### Map Reliability

Topographic information checked from 2002 satellite imagery, and supplemented using other sources in 2004. This map was not field checked and some information may not be accurate.

### About the NATMAP Series

Geoscience Australia produces over 500 maps at 1:250 000 scale in this NATMAP series which covers Australia. They are used by professional and recreational users and are available both flat and folded. A corresponding data product, GEODATA TOPO-250K is also available.

### How to Quote a Grid Reference for a Particular Point

Blue numbers on the map grid lines are 10 000 metre intervals

Example: - JACCS KNGB

1. Quote this map..... Coen

2. Read letters identifying 100 000

metre square containing the point..... YL

3. Locate the vertical grid line to the left of the point and read large number on the grid line..... 4

4. Estimate tenths from the grid line to the point..... 1

5. Locate the horizontal grid line below the point and read large number on the grid line..... 4

6. Estimate tenths from the grid line to the point..... 9

Thus the reference for - JACCS KNGB is..... Coen YL4149

100 000 metre square identification
