

Celebrate EARTH SCIENCE WEEK

OCTOBER 9 — 15, 2011

Our Ever-Changing Earth Fossils of the Hunter Valley

On display 3 - 28 October at East Maitland library
3 Garnett Road East Maitland

The fossil record provides us with information about the climate, environments and landscapes that existed when the fossilised plants and animals lived. The lower Hunter Valley contains a rich diversity of fossil life forms that lived from about 250 to 300 million years ago, during the Permian period.
