EQUIV Age: PERMIAN Interpretation Code:Y204
Basal Information: Depth to Base:* Base Elevation: * Thickness: *
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks * COLINLEA SST EQUIV NOT DIFFERENTIATED IN THIS INTERP. SEE "BANDANNA-COLINLEA" ENTRY

STRATIGRAPHY: ARAMAC CM Age: PERMIAN Interpretation Code:Y205
Basal Information: Depth to Base:1191 Base Elevation: -955 Thickness: 69
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:

Remarks

STRATIGRAPHY: JOCHMUS FM Age: CARBONIFEROUS Interpretation Code:Y206
Basal Information: Depth to Base:1786 Base Elevation: -1550 Thickness: 595
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features:	Feature	Depth	Elevation	Thickness
	TUFF, EDIE TUFF MB	1381	-1145	147

Tectonic Structure:
Remarks

STRATIGRAPHY: JERICHO FM Age: CARBONIFEROUS Interpretation Code:Y207
Basal Information: Depth to Base:TD Base Elevation: -1750* Thickness: >200
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features:	Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks

STRATIGRAPHY: JOE JOE GP Age: CARB-PERMIAN Interpretation Code:Y208
Basal Information: Depth to Base:TD Base Elevation: -1750* Thickness: >864
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features:	Feature	Depth	Elevation	Thickness

Tectonic Structure:
Remarks CONTAINS ARAMAC CM, JOCHMUS FM & JERICHO FM

CONTROL POINT: RAVENSBOURNE 1

SEDIMENTARY BASIN: GALILEE

STRATIGRAPHY: EROMANGA BASIN SEQ. Age: JURASSIC-CRET Interpretation Code:X101
Basal Information: Depth to Base:1093 Base Elevation: -750 Thickness: 1089
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code:X102
Basal Information: Depth to Base:1249 Base Elevation: -906 Thickness: 156
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA FM EQUIV Age: PERMIAN Interpretation Code:X103
Basal Information: Depth to Base:1338 Base Elevation: -995 Thickness: 89
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: JOE JOE GP Age: CARB-PERMIAN Interpretation Code:X104
Basal Information: Depth to Base:1530 Base Elevation: -1187 Thickness: 192
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks POSSIBLY JERICHO FM

STRATIGRAPHY: EASTWOOD BEDS Age: DEVONIAN Interpretation Code:X105
Basal Information: Depth to Base:TD Base Elevation: -2015* Thickness: >820
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ROLLING DOWNS GP Age: CRETACEOUS Interpretation Code:Y101
Basal Information: Depth to Base:437 Base Elevation: -94 Thickness: 433
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS ALLARU MDST, TOOLEBUC LST, & WALLUMBILLA FM

STRATIGRAPHY: HOORAY SST Age: JURASSIC-CRET Interpretation Code:Y102
Basal Information: Depth to Base:545 Base Elevation: -202 Thickness: 108
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: WESTBOURNE FM Age: JURASSIC Interpretation Code:Y103
Basal Information: Depth to Base:636 Base Elevation: -293 Thickness: 91
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ADORI SST Age: JURASSIC Interpretation Code:Y104
Basal Information: Depth to Base:688 Base Elevation: -345 Thickness: 52
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BIRKHEAD FM Age: JURASSIC Interpretation Code:Y105
Basal Information: Depth to Base:821 Base Elevation: -478 Thickness: 133
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: HUTTON SST Age: JURASSIC Interpretation Code:Y106
Basal Information: Depth to Base:1002 Base Elevation: -659 Thickness: 181
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: EVERGREEN FM Age: JURASSIC Interpretation Code:Y107
Basal Information: Depth to Base:1047 Base Elevation: -764 Thickness: 45

Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: PRECIPICE SST Age: JURASSIC Interpretation Code:Y108
Basal Information: Depth to Base:1093 Base Elevation: -750 Thickness: 46
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: MOOLAYEMBER FM Age: TRIASSIC Interpretation Code:Y109
Basal Information: Depth to Base:1125 Base Elevation: -782 Thickness: 32
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: CLEMATIS GP Age: TRIASSIC Interpretation Code:Y110
Basal Information: Depth to Base:1250 Base Elevation: -907 Thickness: 125
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF PERMIAN Age: PERMIAN Interpretation Code:Y111
Basal Information: Depth to Base:1530 Base Elevation: -1187 Thickness: 280
Geologic Description: GY-DR-BLK LOCALLY BIOT SH & CLST WITH CARB STREAKS, GY BR PARTY SANDY SLTST & VF BIOT ?TFAC SST, WH-GY GN F & M-C FAIRLY SRTD QZ SST (COALY LAM)
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
COALY INTERVAL 1268 -925 2 CA
Tectonic Structure:
Remarks UNCONFORMITY AT BASE

STRATIGRAPHY: UNDIFF LOWER DEVON Age: DEVONIAN Interpretation Code:Y112
Basal Information: Depth to Base:TD Base Elevation: -2015# Thickness: 1828
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness

SEDIMENTARY BASIN: CALILEE

STRATIGRAPHY: EROMANGA BASIN SEQ. Age: JURASSIC-CRET Interpretation Code:X101
Basal Information: Depth to Base:725 Base Elevation: -491 Thickness: 721
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA FM EQUIV Age: PERMIAN Interpretation Code:X102
Basal Information: Depth to Base:826 Base Elevation: -592 Thickness: 101
Geologic Description:
Reported Environment:
Interpreted Environment:FINING UP CYCLES - FLUVIAL FLOOD-PLAIN OR UPPER DELTA PLAIN
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks UNCONFORMITIES AT TOP & BASE. TOP OF FM PICKED AT TOP COAL BED & TOP OF FINING-UP CYCLES ON SP

STRATIGRAPHY: ARAMAC CM Age: PERMIAN Interpretation Code:X103
Basal Information: Depth to Base:860 Base Elevation: -626 Thickness: 34
Geologic Description:
Reported Environment:
Interpreted Environment:POORLY DEFINED FINING UP CYCLES
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks TOP OF FM PICKED AT SHIFT ON GAMMA-RAY TO SHALE LINE. BASE OF FM AT BOTTOM COAL

STRATIGRAPHY: UNDIFF JOE JOE GP Age: CARB-PERMIAN Interpretation Code:X104
Basal Information: Depth to Base:1454 Base Elevation: -1220 Thickness: 594
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: JOE JOE GP Age: CARB-PERMIAN Interpretation Code:X105
Basal Information: Depth to Base:1454 Base Elevation: -1220 Thickness: 628
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS ARAMAC CM & UNDIFF JOE JOE GP

STRATIGRAPHY: BASEMENT Age: DEVONIAN-CARB Interpretation Code:X106

Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: ROLLING DOWNS GP Age: CRETACEOUS Interpretation Code:Y101
Basal Information: Depth to Base:428 Base Elevation: -194 Thickness: 424
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CONTAINS TAMBO & ROMA FORMATIONS OF WELL COMPLETION REPORT

STRATIGRAPHY: HOOKAY SST Age: JURASSIC-CRET Interpretation Code:Y102
Basal Information: Depth to Base:506 Base Elevation: -272 Thickness: 78
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED TRANSITION BEDS + HOOGA SST OF BLYTHESDALE GROUP IN WELL COMPLETION REPORT

STRATIGRAPHY: WESTBOURNE FM Age: JURASSIC Interpretation Code:Y103
Basal Information: Depth to Base:533 Base Elevation: -299 Thickness: 27
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED FOSSIL WOOD BEDS OF BLYTHESDALE GP IN WELL COMPLETION REPORT

STRATIGRAPHY: ADORI SST Age: JURASSIC Interpretation Code:Y104
Basal Information: Depth to Base:561 Base Elevation: -327 Thickness: 28
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED GUBBERAMUNDA SST OF BLYTHESDALE GROUP IN WELL COMPLETION REPORT

STRATIGRAPHY: WALLOON CM Age: JURASSIC Interpretation Code:Y105
Basal Information: Depth to Base:635 Base Elevation: -401 Thickness: 74
Geologic Description:
Reported Environment:
Interpreted Environment:

Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: HUTTON SST Age: JURASSIC Interpretation Code:Y106
Basal Information: Depth to Base:762 Base Elevation: -528 Thickness: 127
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA FM Age: PERMIAN Interpretation Code:Y107
Basal Information: Depth to Base:1036 Base Elevation: -802 Thickness: 274
Geologic Description: DK GY SL CALC MICAC PY VERY CARB SH, BLK COAL SEAMS, GY-BR CARB CALC SLTST, LT GY-WH F-M CALC FRIABLE SST, BR CARB CALC PY VAR TFAC SH & SLTST
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
COAL INTERVAL	769	-535	5 CA
COAL	787	-553	9 CA
COAL	814	-580	3 CA
COAL INTERVAL	851	-617	26 CA

Tectonic Structure:
Remarks CA 1.5 M COAL SEAM AT 797 M. UPPER BANDANNA (LATE PERM.) SPORES, 799-808M. ?STAGE 5 - UPPER STAGE 2-3 (NORVICK, 1974)

STRATIGRAPHY: PEAWADDY FM Age: PERMIAN Interpretation Code:Y108
Basal Information: Depth to Base:1074 Base Elevation: -840 Thickness: 38
Geologic Description: LT GY, F-M GRAINED, LITHIC, SLIGHTLY CARBONACEOUS SANDSTONE, AND MINOR LT-M GREY, CARBONACEOUS, SLIGHTLY CALCAREOUS SILTSTONE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks CALLED MANTUAN FORMATION IN WELL COMPLETION REPORT

STRATIGRAPHY: COLINLEA SST Age: PERMIAN Interpretation Code:Y109
Basal Information: Depth to Base:1454 Base Elevation: -1220 Thickness: 380
Geologic Description: LT-M GY SL CALC CARB LI SH, LT GY F-M CARB LI SST, LT GY-WH F-M LI SL CARB & CALC SST, LT GY F ARG SST & GY-BR SILTY SH (BOTH TFAC CARB SL CALC)
Reported Environment:
Interpreted Environment:
Geologic Features:

Feature	Depth	Elevation	Thickness
PALYNOLOGICAL SAMPLE	1411	-1174	3

Tectonic Structure:
Remarks ALSO, M-DK GY SL CALC CARB SILTY SH, + TRACE VARICOLORED BRITTLE RESINOUS TFAC SH. UPPER STAGE 2 (NORVICK, 1974)

STRATIGRAPHY: DRUMMOND GP Age: DEVONIAN-CARB Interpretation Code:Y110
Basal Information: Depth to Base:TD Base Elevation: -1280± Thickness:)60
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: EROMANGA BASIN SEQ. Age: JURASSIC-CRET Interpretation Code:Y201
Basal Information: Depth to Base:762 Base Elevation: -528 Thickness: 758
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness

Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA-COLINLEA Age: PERMIAN Interpretation Code:Y202
Basal Information: Depth to Base:818 Base Elevation: -584 Thickness: 56
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks REPRESENTS UNDIFFERENTIATED BANDANNA FM EQUIV & COLINELA SST EQUIV

STRATIGRAPHY: BANDANNA FM EQUIV Age: PERMIAN Interpretation Code:Y203
Basal Information: Depth to Base:* Base Elevation: * Thickness: *
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks * BANDANNA FM EQUIV NOT DIFFERENTIATED IN THIS INTERP. SEE "BANDANNA-COLINELA" ENTRY

STRATIGRAPHY: COLINLEA SST EQUIV Age: PERMIAN Interpretation Code:Y204
Basal Information: Depth to Base:* Base Elevation: * Thickness: *
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks * COLINLEA SST EQUIV NOT DIFFERENTIATED IN THIS INTERP. SEE "BANDANNA-COLINLEA" ENTRY

STRATIGRAPHY: ARAMAC CM Age: PERMIAN Interpretation Code:Y205
Basal Information: Depth to Base:851 Base Elevation: -617 Thickness: 33
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: JOCHMUS FM Age: CARBONIFEROUS Interpretation Code:Y206
Basal Information: Depth to Base:1370 Base Elevation: -1136 Thickness: 519
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
EDIE TUFF MB 1036 -802 114
Tectonic Structure:
Remarks

STRATIGRAPHY: JERICHO FM Age: CARBONIFEROUS Interpretation Code:Y207
Basal Information: Depth to Base:1454 Base Elevation: -1220 Thickness: 84
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF DEVONIAN-CARB Age: DEVONIAN-CARB Interpretation Code:Y208
Basal Information: Depth to Base:TD Base Elevation: -1280* Thickness:)60

Geologic Description: QUARTZITE + TUFF
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

SEDIMENTARY BASIN: GALILEE

STRATIGRAPHY: UNDIFF CAINOZOIC Age: CAINOZOIC Interpretation Code: X101
Basal Information: Depth to Base: 12 Base Elevation: +220 Thickness: 6
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: EROMANGA BASIN SEQ. Age: JURASSIC-CRET Interpretation Code: X102
Basal Information: Depth to Base: 390 Base Elevation: -158 Thickness: 378
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF TRIASSIC Age: TRIASSIC Interpretation Code: X103
Basal Information: Depth to Base: 881 Base Elevation: -649 Thickness: 491
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: BANDANNA FM EQUIV Age: PERMIAN Interpretation Code: X104
Basal Information: Depth to Base: 1034 Base Elevation: -802 Thickness: 153
Geologic Description: UNCONFORMITY AT BASE
Reported Environment:
Interpreted Environment: POSSIBLE FINING-UP CYCLES ON GAMMA-RAY LOG
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks TOP & BASE PICKED AT MARKED CHANGES IN WIRELINE LOGS. ALTERNATIVE FM TOP PICK AT 893 M (TOP OF FIRST COAL).

STRATIGRAPHY: JOE JOE GP Age: CARB-PERMIAN Interpretation Code:X105
Basal Information: Depth to Base:1608 Base Elevation: -1376 Thickness: 574
Geologic Description:
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks ARAMAC CM ABSENT ALTHOUGH THIN SEQUENCE OF ARAMAC POSSIBLY EXISTS BETWEEN 1030-1050 M

STRATIGRAPHY: BASEMENT Age: ? Interpretation Code:X106
Basal Information: Depth to Base:TD Base Elevation: -1379# Thickness:)3
Geologic Description: DACITE
Reported Environment:
Interpreted Environment:
Geologic Features: Feature Depth Elevation Thickness
Tectonic Structure:
Remarks

STRATIGRAPHY: UNDIFF CAINOZOIC Age: CAINOZOIC Interpretation Code:Y101

CSIRO DATA BASE 2 - PART 1

LOCATION OF COAL QUALITY CONTROL POINTS

INTRODUCTION

The locations of control points used to characterise the several coal quality parameters discussed in Chapters 19 to 24 are shown in plates 30, 31 and 32. Sources of data for the Permian basins are shown in plates 33, 34, and 35. The control points, listed below are mainly exploration boreholes of the Geological Survey of Queensland (GSQ), New South Wales (GSNSW) or companies. CSIRO data relates mainly to sampling of operating mines over the last 25 years with the more recent inclusion of stratigraphically representative borehole samples. The more important representative control points which are presented in Part 2 of this data base, are cross-referenced to the listing below.

CSIRO DATA BASE 2 - PART 2

COAL QUALITY CONTROL POINTS

INTRODUCTION

This data base was prepared during the Permian Coals Project to provide representative stratigraphic and geographic coverage of coal quality parameters in the Permian Basins, mainly at the seam composite level. Several parameters in the data base; vitrinite - % mmf, total sulphur - % daf, phosphorus - % db, ash content - % db and ash composition - SiO_2:Al_2O_3 ratio, were subsequently averaged for several stratigraphic intervals to produce the lateral variation maps discussed in Chapters 19, 20, 21 and 22 of the report. The data base is concentrated mainly in the Sydney and Bowen Basins, which contain the more accessible deposits and where most of information is available because of current exploitation of the coal resource. Data from a few bores in the Gunnedah Basin, several bores along the eastern side of the Galilee Basin, and a few bore or mine samples in each of the Blair Athol, Wolfang, Ashford, Cranky Corner and Oaklands Basins are also included.

SOURCES OF DATA

The source of the petrographic and chemical data is indicated in an abbreviated form, usually

CSIRO LR117 - CSIRO Location Report 117
CSIRO IR50 - CSIRO Investigation Report 50
CSIRO IR1423R - CSIRO Investigation Report 1423 Restricted
CSIRO TC39 - CSIRO Technical Communication 39
GSQ Record 1980/17 - Geological Survey of Queensland Record 1980/17 (unpub.)
QGMJ '78 - Queensland Government Mining Journal, 1978 (unpub.)
GSNSW GS1976/219 - Geological Survey of NSW Record 1976/219 (unpub.)

Data appearing in Australian Black Coals (Joint Coal Board (JCB) and Queensland Coal Board (QCB) 1976) and Queensland Coals (QCB 1978) may also appear. Data derived from unpublished proprietary sources is usually identified by the company name and appears with permission, for example:

AMAX-BHP or Wancol-BP Coalex. Data attributed solely to CSIRO and CSIRO IR's 1414R, 1394R, 1397R and 1375R, were generated for the Permian Coals project.

SAMPLES

Abbreviations used in describing samples are set out as follows:

Type of Sample

CCC	clean coal composite, section excluding mineral matter bands >5 or 10 mm thickness, depending on the age of the data - mainly CSIRO data.
RC	raw coal, section including mineral matter bands (sometimes excluding major bands ? >30 cm).
1.60F	1.60 relative density float fraction
1.60S	1.60 relative density sink fraction

Portion of Sample

WS	whole seam
MS	main seam or middle split - excluding an upper or lower split or both
US	upper section or upper split
LS	lower section or lower split
(sub)A	subsection "A"

Sample Number

LN35697	CSIRO laboratory number
PN7274	CSIRO petrographic number
PS1250	GSQ petrographic section
RC11693	GSQ laboratory number
6729	Company number as reported.

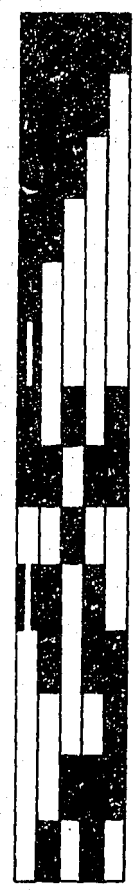
In some cases no sample numbers are available and the data is set out as reported.

PETROGRAPHIC ANALYSES

Petrographic analyses are reported on a volume % basis, excluding GSQ microscopic analyses which are reported on a weight % basis by recalculating mineral matter to agree with % ash in the proximate analysis.The microscopic analyses are reported at the group level because of variation in detail reported within and between organisations.

Petrographic Profiles

The macropetrographic profiles have been "standardised" to the Australian Standard (1970) scheme, modified to allow for several other categories routinely used by GSQ and GSNSW. The minimum bandwidth shown in the profiles is 50 mm (nib size 0.5 mm at a scale of 1:100) although much of the original data was already smoothed to 500 mm or 1 m subsections. Many data have been reinterpreted by using a correlation between the old macropetrographic categories, vitrinite content, and the new macropetrographic categ ries. A key to the macropetrographic categories used in the data base is set out below.The categories D and Dmb often are not differentiated in which case Dmb is shown.



Symbol	Description		% Brights	% Vitrinite (mmf)
B	- Bright	<35% ash	>90	≑ 75
Bd	- Bright banded		60-90	≑ 70
DB	- Interbanded		40-60	≑ 50
Db	- Dull banded		10-40	≑ 45
Dmb	- Dull minor bright		1-10	≑ 25
D	- Dull		<1	≑ 10
Coal	- cindered			
Coal	- undifferentiated			
Coal	- weathered			
Dull coal and carb. shale				
Bright coal and carb. shale				
Mineral > coal		>35% ash		
Coal > mineral				
Carb. shale				

Microlithotype Analyses

Microlithotype analyses which originate mainly within the CSIRO are based on ICCP (1963 and 1971) definitions and were made by the "line method". They are reported using the following groupings

V + C	vitrite + clarite	
VI + CD + DC	vitrinertite + clarodurite + duroclarite	intermediates
I	inertite + durite	
SC + MM	shaly coal + mineral matter	

Maceral Analyses

Maceral analyses originating mainly in CSIRO and GSQ are based on ICCP (1963 and 1971) definitions, and are reported using the following groupings

V + E	vitrinite + exinite
I	inertinite
MM	mineral matter

Reflectance Analyses

Reflectance is reported as R_o max, mainly for vitrinite "A" (collinite + telocollinite) although this is often not stated in the source material.

CHEMICAL ANALYSES

Recovery, Weight % and Relative Density

Recovery refers to the estimated volumetric recovery in the bore coal. Weight % refers to the % of float material recovered in a density separation. Recovery and relative density (specific gravity) are only sporadically reported for older data.

Proximate Analysis

Moisture (M), ash (A) and volatile matter (VM) are determined and fixed carbon (FC) is calculated. VM and FC have been calculated to a dry ash free basis (daf) using the factor (100-[M+A]).

Ultimate Analysis

Carbon (C), hydrogen (H), nitrogen (N) and sulphur (S) are determined and oxygen (O) is calculated. In most cases CSIRO data is adjusted for inorganic carbon (CO_2) and (pyritic + sulphate (P+S) sulphur (S). Where these analyses are not shown the adjustments probably have not been made. The ultimate analyses have been calculated to a daf basis using the factor (100-[M+A]).

Specific Energy

Specific energy is reported as gross specific energy and in many cases was originally reported as calorific value. It has been converted to a daf basis using the factor (100-[M+A]).

Cruicible Swelling Number

Crucible swelling number (CSN) is a measure of agglomeration and swelling as a result of fast heating and is widely reported.

Total Sulfur and Forms of Sulfur

Total sulfur (TS), pyritic and sulfate sulfur (P+SS) are determined directly and organic sulfur (OS) is calculated. Sulfur is reported on a daf basis using the factor (100-[M+A]). Forms of sulfur are reported mainly by the CSIRO, JCB and QCB).

Phosphorus and Fluorine

Phosphrus (P) is reported on an air dry (ad) coal basis, and may be determined directly or calculated from an ash analysis. Phosphorus is widely reported. Fluorine (F) is reported mainly in recet analyses of the GSQ.

Chlorine, Arsenic and Carbon Dioxide

Chlorine (Cl) and arsenic (As) originate mainly in the CSIRO data bank, but chlorine is routinely reported by the JCB and QCB. Carbon dioxide (CO_2) originating in carbonates is widely reported in conjunction with organic carbon.

Ash Analysis

Analyses of oxides in coal ash are widely reported. Only SiO_2 and Al_2O_3 are shown in the data base.

Trace Elements

Only boron (B) and gallium (G) (ppm air dry coal basis) are shown in the data base. The data originate in the CSIRO and were determined by a semi-quantative spectrographic D.C. arc emission method.

BR	Top of Barfield Formation
BP	Base of Permian sediments (Top of Volcanics)

TAROOM TROUGH CROSS SECTION

Based on seismic data displayed by C. Herbert at the Permian Geology of Queensland Conference, July 1982, and, near A.A.O. Sunlight 1 well, on the seismic map of the Sunlight Structure given by Mines Administration (1966). Correlation of the Black Alley Shale-Crocker Formation boundary (CR) with the Flat Top Formation is according to the palynological work of Foster (1981). Numerous faults of relatively small displacements (not shown) occur in the section. Except for the central portion X-Y, the cross-section does not follow seismic traverses directly. Depths are estimates only.
