Produced in association with USGS. Open File Report 94-667 by Tau Rho Alpha
Artwork by Anita Riley

05-034-14a

1. Cut out the head and shell of the nautiloid.
2. Fold along the dotted lines.
3. Roll up and glue the shell.
4. Roll up and glue the hyponome.
5. Roll up and glue the head.
6. Glue head to inside of the coiled shell.

Note: a drinking straw can be used for hyponome instead.

Align to centre line of head
