## **Petroleum Repository Price List – April-2012**

Geoscience Australia houses one of the world's largest collections of petroleum data. Much of this data is available to the petroleum industry, research organisations and the public. The collection includes seismic survey data and well data submitted by Industry under legislative requirements as well as data collected by research projects and marine surveys undertaken by Geoscience Australia or other government agencies or institutions.

Geoscience Australia is authorised under the *Offshore Petroleum and Greenhouse Gas Storage Act 2006 (OPGGSA)* to distribute data lodged under the Act and its predecessor Acts once the relevant confidentiality period has expired.

Data available for distribution can be found by visiting the GA website <http://www.ga.gov.au/energy/petroleum-resources.html> or emailing [ausgeodata@ga.gov.au](mailto:ausgeodata@ga.gov.au)

### **Copyright and Licensing**

Geoscience Australia distributes data lodged under the OPGGSA and its predecessor Acts under the provisions of the OPGGSA.

Data collected by Geoscience Australia is Copyright © Commonwealth of Australia (Geoscience Australia).

All data is made available under the terms of the Creative Commons “*Attribution 3.0 Australia*” licence (see <http://creativecommons.org/licenses/by/3.0/au/>).

### **Basis of Pricing**

Geoscience Australia sets prices for products from its Petroleum Data Repository in accordance with the [Australian Government's Spatial Data Access and Pricing Policy 2001](#). Under the policy prices are set at the “marginal cost of transfer”.

Marginal cost of transfer is defined as;

- Free, when the data is routinely available on-line for self service;
- Run-on cost, for standard, bulk-produced products (ie the cost to duplicate and supply the second and subsequent copies of a product);
- Full cost of distribution for all other products – this may include staff costs, material consumed, energy costs, telecommunication & internet costs, equipment depreciation, maintenance and repairs, contract, packaging and freight.

### **GST**

The prices in this price list are exclusive of Australian Goods and Service Tax (GST). However, GST may apply and will be invoiced where applicable.

## **Order Confirmation**

Prior to placing an order for Repository data, clients should request a quotation preferably by using the website form or emailing [ausgeodata@ga.gov.au](mailto:ausgeodata@ga.gov.au). Geoscience Australia will send clients a quotation which will describe the data to be supplied, a firm price, and an approximate delivery time. Quotes will be valid for 30 days. The order will be processed once the quotation has been accepted and confirmed by the client.

## **Transition to New Storage System**

Geoscience Australia is migrating its petroleum data holdings to a near-line storage system. Once data has been migrated to this system “marginal cost of transfer” for data supply is reduced due to the lower handling costs. The data migration is not expected to be complete until late 2012. During this period lower prices will apply if data relating to a Survey or Well has been migrated to the new storage system. This will be indicated on the order confirmation.

## **Freight**

All prices are inclusive of airfreight within Australia. Overseas freight will be invoiced at cost - an estimate will be provided in the order confirmation. The Client is responsible for customs clearance and any local import duties or taxes that may be payable.

## **Price Updates**

This price list will be updated at least annually to take into account changes to the marginal cost of transfer.

## 1. PRICES – DATA MIGRATED TO THE NEW STORAGE SYSTEM

Pricing for data migrated to the new storage system comprises a handling charge for each data type per Well or Survey (Table 1) plus a charge for each unit of output media (Table 2).

**Table 1 – Standard handling charge (migrated)**

<b>Data Type</b>	<b>Charge</b>
Field, Processed or Reprocessed Seismic data	\$150 per Survey
Navigation or Velocity data	\$75 per Survey
Well logs	\$75 per Well
Survey Reports	\$50 per Survey
Well Reports	\$50 per Well

**Table 2 – Charge per unit of Output Media (migrated)**

<b>Output Media</b>	<b>Data Volume</b>	<b>PRICE</b>
Tape – 3592	< 700GB	\$600
On-line (FTP)	< 40MB	\$30
Disk - DVD	<4.7GB	\$50
Disk - Memory Stick or USB Drive	< 50GB	\$75
Disk - USB Drive	50GB - 100GB	\$150
	100GB - 349GB	\$400
	350GB - 699GB	\$600
	700GB - 1TB	\$850
	1TB - 1.5TB	\$1200
	1.5TB - 2TB	\$1600

Notes to Table 2:

1. Customer must nominate whether Tape or Disk media or on-line delivery is preferred.
2. On-line FTP delivery is only available for file sizes <40MB
3. SEG-D formatted data is available only on Tape.
4. GA will fit requested data on the minimum practical number of requested media while avoiding splitting lines or datasets between media.
5. No more than one survey will be written onto a single Tape.
6. Multiple surveys may be written onto a Disk
7. Alternative media may be quoted at additional cost on request (e.g. DLT, LTO)

### **Acreage Release Workstation Packages**

In support of the annual offshore acreage release process, Geoscience Australia provides seismic data in a 'workstation ready' package to allow data to be loaded directly into interpretation platforms; saving considerable time and expense.

Pre 2012 workstation packages are available in GeoFrame™, Kingdom™ and Landmark™ 2003 formats. The 2012 workstation package is available in GeoFrame™ 4.5, Kingdom™ 8.5 and a full exported SEG-Y with navigation, sp and cdp in the headers. The data is packaged on USB hard drive and contains:

- all available open-file 2D and 3D seismic in the release areas; and

- well logs, well completion reports, destructive analysis reports and Tiff images of scanned well log plots.

**Table 3 – Charge for Acreage release Workstation Packages**

<b>Year</b>	<b>PRICE per Unit</b>
2012	\$ 1500
2011	\$ 1500
2010	\$ 1000
2009	\$ 1000
2008	\$ 500
2007	\$ 500
2007 & 2008	\$ 900

## **2. PRICES – DATA NOT MIGRATED TO THE NEW STORAGE SYSTEM**

Pricing for data that is in digital form but not migrated to the new storage system comprises a handling charge for each data type per Well or Survey (Table 4) plus a charge for each unit of input media (Table 5).

**Table 4 – Standard handling charge (not migrated)**

<b>Data Type</b>	<b>Charge</b>
Field, Processed or Reprocessed Seismic data	\$500 per Survey
Navigation or Velocity data	\$250 per Survey
Well logs	\$250 per Well

**Table 5 – Charge per unit of Input media (non migrated)**

<b>Input Media (tape)</b>	<b>PRICE per Unit</b>
3592JA or 3592JB	\$450
3590	\$100
3490	\$30
3480	\$20
4mm	\$125
8mm	\$125
9 track	\$30
DLT/LTO	\$250

### Notes to Table 5:

1. All notes for Table 2 also apply to Table 5;
2. Prices include delivery on 3592JB tape or USB drive - alternative media may be quoted at additional cost on request (e.g. 3592JA, DLT, LTO);
3. This pricing applies to Survey or Well orders priced at \$20,000 or less. Larger orders will be quoted separately on request.

### *Non-digital Survey and Well Reports*

Many Survey reports, seismic sections, Well reports and Well logs are only available in hard copy and need to be scanned prior to migration. In these cases the standard handling charges and per unit fees are listed in Table 6.

**Table 6 – Charges for non-digital Survey & Well reports**

<b>Item</b>	<b>Handling Charge</b>	<b>PRICE per Unit</b>
Observer logs	\$50	\$300 per Survey
Seismic report	\$50	\$150 per Survey
Seismic section	\$250	\$15 per Section
Well report	\$50	\$300 per Well
Well logs	\$250	\$15 per Log
