

Thomson-Lachlan Boundary Deep Seismic Reflection Survey

Preliminary Results from the Thomson-Lachlan Deep Seismic Survey, NSW, 2005

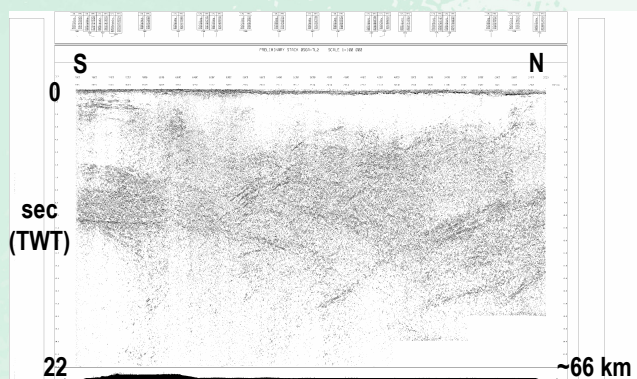

Left: Topographic map showing locations of the three deep seismic lines across the boundary of the Thomson and Lachlan Orogens.

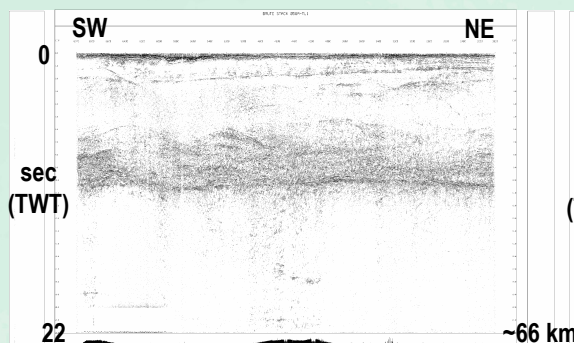

Right: Total magnetic intensity map of the Thomson-Lachlan region with the locations of the three deep seismic lines

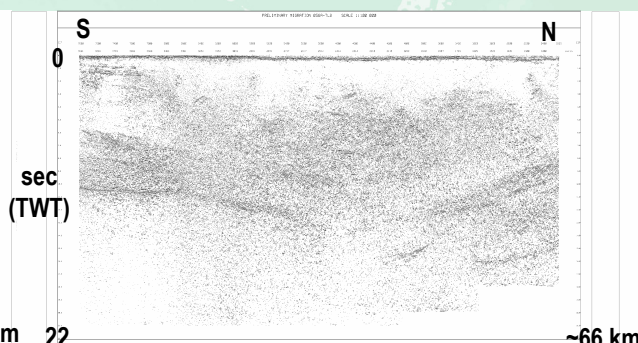

05GA-TL03 – Preliminary stack (73 km long)

05GA-TL02 – Preliminary stack (115 km long)

05GA-TL01 – Preliminary stack (99 km long)

05GA-TL02 – Preliminary migration (115 km long)

WARNING: These seismic sections are preliminary versions only, and will be subject to further processing before final versions are available
