

For up-to-date map information, see Geoscience Australia's website, www.ga.gov.au

This site contains:

- a complete list of map products and prices
- place name search facility
- information about topographic map specifications
- map copyright information
- information about using maps with GPS
- a full listing of our map retailers
- a form for submitting map errors and suggestions
- free downloadable samples of digital data and much more.

Topographic Maps in Digital Form

The 1:250 000 scale NATMAP series is also available in digital form for use on computers and in Geographic Information Systems (GIS).

GeODATA TOPO-250K is a vector data product for use in GIS and other computerised mapping applications.

NATMAP RASTER contains the 513 maps in the 1:250 000 NATMAP series as digital images on CD-ROM.

Digital Data for selected 1:500 000 maps can be obtained through Geoscience Australia. For further information contact Data Sales Enquiries.

About Geoscience Australia's National Mapping Division

We are Australia's national mapping agency. We play a pivotal role in Australia's land information industry as the primary source of advice to the Commonwealth Government, coordinator of national programs and Australian representative in international forums. Through our mapping, satellite imagery, and maritime boundary programs, we provide information essential to the effective management of Australia's environmental and natural resources.

About the NATMAP series

The NATMAP Topographic Map Series contains more than 2000 different published map titles. These maps are used by a wide range of professional and recreational users and are available flat or folded. There are 513 maps in the 1:250 000 series and over 1600 published maps in the 1:100 000 series.

Your Feedback is Welcome

If you discover errors or omissions on a map, please let us know via the map amendments page on our website, email: mapfeedback@ga.gov.au, or send your annotated map to us. We will replace your map with the corresponding current edition. We value your assistance for the next edition.
