Table of Contents

Metallogeny of granitic rocks Blevin, P.L.	1
Palaeozoic granite metallogensis of eastern Australia <i>Blevin, P.L.</i>	5
Granites of the southern New England orogen <i>Bryant, C.J., Chappell, B.W., & Blevin, P.L.</i>	9
Archaean granites <i>Champion, D.C., & Smithies, R.H.</i>	13
Granites of north Queensland <i>Champion, D.C., & Bultitude, R.J.</i>	19
From Tuttle and Bowen onwards <i>Chappell, B.W.</i>	25
Causes of variation in granite suites <i>Chappell, B.W.</i>	27
High- and low-temperature granites <i>Chappell, B.W.</i>	35
Towards a unified model of granite petrogenesis <i>Chappell, B.W.</i>	37
Granites of the Lachlan Fold Belt <i>Chappell, B.W.</i>	39
Australia's first hot dry rock geothermal energy extraction project is up and running in granite beneath the Cooper Basin, NE South Australia <i>Chopra, P., & Wyborn, D.</i>	43
Some modern concepts on Lachlan granite petrogenesis <i>Collins, W.J.</i>	47
Epithermal Au-Ag – the Magmatic Connection. Comparisons between East and West Pacific rim <i>Corbett, G.</i>	51
Granite production in the Delamerian Orogen <i>Foden, J.</i>	57
Controls on Skarn Mineralisation and Alteration at the Cadia Deposits, New South Wales, Australia <i>Forster, D.B., & Seccombe, P.K.</i>	59
Tectonic setting of porphyry copper-gold mineralisation in the Macquarie Arc <i>Glen, R.A., Crawford, A.J., & Cooke, D.R.</i>	65
The magmatic-hydrothermal transition: Volatile separation in silicic rocks at Bajo de la Alumbrera porphyry Cu-Au deposit, NW Argentina <i>Harris, A.C., Kamenetsky, V.S., & White, N.C.</i>	69
Are Magmas Sources of Most or All Metals in Iron Oxide-Copper-Gold and Related Ore Types? <i>Haynes, D.W.</i>	75

Metallogenic mineralization vs the granite series in the Mesozoic-Cenozoic Circum-Pacific plutonic belts <i>Ishihara, S.</i>	77
Mesozoic Granites and Associated Mineralization in South Korea <i>Jwa, Y.-J.</i>	81
Granites, volatile solubility & tracking the formation of magmatic fluids <i>King, P.L., & White, A.J.R.</i>	85
Gravity and granites <i>Lackie, M.A., Bailey, B.T., & Edmiston, M.A.</i>	89
The nature of Tombstone plutonic suite rocks at Scheelite Dome, Tintina gold province: evidence for an enriched mantle contribution <i>Mair, J.L., Hart, C.J.R., Groves, D.I., & Goldfarb, R.J.</i>	93
Evidence of a granite-related source for the Braidwood-Araluen-Majors Creek goldfields, NSW, Australia <i>McQueen, K.G.</i>	97
Granites of the northern New England orogen <i>Murray, C.</i>	101
Mid-Mesozoic Granites and Mineralisation in Hong Kong <i>Ruxton, B.P.</i>	109
Melting the crust – where is the heat? <i>Sandiford, M.</i>	111
Subducted Ridges, Magmas, Differential Uplift, and Gold Deposits: Examples from South and Central America <i>Shatwell, D.</i>	115
High Sr/Y (HiSY) granitoid magmatism in convergent margins; nomenclature and setting <i>Tulloch, A.</i>	121
Paleozoic plutonism in the New Zealand sector of Gondwana <i>Tulloch, A.J., Kimbrough, D.L., Faure, K., & Allibone, A.H.</i>	123
Granite transport and emplacement: a review <i>Weinberg, R.</i>	125
The geophysical characteristics of granites and shear zones in the Yilgarn Craton, and their implications for gold mineralisation <i>Whitaker, A.</i>	129
Suites with particular reference to granites of eastern Australia <i>White, A.J.R.</i>	135
Granite melt forming reactions <i>White, A.J.R.</i>	137
Porphyry copper mineralisation of western USA <i>White, A.J.R.</i>	139
Measuring the ages of granites: the challenge to get it right <i>Williams, I.S.</i>	141

Petrogenesis of Proterozoic Anorogenic Granitoids from the Mazury Complex (NE Poland)	145
<i>Wiszniewska, J.</i>	
Assessing the Metallogenic Potential of Proterozoic Granite Suites from First Principles	149
<i>Wyborn, L.</i>
