MAGNETIC ANOMALY MAP OF AUSTRALIA

GRADIENT ENHANCED RESIDUALS OF
TOTAL MAGNETIC INTENSITY

Lambert Conformal Conic Projection
Geocentric Datum of Australia 1994
Central Meridian at 134° 00' East
Standard Parallels at 18°00' and 36°00' South

We thank the following:
Xstrata Copper Exploration for allowing the inclusion of their survey data across the Mount Isa Inlier.
Fugro Geophysical Surveys for allowing the inclusion of some of their survey data in Queensland and Western Australia.

Compiled by the Geophysical Acquisition and Databases Project, Geoscience Australia.
Data processing by R. Franklin, P.R. Milligan.
Image enhancement and index maps by P.R. Milligan.
Cartography by R.S. Hill, Geospatial Applications and Visualisation Project, Geoscience Australia.

Composite TMI grid data at 250 m and 400 m cell sizes are available for free download via the internet using Geoscience Australia's Geophysical Archive Data Delivery System (GADDS) at: <http://www.geoscience.gov.au/gadds>
Further information can also be found on the Internet at: <http://www.ga.gov.au/>

© Commonwealth of Australia 2004
Inquiries regarding the availability of digital data should be made to Geoscience Australia. It is possible to display the data at scales that reveal significantly more detail than shown in this image.

Copies of the Magnetic Anomaly Map of Australia at 1:5 000 000 scale may be obtained from:
