The number of cattle disposed of for slaughter in 1975-76 as a percentage of total cattle at 31 March 1976

SOURCES AND ACKNOWLEDGEMENTS

This map is based on statistics for local government or equivalent areas provided by the Australian Bureau of Statistics. These statistics were supplemented by cattle numbers in 1975 on pastoral leaseholdings in South Australia, Western Australia and the Northern Territory specially provided by the S.A. Department of Lands, the W.A. Department of Lands and Surveys and the former Commonwealth Department of the Northern Territory.

Cattle areas and numbers and land not in rural holdings were plotted with the aid of Land Use (1979, 1:5 000 000) of this Atlas.
