

Paterson Airborne EM Survey Workshop

Perth, 4 May 2010

NEW RESULTS TO BE RELEASED

This one-day workshop will present results from a 49 000 km² airborne electromagnetic survey collected during 2007 and 2008 in the Paterson region of Western Australia by Geoscience Australia.

The workshop will feature:

- Data processing and inversion methods
- Geological mapping applications
- Uranium and mineral system implications
- Industry use case studies.

When: Tuesday 4 May 2010
Where: Geological Survey of Western Australia, Perth
Cost: Free – but registration required by Friday 23 April 2010
