This is a joint publication between the Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) and Geoscience Australia.

This publication (and any material sourced from it) should be attributed as:

Source: ABARES and Geoscience Australia.

This publication should be cited as:

ABARES and Geoscience Australia 2012, *Layered earth inversion and related airborne geophysical datasets derived from the Lower Macquarie River TEMPEST AEM Survey, New South Wales, 2007*, Geoscience Australia, Canberra.

Disclaimer

The Australian Government acting through the Department of Agriculture, Fisheries and Forestry and Geoscience Australia has exercised due care and skill in the preparation and compilation of the information and data in this product making it as accurate as possible. However, it does not guarantee that the information is totally accurate or complete. Therefore, you should not solely rely on this information when making a commercial decision.

Notwithstanding, the employees and advisers of the Department of Agriculture, Fisheries and Forestry and Geoscience Australia, and those organisations disclaim all liability, including liability for negligence, for any loss, damage, injury, expense or cost incurred by any person as a result of accessing, using or relying upon any of the information or data in this publication to the maximum extent permitted by law.

Acknowledgements

The TEMPEST time domain airborne electromagnetic survey was flown by Fugro Airborne Surveys over the Lower Macquarie River catchment in 2007. The survey was commissioned by the Australian Government Department of Agriculture, Fisheries and Forestry through the Bureau of Rural Sciences (BRS), now known as the Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) and funded under the National Action Plan for Salinity and Water Quality. Geoscience Australia (GA) provided several geophysical services in relation to the survey including survey planning, technical system selection, data quality control and layer earth inversion of the resultant data. Format conversion of the magnetics and digital elevation model data in this product was performed by ABARES from data provided by GA.
